Purpose of Meeting:

The purpose of this meeting is to bring together oil spill responders from SEAPRO, ADEC and the USCG to review/edit oil spill response tactics for the 66 high priority sites selected for GRS development in SE Alaska.

Background

This is the second round of GRS development for the SE Alaska Subarea. Currently there are 66 draft plans that need to be reviewed by the Tactics Group. A survey team visited 20 sites earlier this year to design those GRS and 6 were surveyed while capturing aerial photography. The remaining sites are estimates of the tactics that may be used to protect the resources at each site. These require additional scrutiny from the Tactics Group to ensure that they are feasible and provide the best available protection.

The draft GRS documents are available for review on each of the zones web pages or are linked below:
