Division of Spill Prevention and Response
Prevention and Emergency Response Program

SITUATION REPORT

INCIDENT NAME: Lisburne Common Line Release

SITREP #: 4

SPILL NUMBER: 09399933301

LEDGER CODE: 14281660

TIME/DATE OF SPILL: The spill was discovered at approximately 3:05 AM, November 29, 2009 by the BPXA operator making a routine check. BPXA notified ADEC at approximately 4:45 AM on November 29, 2009.

TIME/DATE OF SITUATION REPORT: 2:00 PM on December 2, 2009

TIME/DATE OF THE NEXT REPORT: 2:00 PM on December 3, 2009

TYPE/AMOUNT OF PRODUCT SPILLED: The spill was from an 18-inch three-phase common line carrying a mixture of crude oil, produced water, and natural gas. The amount spilled is currently unknown.

LOCATION: Approximately 1.5 miles from the Lisburne Production Center (LPC) heading east along the Drill Site Line 3 (L03) and west of T3C, Prudhoe Bay, North Slope, Alaska.

CAUSE OF SPILL: The cause of the spill is unknown and is under investigation.

POTENTIAL RESPONSIBLE PARTY (PRP): BP Exploration Alaska, Inc. (BPXA)

RESPONSE ACTION: BPXA responders and Alaska Clean Seas (ACS) crews completed Phase 1 cleanup in the South Division of operations during the night shift that ended at 6:00 AM on December 2. Approximately 40 cubic yards of snow contaminated by oil mist was removed from the South Division. To date, approximately 80 cubic yards of contaminated snow have been removed from the site. Phase 1 recovery operations have been completed; however, Phase 1 spill delineation and spill volume determination is ongoing.

The 18-inch line was successfully strapped down on December 1, alleviating the safety concern of pipe movement. Phase 2 operations are underway today to construct a rig mat staging area on the tundra necessary for initiation of cleanup operations in the heavily contaminated area directly surrounding the 18-inch line. Before the cleanup on the heavily contaminated area starts, the Unified Command is addressing safety issues regarding area access. The operations necessary to allow low profile loader access to the heavily contaminated area cannot commence until the safety issues have been addressed.

There continue to be six ADEC Prevention and Emergency Response Program (PERP) staff and two Industry Preparedness Program (IPP) staff in Prudhoe Bay for this response.

SOURCE CONTROL: The common line between the LPC and L03 was shut in. BPXA reports that the 18-inch line is no longer leaking product.

RESOURCES AFFECTED: BPXA estimates that 8,400 square-feet of snow-covered tundra has been affected with some contamination on the gravel road. Reports indicate that no product has reached the waters or shorelines of Prudhoe Bay. There are no reports of affected wildlife at this time.

FUTURE PLANS AND RECOMMENDATIONS: Phase 2 of the cleanup plan includes removing portions of the gravel road to allow access to the south side of the pipeline for Phase 2 and 3 cleanups. Heavily contaminated snow removal will commence once the South Division can be safely accessed with machinery.

BPXA is developing a risk mitigation plan addressing the remaining site access safety concerns. The completed mitigation plan will be submitted to the Unified Command before work commences.

Phase 3 of the cleanup plan includes additional cleanup operations for the heaviest contamination within the South Division, as necessary. Tactics for this cleanup will be finalized following Phase 2 operations.

WEATHER: Cloudy with areas of fog. Snow accumulation up to 2 inches. Temperature between 10-15°F. West winds 5-15mph. Tonight, cloudy with a chance of snow. Highs around 10°F. West winds 10 to 25mph.

UNIFIED COMMAND AND PERSONNEL:

Incident Commander: Randy Selman, BPXA
 F.O.S.C.: Matt Carr, EPA
 S.O.S.C.: Tom DeRuyter, ADEC
 Field S.O.S.C.: John Ebel, ADEC
 L.O.S.C: Gordon Matumeak, North Slope Borough

FOR ADDITIONAL INFORMATION CONTACT: Wes Ghormley, ADEC, (907) 451-2164 or Scot Tiernan, ADEC, (907) 465-5378.
