

PUBLIC NOTICE
STATE OF ALASKA
DEPARTMENT OF ENVIRONMENTAL CONSERVATION
U.S. ARMY GARRISON
FORT WAINWRIGHT

The Alaska Department of Environmental Conservation (ADEC) has made a preliminary decision to issue Air Quality Control Minor Permit AQ0236MSS03 Revision 2 for Fort Wainwright.

Applicant: U.S. Army Garrison
1046 Marks Road Gaffney Road #6000
Fort Wainwright, AK 99703

Location: Latitude 64.8345678° North; Longitude 147.61913° West
Fort Wainwright, Alaska

Application: The basis for this permit revision is classified under AS 46.14.130(c)(2), because the Department finds that public health or air quality effects provide a reasonable basis to regulate the stationary source. This finding is contained in the State Implementation Plan (SIP) for the Fairbanks North Star Borough (FNSB) Serious Nonattainment Area (NAA) adopted on November 19, 2019.

The Department is processing Minor Permit AQ0236MSS03 Rev. 2 under the Department's revoke and reissuance procedures under AS 46.14.280(a)(2), and therefore no permit application was submitted by the Permittee. The Department is preparing a new comprehensive SIP with a new determination that SO₂ BACT limits for major stationary sources are not required to satisfy the State's obligations under the Clean Air Act requirements for stationary sources in the NAA. Given that the Department originally issued Minor Permit AQ0236MSS03 Rev. 1 for the sole purpose of implementing SO₂ controls identified in the FNSB NAA SIP for Fort Wainwright, the Department later found no underlying basis for issuing such permit.

The Department sent U.S. Army Garrison a notice of intent to revoke and reissue Minor Permit AQ0236MSS01 Rev. 1 under AS 46.14.280(a)(2), on July 30, 2024, to remove SO₂ conditions and add PM_{2.5} conditions and additional monitoring, recordkeeping, and reporting (MR&R) requirements.

Emissions: The potential annual emissions of regulated air pollutants at the stationary source will not exceed: 81.74 tons of Nitrogen Oxides, 18.35 tons of Carbon Monoxide, 51.43 tons of Particulate Matter, 39.98 tons of Sulfur Dioxide, and 15.31 tons of Volatile Organic Compounds. The total annual potential emissions of regulated air pollutants, other than greenhouse gases, are 206.81 tons. The Department does not consider this change to be a potential or actual emissions increase under 18 AAC 50.502(c)(3), or a potential or net emissions increase under 40 C.F.R. 52.21(b).

ADEC Preliminary Review: Based on review of the application, ADEC drafted a preliminary permit decision for this project under AS 46.14 and 18 AAC 50.
