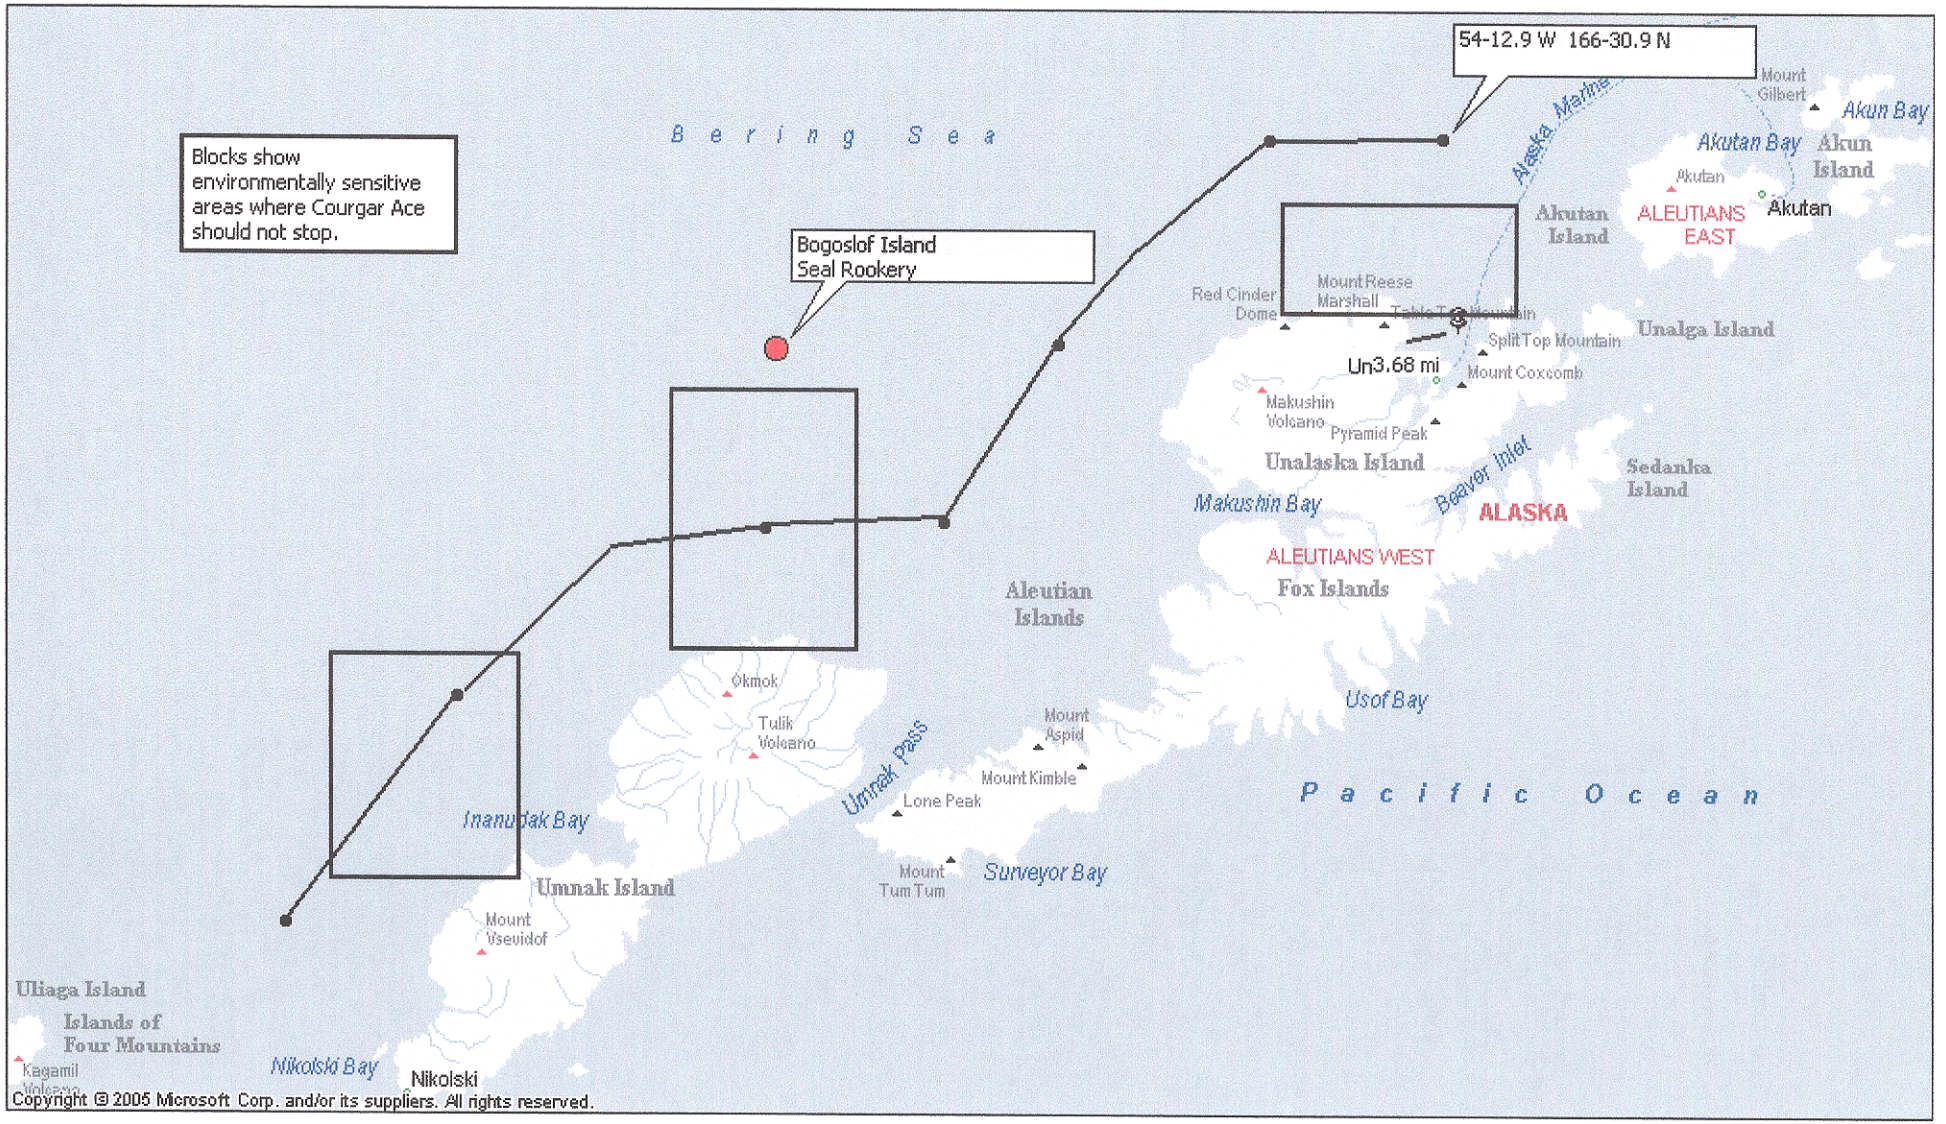
Revision 1 to Tow Plan Routing

Tow route should be outside of 10 nm from land as shown by the black line on the below chart. Also, Cougar Ace should not come closer than 10 nm from Bogoslof Island seal rookery. NOAA has stated that about 1-2 nm further offshore there may be a West-East current that can assist speed.



Capt. M DeVries FOSC

John Brown, ADEC, SOSC

Theo Camlin, RPIC
