

COMPARISON OF STATE AND FEDERALLY APPROVED WATER QUALITY STANDARDS

Current as of July 12, 2011

IMPORTANT NOTE TO READER: This summary of regulations has been prepared by the Alaska Department of Environmental Conservation and does not constitute an official version of these regulations, nor does it necessarily reflect current law. If any discrepancy is found between this booklet and the Alaska Administrative Code, the Code should be considered the final authority, unless the discrepancy is the result of an error in the Code.

State Water Quality Standards (WQS) must be approved by the Environmental Protection Agency (EPA) before they can be used in Federal Clean Water Act (CWA) actions such as APDES or NPDES wastewater discharge permits, Total Maximum Daily Load allocations, and CWA Section 303(d) impaired waterbody listings.

The following table summarizes the differences between 2011 Alaska WQS (see note 2 below) and WQS effective for Federal purposes. For all other Alaska WQS, use the 2011 Alaska WQS for all purposes. This table was developed by DEC and EPA WQS staff.
