Division of Spill Prevention and Response
Prevention and Emergency Response Program

SITUATION REPORT

INCIDENT NAME: Lisburne Common Line Release **SITREP #:** 17 and Final

SPILL NUMBER: 09399933301 **LEDGER CODE:** 14281660

TIME/DATE OF SPILL: The spill was discovered at approximately 3:05 AM, November 29, 2009 by the BPXA operator making a routine check. BPXA notified ADEC at approximately 4:45 AM on November 29, 2009.

TIME/DATE OF SITUATION REPORT: 11:00 AM on January 13, 2010

TIME/DATE OF THE NEXT REPORT: This is the final report

TYPE/AMOUNT OF PRODUCT SPILLED: The spill was from an 18-inch three-phase common line carrying a mixture of crude oil, produced water, and natural gas. BPXA preliminary estimate for the total volume of oily material released is 45,828 gallons (1,091 barrels).

LOCATION: Approximately 1.5 miles from the Lisburne Production Center (LPC) heading east along the Drill Site Line 3 (L03) and west of T3C, Prudhoe Bay, North Slope, Alaska.

CAUSE OF SPILL: The Unified Command issued a press release stating that the 18-inch flow line ruptured along the bottom, creating an opening two feet in length. The Unified Command noted that the rupture is consistent with an overpressure scenario, linked to ice plugs forming inside the pipe.

POTENTIAL RESPONSIBLE PARTY (PRP): BP Exploration Alaska, Inc. (BPXA)

RESPONSE ACTION: The response crews have completed all of the cleanup activities.

BPXA retained Oasis Environmental consultants to collect soil confirmation samples from the spill site and have them analyzed for petroleum and electrical conductivity. The analytical results showed that cleanup goals were achieved.

Repair work on the 18-inch flow line continues.

SOURCE CONTROL: The 18-inch flow line between the LPC and L03 was shut in. BPXA reports that the 18-inch line is not leaking.

RESOURCES AFFECTED: BPXA estimated that 8,400 square-feet of snow-covered tundra were affected, with some contamination on the gravel road. Reports indicate that no product reached the waters or shorelines of Prudhoe Bay. There continues to be no reports of affected wildlife.

FUTURE PLANS AND RECOMMENDATIONS: Complete the repairs to the pipeline. A tundra restoration plan has been submitted to ADEC that includes placement of tundra sod into this spill site from a donor site. BPXA has been granted a permit to expand a gravel mine site within their leased area. The tundra that would have been sacrificed in the expansion project will be moved to restore this spill site.

WEATHER: Mostly cloudy. Flurries. A chance of snow. Highs -10° to -15° F. Southeast winds 5 to 15 mph.

FORMER UNIFIED COMMAND AND PERSONNEL:

Incident Commander:	Randy Selman, BPXA
F.O.S.C.:	Matt Carr, EPA
S.O.S.C.:	Tom DeRuyter, ADEC
L.O.S.C.:	Waska Williams, North Slope Borough

FOR ADDITIONAL INFORMATION CONTACT: Tom DeRuyter, ADEC, (907) 451-2145.
