Mary:

KPU's water right for Carlanna Lake, ADL 48795, is for public water supply, but we were informed in 1988 that Ketchikan no longer used the lake for anything other than emergency supply and fire protection. They did not relinquish the water right, however, and kept up with annual payments. Then in 1997 they applied to FERC for a preliminary permit for a hydro license, and we discussed amending their water right to hydro, but they apparently did not continue pursuing the hydro idea. The dam is state-regulated. I don't know what the water quality or fish habitat issues might be, but we have no current issues that I know of.

Ketchikan now uses Ketchikan Lakes for both public water supply and hydro. They have a few other public water supply sources they have taken over from neighborhood systems, and they have applied for a water right for public water system from Whitman Lake in association with a hydro application now under FERC review.
