Leo, attached is a draft of the Hammer Slough inspection report. We've also included the results of fecal coliform data we collected from several Petersburg streams. I'd appreciate any comments you or Ken have by January 22nd so that I can complete it and mail to all parties.

Our Hammer Slough work with you has been a success story. We are touting it as the type of thing we need to do throughout Southeast. It was fun and productive (Besides, its fun to visit Petersburg!).

See you in the spring for the wrapup visit. Eric or I will call and set up a mutually acceptable time. Drop by if you are in Juneau during the Legislative session.

Thanks.
