ALASKA DEPARTMENT OF ENVIRONMENTAL CONSERVATION Division of Air Quality SITUATION REPORT AIR QUALITY ADVISORY Central Interior AK #2013-10

UNHEALTHY

LOCATION(S) IMPACTED: North Pole, Fairbanks and surrounding areas.

TIME/DATE OF UPDATE: Friday January 25, 2013 2:00 PM.

VALID TIME: Friday January 25, 2013 2:00 PM. to Sunday January 27 2013 4:00 PM

TIME/DATE OF THE NEXT REPORT: Sunday January 27 2013 4:00 PM

ADVISORY: Air Quality advisory for North Pole and Fairbanks area. Air quality in North Pole is in the **UNHEALTHY** category. Air quality at the Fairbanks monitoring sites is in the MODERATE category but is expected to deteriorate as the cold air settles in tonight and over the weekend. NWS forecasts poor dispersion tonight.

DEC advises people with respiratory or heart disease, the elderly and children should avoid prolonged exertion; everyone else should limit prolonged exertion. See the table below for more guidance on the Air Quality Index categories and Cautionary Statements.

PUBLIC IMPACT:

This is an area forecast, and as such is a general forecast for the Fairbanks and North Pole area. Pollution levels will vary depending on precise location, local emission sources, and wind flow patterns. Note that this advisory is based in part on particulate matter readings from the downtown areas of Fairbanks and North Pole and selected other local areas but may not be representative in your area. If you are sensitive to respiratory problems and experience any effects please follow the instructions of your physician.

Residents can take proactive measures to improve air quality by voluntarily reducing wood and coal burning while this air quality advisory is in effect. Residents who need to burn wood should ensure it is seasoned and practice smart burning practices.

State of Alaska Air Quality Control Plan provides the following guidance on wood smoke emission standards: A person may not operate a wood-fired heating device in a manner that causes (1) black smoke; or (2) visible emissions that exceed 50 percent opacity for more than 15 minutes in any one hour in an area for which an air quality advisory is in effect. (Reference: Department of Environmental Conservation, 18 AAC 50 Air Quality Control, Dec 9, 2010)

The following table is the Air Quality Index for Particle Pollution.

AQI level	AQI Category	AQI Cautionary Statements
0-50	Good	None
51-100	Moderate	Unusually sensitive people should consider reducing prolonged or heavy exertion.
101- 150	Unhealthy for Sensitive Groups	People with heart or lung disease, the elderly and children should reduce prolonged or heavy exertion.
151- 200	Unhealthy	People with respiratory or heart disease, the elderly and children should avoid prolonged exertion; everyone else should limit prolonged exertion.
201- 300	Very Unhealthy	People with respiratory or heart disease, the elderly and children should avoid any outdoor activity; everyone else should avoid prolonged exertion.
Over 300	Hazardous	Everyone should avoid any outdoor exertion; people with respiratory or heart disease, the elderly and children should remain indoors.

OPEN BURN RESTRICTIONS: The Alaska Department of Environmental Conservation prohibits open burning in an area whenever there is an air quality advisory in effect for that area (18 ACC 50.065(e)).

For information on this advisory, contact Michael Gravier with the Division of Air Quality at 907-269-7676.
