Division of Spill Prevention and Response
Prevention and Emergency Response Program

SITUATION REPORT

INCIDENT NAME: Pile Bay Road Tanker Trailer Spill

SITREP #: 17

SPILL NUMBER: 09269915701

LEDGER CODE: 14274760

TIME/DATE OF SPILL: Alaska State Troopers notified ADEC at 7:30 PM on June 6, 2009

TIME/DATE OF SITUATION REPORT: 2:00 PM on September 2, 2009, 2009

TIME/DATE OF THE NEXT REPORT: 2:00 PM on September 16, 2009

TYPE/AMOUNT OF PRODUCT SPILLED: The Potential Responsible Party (PRP) reported to the Alaska State Troopers that the tank trailer contained an estimated 9,500 gallons of diesel fuel before the incident. ADEC staff on scene reviewed the loading records for the tanker trailer and the emergency off-loading and estimated the spill to be approximately 1,400 gallons.

LOCATION: Pile Bay Road, Lake Iliamna. Pile Bay Road is located approximately 170 miles to the southwest of Anchorage, on the northeast end of Lake Iliamna. The exact spill location is 59° 45.474'N / 153° 50.734'W.

CAUSE OF SPILL: Upon further investigation, it was determined that the 9,500-gallon tractor trailer fuel tank was unhitched from the towing vehicle at approximately 2:00 PM on June 6, 2009. At about 7:00 PM, the fuel trailer was found on the ground with the landing gear collapsed. During the collapse, the landing gear punctured the front holding tank of the trailer, creating a hairline crack along a weld and a half-inch hole in the tank.

POTENTIAL RESPONSIBLE PARTY (PRP): Iliamna Development Corporation (IDC), Iliamna AK

RESPONSE ACTION: Finish-work on the three former stockpile areas and the remediation site continues. IDC personnel are currently removing oversized rocks and leveling the soil at the remediation site. IDC is expected to be completed with the remediation site by mid September 2009. When the remediation site is completed ADEC and Bristol Environmental personnel will be on site for final inspection of the area.

IDC personnel continue to monitor the sheen at the river's edge. Recent reports from IDC indicate that the sheening has slowed down and is localized to couple of specific locations; currently IDC replaces 5-7 sorbent pads a day.

RESOURCES AFFECTED: There have been no reports of affected wildlife at this time.

FUTURE PLANS AND RECOMMENDATIONS: ADEC has requested a winter oil recovery plan from IDC and Bristol Environmental to include a passive winter system for recovery and containment of the sheen that persists on the edge of the river. In the meantime, ADEC and IDC will continue to monitor the sheen and maintain absorbent pads and boom at the river's edge.

WEATHER: Today: cloudy with rain showers east to southeast winds 5 to 15 mph, highs in the 50s, lows tonight 40s. Thursday through Sunday: cloudy to partly cloudy with chance of rain, highs in the 60s, lows in the 40s, variable winds.

UNIFIED COMMAND AND PERSONNEL:

Incident Commander:	Bill Miller, General Manager (IDC)
F.O.S.C. :	Matt Carr (EPA)
S.O.S.C. :	Gary Folley (ADEC)
