

PUBLIC NOTICE
STATE OF ALASKA
DEPARTMENT OF ENVIRONMENTAL CONSERVATION
DOYON UTILITIES, LLC
FORT WAINWRIGHT (PRIVATIZED EMISSION UNITS)

The Alaska Department of Environmental Conservation (ADEC) has made a preliminary decision to approve Doyon Utilities, LLC's (Doyon's) application for Air Quality Control Minor Permit AQ1121MSS04 Rev. 1 for the Fort Wainwright (Privatized Emission Units).

Applicant: Doyon Utilities, LLC
P.O. Box 74040, Fairbanks, AK 99707-4040

Location: 64° 50' 00" North; 147° 35' 00" West

Activity: The basis for this permit revision is classified under AS 46.14.130(c)(2), because the Department finds that public health or air quality effects provide a reasonable basis to regulate the stationary source. This finding is contained in the State Air Quality Control Plan adopted on November 19, 2019.

The Department is processing Minor Permit AQ1121MSS04 Rev. 1 under the Department's revoke and reissuance procedures under AS 46.14.280(a)(2), and therefore no permit application was submitted by the Permittee. The Department is preparing a new comprehensive SIP with a new determination that SO₂ BACT limits for major stationary sources are not required to satisfy the State's obligations under the Clean Air Act requirements for stationary sources in the NAA. Given that the Department originally issued Minor Permit AQ1121MSS04 Rev. 1 for the purpose of implementing SO₂ controls identified in the FNSB NAA SIP for Fort Wainwright, The Department now finds no underlying basis for issuing such permit.

The Department sent Doyon a notice of intent to revoke and reissue Minor Permit AQ1121MSS04 under AS 46.14.280(a)(2), on July 30, 2024, to remove SO₂ conditions and add PM_{2.5} conditions and additional monitoring, recordkeeping, and reporting (MR&R) requirements.

Emissions: Minor Permit AQ1121MSS04 Rev. 1 authorizes a change in SO₂ emissions only. With this permitting action, Doyon's potential SO₂ emissions will revert to 1,764.01 tons per year, the levels in place prior to the issuance of AQ1121MSS04, before the existing SO₂ limits went into effect on June 9, 2021. The Department does not consider this change to be a potential or actual emissions increase under 18 AAC 50.502(c)(3), or a potential or net emissions increase under 40 C.F.R. 52.21(b).

ADEC Preliminary Review: ADEC drafted a preliminary permit decision for this project under AS 46.14 and 18 AAC 50.

Available Information: Copies of the revoke and reissue letter, ADEC's preliminary minor permit and technical analysis report (TAR) are available at the following offices:
