| State your general observation. | The day after leaving AK, the EO informed me that he found a high Opacity reading while he was looking through the logs. The reading was logged around 0730 on 8/12/13, while the vessel was docked in Seward, AK. The EO informed me he didn't notice the reading until well after we left AK waters on 8/12/13, around 1700 hrs. EO initiated Self Report. The EO and Chief Engineer believe the high reading was due to test starting of engines after maintenance. |
| Trip Type: | VO |
| Report Date | Aug 13, 2013 |
| Does this observation require a followup response | Yes |
| If Yes, indicate the response party. | Both |
