

**ALASKA DEPARTMENT OF ENVIRONMENTAL CONSERVATION
Division of Air Quality**

FNSB Air Quality Stage 2 Alert

LOCATION(S) IMPACTED: North Pole Zone

EFFECTIVE: TIME/DATE: Friday January 22, 2:00 PM

EXPIRES: TIME/DATE: Saturday January 23, 11:00 PM

ALERT TYPE: Stage 2– Curtailment required, see below for details

EXCEPTIONS: NOASH waiver holders only

MANDATORY ACTION REQUIRED BY RESIDENTS; All solid fuel-fired devices must cease operation, within three hours of the effective time of alert, unless the exceptions above apply. All **WAIVER HOLDERS** are still required to meet the 20% visible emission or opacity limit during any air quality episodes/alert. Residents should rely instead on their home's cleaner source of heat (such as a gas or fuel oil fired furnace or boiler or electric baseboard heaters) until the Stage 2 alert is canceled.

This does not apply during a power outage.

OUTDOOR OPEN BURNING: ALL OPEN BURNING IS PROHIBITED in the PM_{2.5} Nonattainment area from November 1st – March 31st, including the use of burn barrels. Bonfires, campfires, and ceremonial fires are also prohibited during a Stage 2 alert.

ADDITIONAL Voluntary Actions: Plug In at 20 degrees or colder, ride the bus, or carpool

FORECAST: Clearing skies and a strengthen surface inversion this evening will dominate the area. Warming temperatures during the day will weaken the inversion, expect fair to poor dispersion during the day and poor to very poor dispersion during the night. We are forecasting the North Pole air quality to remain **Unhealthy for Sensitive Groups** with periods of **Unhealthy** or worse during the alert period, with 24hr average PM_{2.5} values >30ug/m³ for next 33 hours

Stage 2 restrictions are called once levels are forecasted to or have reached an **UNHEALTHY for SENSITIVE GROUPS** or higher category

Air Quality Category	Cautionary Statements
Good	None
Moderate	Unusually sensitive people should consider reducing prolonged or heavy exertion.
Unhealthy for Sensitive Groups	People with heart or lung disease, the elderly and children should reduce prolonged or heavy exertion.
Unhealthy	People with respiratory or heart disease, the elderly and children should avoid prolonged exertion; everyone else should limit prolonged exertion
Very Unhealthy	People with respiratory or heart disease, the elderly and children should avoid any outdoor activity; everyone else should avoid prolonged exertion
Hazardous	Everyone should avoid any outdoor exertion; people with respiratory or heart disease, the elderly and children should remain indoors

Note: Air Quality readings are from monitoring stations in Fairbanks and North Pole and may not be representative of your neighborhood. If you are sensitive to air pollution, or experience any respiratory problems, please follow the instructions of your physician
