Department of Environmental Conservation
Division of Air & Water Quality

TO: Drew Grant
Water Quality Assessment & Reporting

DATE: May 12, 2000

THRU:

FROM: Carl Schrader 
Southeast Watersheds Coordinator

PHONE: 465-5307
FAX: 465-5274

SUBJECT: Hammer Slough

I request that Hammer Slough (AK ID # 10202-006) be moved from Tier III to Tier IV of Alaska's Clean Water Act, Section 303(d) list of impaired waters. I conducted an inspection on April 12, 2000 to confirm that all remaining remedial actions identified in the October 23, 1996 Waterbody Assessment and Monitoring Report had been completed and were effective in controlling sedimentation. Remaining actions included: 1) reseeding of a portion of the DOT fines pile adjacent to the quarry road; and 2) construction of a structure to keep stockpiled sand out of the tributary creek. Both of these management measures have been implemented and are effective in controlling sediment from these sources.
