RE: First Quarter 2003 Receiving Water DMRs: NPDES Permit # AK-004320-6

Dear Sir:

Attached please find the First Quarter 2003 Receiving Water Discharge Monitoring Reports (DMRs) from Kennecott Greens Creek Mining Company (KGCMC) for NPDES Permit Number AK 004320-6. The samples for this quarter's data were collected by KGCMC staff on 26 March 2003 at the permit-specified sites: Site 106 (REC 1), Site 107 (REC 2), and Site 108 (REC 3), each at a 5 foot depth.

Analytica Environmental Laboratories again performed the Cyanide and general characterization analyses on these samples, while Battelle Marine Sciences Laboratory again performed the metals analyses on the samples. The attached 4/16/03 Analytica data report summarizes their Cyanide, TSS, pH, Conductivity, and Turbidity results, as well as their associated laboratory QA efforts. The attached 5/28/03 Battelle laboratory report presents their metals analytical results as well as their laboratory QA efforts. KGCMC prepared the DMR's electronically through the Greens Creek environmental database, then checked them for accuracy against the laboratory data reports.

Should you, or your staff have any questions regarding this submittal, please contact me directly here at the mine (907) 789-8170.

Sincerely,

Bill Oelklaus

William F. Oelklaus
Environmental Manager

Kimberely Unger
Project Manager

Case Narrative

Analytica Alaska Southeast
Work Order: J0303128

Samples were prepared and analyzed according to EPA or equivalent methods outlined in the following references:

Methods for Chemical Analysis of Water and Wastes, USEPA 600/4-79-020, March 1983.

REVIEW FOR COMPLIANCE WITH ANALYTICA QA PLAN
A summary of our review is shown below, organized by test:

SAMPLE RECEIPT:
There were 4 samples received on 3/27/2003.
Samples were received at a temperature of 5.5 deg C.in cooler 1 at Analytica-Juneau.
The cooler was opened on 3/27/2003.
Problem with Custody Seals
Comments:
Bucket sealed with lid. Had to cut open with knife.

Samples were received at a temperature of 3.1 deg C at Analytica-Thornton. Samples were received in good condition and in order per chain of custody.

All analytical results contained in this report have been reviewed under Analytica's internal quality assurance and quality control program. Any deviations in quality control parameters for specific analyses are noted in the following text. A complete quality assurance report, including laboratory control, matrix spike, and sample duplicate recoveries is kept on file in our office and is available upon request.

All method specifications were met for the following tests:

Test Method: SM4500-CNE - Cyanide, Colorimetric Method - Total CN - Ocean Water
Test Method: 150.1 - pH, Elecrometric - (pH) - Ocean Water
Test Method: 160.2-Residue, Gravimetric, Non-filterable, 105C - TSS - Ocean Water
Test Method: 180.1 - Turbidity, Nephelometric - (Turbidity) - Ocean Water
