

ALASKA DEPARTMENT OF ENVIRONMENTAL CONSERVATION
Division of Spill Prevention and Response
Prevention and Emergency Response Program

SITUATION REPORT

INCIDENT NAME: Kuparuk 2U Pad Crude Oil Spill **SITREP #:** 7

SPILL NUMBER: 07399935001 **LEDGER CODE:** 14247160

TIME/DATE OF SPILL: ConocoPhillips Alaska Inc. (CPAI) discovered the spill at 1:33 AM on December 16, 2007 and reported the spill to ADEC via the Alaska State Troopers at 2:43 AM.

TIME/DATE OF SITUATION REPORT: 3:00 PM, January 2, 2008

TIME/DATE OF THE NEXT REPORT: When final spill volume is determined

TYPE/AMOUNT OF PRODUCT SPILLED: CPAI initially reported that over 100 gallons of crude oil, gas and fluids spilled from a 24-inch flow line located within the Kuparuk River field between the 2V and 2W pads. The initial estimate of over 100 gallons was increased to 4,284 gallons (102 barrels) after further assessment of the spill area. The spill area is tundra covered with approximately six inches of snow.

LOCATION: Kuparuk River Field, flow line between 2U Pad and CPF-2. Latitude: N 70° 19' 19.99"
Longitude: W149° 55' 41.52".

CAUSE OF SPILL: CPAI reported external corrosion to the flow line. After the insulation from the flow line was removed, responders observed a 6-inch long crack (about 1/8 inch wide at the center) in the flow line. Investigators believe the cause was from external corrosion due to water trapped between the pipe and the insulation surrounding the flow line. Detailed investigation into the cause will be conducted.

POTENTIAL RESPONSIBLE PARTY (PRP): ConocoPhillips Alaska Inc. (CPAI)

RESPONSE ACTION: Weather is delaying cleanup operations today due to cold and 30 MPH winds.

Thirty-four cleanup responders, split between two 12-hour shifts, supported by 20 Incident Command Team members are responding to the spill. On December 28th 2007, responders completed clean-up of wind-blown oil spray from the surrounding tundra and nearby frozen lake. The area has been sampled and the results are pending. Clean-up of the more heavily contaminated area near the point of release is continuing as weather allows. The majority of oil has been recovered. Responders are currently performing final cleanup with hand tools to remove a thin layer of oil that remains in this area. Contaminated snow is being processed in snow melters to separate waste types and determine oil volumes.

Two ADEC spill responders are onsite monitoring the response and cleanup.

SOURCE CONTROL: The source was controlled when operators shut down the oil wells feeding the flow lines.

RESOURCES AFFECTED: ACS and CPAI estimated that the spill affected 1,124 square feet area of tundra vegetation, and 350,000 square feet area of snow and tundra received wind blown oil spray. The spill area was covered with six inches of snow.

FUTURE PLANS AND RECOMMENDATIONS: ADEC responders are meeting with CPAI and their contractors to finalize tundra treatment options, finalize tundra treatment end points, and finalize spill volumes.

CPAI has identified and continues inspecting the other areas of concern on the 24 inch flow line.

WEATHER: Cloudy, 35 mph winds, blowing snow, and -4° F. Wind chill factor is -35° F.

UNIFIED COMMAND AND PERSONNEL:

Incident Commander: Jeff Huber, CPAI
 F.O.S.C.: Carl Lautenberger, EPA
 S.O.S.C.: Ed Meggert, ADEC
 Field S.O.S.C. Tom ReRuyter, ADEC

FOR ADDITIONAL INFORMATION CONTACT: Leslie Pearson, ADEC, 269-7543 or Ed Meggert, ADEC, 451-2124

Photographs and other spill information are available for viewing at: <http://www.state.ak.us/dec/spar/perp/index.htm>

AGENCY/STAKEHOLDER NOTIFICATION LIST

This SITREP has been distributed via email to the Governor’s office, Senator Stevens’ office, ADF&G, ADNR, SECC, USEPA, USDOJ, NMFS, USFWS, USFS and NOAA in addition to the following.

STATE AGENCY	NAME	SENT VIA	ADDITIONAL INFO	TELEPHONE	FAX
ADNR	Leon Lynch/ Gary Schultz/ Larry Byrne	Fax		451-2724/ 451-2732	451-2751 or 659-2965
