Prevention and Emergency Response Program

SITUATION REPORT

INCIDENT NAME: GC-2 Oil Transit Line Release

SITREP #: 14

SPILL NUMBER: 06399906101

LEDGER CODE: 14163060

TIME/DATE OF SPILL: The spill was first discovered by BPXA operators at 5:45 AM, March 2, 2006. The spill was reported to ADEC by the State Troopers at 6:15 AM, March 2, 2006.

TIME/DATE OF SITUATION REPORT: 10:00 AM, March 10, 2006.

TIME/DATE OF THE NEXT REPORT: 10:00 AM, March 13, 2006. **No sitreps are scheduled for release this weekend, unless there is a major change in the situation status.**

TYPE/AMOUNT OF PRODUCT SPILLED: Crude oil. At about 7:45 AM today, the Unified Command released an estimate of the volume of oil spilled. The estimate is between 201,000 and 267,000 gallons over a 1.93 acre area. The calculation was based upon GPS mapping and surveyor calculations done by the Volume Estimation Team.

LOCATION: A transit line between Gathering Center 2 (GC-2) and GC -1, Western Operating Unit, Prudhoe Bay, Alaska.

CAUSE OF SPILL: A quarter inch hole in the pipeline due to possible internal corrosion. The source is an aboveground 34 inch diameter crude oil transit pipeline. The leak is from a small hole discovered in the pipe, under the caribou crossing. A fact-finding investigation is being conducted with a team including BPXA and State of Alaska representatives.

POTENTIAL RESPONSIBLE PARTY (PRP): BP Exploration Alaska (BPXA)

RESPONSE ACTION: Extreme cold weather (wind chill to 74° below zero or colder) will continue to hamper field activities today. Vacuum recovery of fluids, oiled snow removal and the continued excavation of the caribou crossing are scheduled activities for today.

Currently the primary recovery tactic is to use vacuum trucks to pick up pooled oil. A heavy oil pump is being used on the inlet of each vacuum hose to assist in moving the oil. Small "Bobcat" style front end loaders are being used to remove contaminated snow from the spill area as well.

Approximately 1,395 bbls (58,590 gallons) of oil/water have been recovered as of 7:00 AM on March 10, 2006.

A total of 60 spill responders, 30 for the day shift and 30 for the night shift, are involved in the field-cleanup operation.

The BPXA Incident Management Team (IMT) at the Prudhoe Bay Operations Center (PBOC) and the Business Support Team (BST) in Anchorage continue to operate. ADEC has a staff liaison coordinating with the BST. Agency Public Information Officers are staffing the Joint Information Center in Anchorage. Six ADEC staff members are in Prudhoe Bay participating in the IMT and in the field operations.

SOURCE CONTROL: The sleeve/clamp is expected to be welded in place to complete the permanent repair today. There will be a pre-weld meeting at 8:00 AM today. After the meeting the final weld is estimated to take approximately 24 hours to complete.

RESOURCES AFFECTED: It was calculated that at most 1.93 acres of tundra and frozen lake surface may have been impacted.

FUTURE PLANS AND RECOMMENDATIONS: Additional response actions include determining the volume spilled and cause of the spill. Plans to repair the pipeline and resume GC-2 facility operations are being developed now that the source has been identified.

WEATHER: Mostly cloudy, chance of snow, highs around 28°F below zero, southwest winds to 10 to 15 MPH with wind chill to 70° below zero.

UNIFIED COMMAND AND PERSONNEL:

Incident Commander:	James Fausett (BPXA)
F.O.S.C:	Jeff Rodin (EPA)
S.O.S.C:	Ed Meggert (ADEC)
L.O.S.C:	Waska Williams (NSB)

FOR ADDITIONAL INFORMATION CONTACT: Lynda Giguere (907) 321-5491,
Leslie Pearson (Cell) 907-244-3390
