Proposed Final Permit Review

Start Date: January 27, 2015

End Date: February 2, 2015

Permit No.: AKG700000 and AKG701000

Proposed Permit Coverage:

DEC proposes to reissue two APDES general permits for log transfer facilities (LTFs) in Alaska. The general permits authorize and set conditions on the discharge of pollutants from LTFs to waters of the United States in the State of Alaska.

The general permits area of coverage includes marine waters of the U.S. within the State of Alaska extending west from the Alexander Archipelago through the central Gulf of Alaska and Prince William Sound to Kodiak Island.

The LTF general permits authorize the discharge of bark and wood debris to marine waters of the U.S. and the State of Alaska within site-specific project areas at each LTF. The LTF general permits propose to authorize discharges for each LTF within the area described in a Department of Natural Resources or other land management authority's tidelands permit, lease or easement. The LTF general permits include a zone of deposit for underwater accumulation of bark and

woody debris within the project area at LTFs.

Determination:

The DEC has determined to reissue the above listed general permits.
