Albert,

Thank you for including me in this correspondence. I have contacted our contractor on this project and he will have the questions answered by the end of the week and I will forward them on to you. Thanks again. John.

Subject: RE: Preliminary questions SRE RCL CEI 1 14 09

Dear Rich:

We understand: Please keep in mind that we had similar questions for other lines as well. We recommend to discuss this with your "industry group" and an "group response" from this group is acceptable. The questions are pretty much strait forward, and we believed it should not take that much time to answer the questions by the RCL / "industry group".

Let us know when we can expect RCL's / CEL's following up actions on these questions.

Kind Regards,

Albert Faure
ADEC CPVEC

Subject: Re: Preliminary questions SRE RCL CEI 1 14 09
Importance: High

Albert,

I will have to forward all questions regarding the nature of the sampling done on Alaska and other West Coast ports to the company that conducted the sampling or to ACA. I can not guarantee that they will have the information back to you by the 10th. This information is certainly being used by every line in submitting an SRE, so a response from the industry is probably more appropriate.

Regards,

Rich Pruitt

Subject Preliminary questions SRE RCL CEI 1 14 09

Dear Mr. Pruitt:

With reference to the RCL's SRE 1 14 09 annual Report please find following preliminary questions below:

Page 25 of 1 14 09 SRE RCL CEL. This page provides an summary of the sampling results / actions taken by RCL / ACA. Provide responses on the following items:

1. We assume the sampled water intake represents "as received" conditions for the vessel. Provide detailed description how the sample represent the water quality as taken on board.
2. Provide information more in detail how the sampling was performed, include the used procedures (e.g. flushing duration / periods / used connectors) location of sampling ("sample valve"), and the used QA QC sampling procedures.
3. Are the tables available in electronic format?
4. Is the summary available in workable electronic format?
5. Are these results in the SRE include all the potable water sampling (shore side) actions? Please confirm. If RCL ACA has sample results of the potable water (shore side) that is not include in the SRE, identify these sample results.
6. Provide information regarding the selection of the Port sampling, and frequency rationale (e.g. Wrangell only one time sample?)

We expect your responses on these questions on or before February 10, 2009.

In case of questions, please do not hesitate to contact me.

Kind Regards,

Albert Faure
