LOCATION(S) IMPACTED: Fairbanks Zone

EFFECTIVE: TIME/DATE: Tuesday January 25, 9:00 PM

EXPIRES: TIME/DATE: Wednesday January 26, 12:00 PM

ALERT TYPE: Stage 1– Curtailment required, see below for details

EXCEPTIONS: DEC issued Stage 1 waivers and all NOASH waivers

MANDATORY ACTION REQUIRED BY RESIDENTS: All solid fuel-fired devices must cease operation, within three hours of the effective time of alert, unless the exceptions above apply. All WAIVER HOLDERS are still required to meet the 20% visible emission or opacity limit during any air quality episodes/alert. Residents should rely instead on their home’s cleaner source of heat (such as a gas or fuel oil fired furnace or boiler or electric baseboard heaters) until the Stage 1 alert is canceled. This does not apply during a power outage.

OUTDOOR OPEN BURNING: ALL OPEN BURNING IS PROHIBITED in the PM2.5 Nonattainment area from November 1st – March 31st, including the use of burn barrels. This does not include recreational fires such as bonfires, campfires, or ceremonial fires.

ADDITIONAL Voluntary Actions: Plug In at 20 degrees or colder, ride the bus, or car pool

FORECAST: Strong west winds will weaken following the passage of a cold front this evening. Clearing skies tonight will allow an inversion to set up, leading to poor dispersion through the forecast period. We are forecasting Fairbanks air quality to remain Moderate with periods of Unhealthy for Sensitive Groups or worse, with 24hr average PM$_{2.5}$ values greater than 20ug/m$^3$ but less than 30ug/m$^3$for the next 16 hours.

Stage 1 restrictions are called once levels are forecasted or have reached a high MODERATE category.
Air Quality Category | Cautionary Statements
--- | ---
Good | None
Moderate | Unusually sensitive people should consider reducing prolonged or heavy exertion.
Unhealthy for Sensitive Groups | People with heart or lung disease, the elderly and children should reduce prolonged or heavy exertion.
Unhealthy | People with respiratory or heart disease, the elderly and children should avoid prolonged exertion; everyone else should limit prolonged exertion
Very Unhealthy | People with respiratory or heart disease, the elderly and children should avoid any outdoor activity; everyone else should avoid prolonged exertion
Hazardous | Everyone should avoid any outdoor exertion; people with respiratory or heart disease, the elderly and children should remain indoors

**Note:** Air Quality readings are from monitoring stations in Fairbanks and North Pole, and may not be representative of your neighborhood. If you are sensitive to air pollution, or experience any respiratory problems, please follow the instructions of your physician.
