Geographic Response Strategies for Northwest Arctic Subarea, Northern Zone

An example of the *Diversion Booming Tactic*. Actual deployment should be adjusted for local conditions.

An example of the *Passive Recovery Tactic*. Actual deployment should be adjusted for local conditions.

Map Legend

	Free-oil Recovery		Protected-water Boom
	Diversion Booming		Snare or Sorbent Boom
	Passive Recovery		Bears in Area, Guards Recommended
	Shoreside Recovery		

Aerial photography of this area is unavailable at this time, but may be included as it becomes available.

N-05-01 	Ipiavik Lagoon Nearshore waters in the general area of: Lat. 67° 35.22'N Lon. 164°08.37'W	Free-oil Recovery Maximize free-oil recovery in the offshore & nearshore environment of Ipiavik Lagoon depending on spill location and trajectory.	Deploy free-oil recovery strike teams upwind and up current of Ipiavik Lagoon. Use aerial surveillance to locate incoming slicks.	Deploy multiple free-oil recovery strike teams as required to maximize interception of oil before it impacts sensitive areas.	Delong Mnt. Transportation System Dock. (Red Dog Mine Dock)	Via marine waters Chart 16005	Same as N-05-02	Vessel master should have local knowledge. Use extreme caution, shoal waters with numerous reefs and rocks.
N-05-02 	Ipiavik Lagoon Entrance Lat. 67° 35.94'N Lon. 164°06.05'W	Divert and Collect Divert oil to shore-side collection points determined by spill source and trajectory. The entrance to the lagoon may change seasonally and large storms may open the lagoon in other areas on the barrier beach. Aerial survey recommended prior to deployment.	Deploy anchors and boom with skiffs (class 6). Place protected-water boom at proper angle to divert incoming oil to the collection site. Set-up collection site using shore-side collection units or if oil volume is minimal, use sorbent boom or snare line to provide collection of oil. Tend throughout the tide. If storms threaten to breach the barrier beach, deploy passive recovery across the channels of the streams in Ipiavik Lagoon. The lagoon may not be accessible with skiffs. Helicopter deploy when not accessible.	Place and anchor snare line or sorbent boom across the channels of streams in Ipiavik Lagoon. Replace as necessary to maximize the recovery.
