FNSB Air Quality Stage 2 Alert

LOCATION(S) IMPACTED: North Pole Zone

EFFECTIVE: TIME/DATE: Sunday March 13, 9:00 PM

EXPIRES: TIME/DATE: Monday March 14, 11:00 AM

ALERT TYPE: Stage 2– Curtailment required, see below for details

EXCEPTIONS: NOASH waiver holders only

MANDATORY ACTION REQUIRED BY RESIDENTS; All solid fuel-fired devices must cease operation, within three hours of the effective time of alert, unless the exceptions above apply. All WAIVER HOLDERS are still required to meet the 20% visible emission or opacity limit during any air quality episodes/alert. Residents should rely instead on their home’s cleaner source of heat (such as a gas or fuel oil fired furnace or boiler or electric baseboard heaters) until the Stage 2 alert is canceled.

This does not apply during a power outage.

OUTDOOR OPEN BURNING: ALL OPEN BURNING IS PROHIBITED in the PM2.5 Nonattainment area from November 1st – March 31st, including the use of burn barrels. Bonfires, campfires, and ceremonial fires are also prohibited during a Stage 2 alert.

ADDITIONAL Voluntary Actions: Plug In at 20 degrees or colder, ride the bus, or carpool

FORECAST: Clear skies tonight will allow a surface inversion to set up this evening into late tomorrow morning. Expect poor to very poor dispersion through the forecast period. We are forecasting the North Pole air quality to remain Unhealthy for Sensitive Groups with periods of Unhealthy or worse during the alert period, with 24hr average PM2.5 values >30ug/m³ for next 14 hours.

Stage 2 restrictions are called once levels are forecasted to or have reached an UNHEALTHY for SENSITIVE GROUPS or higher category.
