Attn: Mr. Timothy Woster

RE: HOME HEATING-OIL TANK (HHOT) ENVIRONMENTAL SERVICES, 1066 ELIZ ROAD, NORTH POLE, ALASKA
ADEC FILE NUMBER 100.38.215

This report summarizes our field efforts conducted on your property at 1066 Eliz Road in North Pole, Alaska (Figure 1). Our objective was to assess current soil and groundwater conditions in the area of the former HHOT. The data will be used to support a request for site closure with or without intuitional controls (ICs) from the Alaska Department of Environmental Conservation (ADEC) Contaminated Sites Program. The ADEC requested this information in a letter dated XXX. We discussed site closure with the ADEC project manager Mr. Shawn Tisdell on several occasions.

PROJECT BACKGROUND

In July 2007, you hired Stanford Construction (SC) to remove and replace your home heating-oil UST. During removal activities, SC personnel noticed a fuel odor. This prompted you to contact us, and to notify the ADEC of the apparent release from your UST. Shannon & Wilson assisted you with characterization efforts to determine if spills or releases from the UST had affected soil and groundwater. Our 2008 efforts included:

- Assessing subsurface conditions and field-screening soils during removal of contaminated soils;
- Collecting soil samples from the limits of excavation and from a test pit for analysis of hydrocarbons by an ADEC-approved laboratory;
- Observing the installation of a fuel-collection gallery (slotted vertical 1.5-foot-diameter culvert) in the excavation for floating-product removal and collecting product to the extent practible;

- Installing and sampling groundwater from two monitoring wells;
- Collecting water samples from the on-site and neighboring drinking water wells; and
- Reporting our findings in our August 2008 report, *Home Heating-Oil Underground Storage Tank Corrective Action and Assessment*.

In our 2008 report, we concluded that soil containing diesel-range organics (DRO) in excess of the ADEC cleanup level (CUL) appeared to be restricted to a narrow zone about 6 feet below ground surface (bgs) on the southern edge of the excavation. DRO was detected at a concentration of 439 mg/kg. Benzene, toluene, ethylbenzene, and xylenes (BTEX) were not detected above ADEC CULs. No analytes were detected in the water samples.

In a letter dated April 12, 2016 and e-mails, the ADEC provided you with guidance for site closure. Their letter provided you with options for closing the 1066 Eliz Road UST site with, or without, institutional controls. They determined that additional investigative work would be required to seek closure. In addition, they requested the two on-site monitoring wells and recovery-well culvert be decommissioned as they could provide a pathway for surface contamination to reach the groundwater.

Shannon & Wilson carried out groundwater sampling activities in 2016, from the two on-site monitoring wells, and two residential drinking water wells at 1066 Eliz Road and 1074 Eliz Road. Our findings reported in our February 6, 2017 report, *Environmental Services, 1066 Eliz Road, North Pole, Alaska* concluded that results were not detected for the requested analytes with the exception of DRO detections present in the two onsite monitoring wells below ADEC CULs.

SCOPE OF SERVICES

Our scope of services for this project included:

- Sub-contracting GeoTek Alaska, Inc. (GeoTek) to advance three soil borings to ten feet bgs at the location where DRO contamination above its ADEC CUL was detected in 2007;
- Logging soil profiles, field-screening, and collecting analytical soil samples during the soil boring installation process;
- Advance three temporary well points from each soil boring location and collecting analytical water samples;

- Sub-contracting Design Alaska, Inc. (Design Alaska) to decommission two onsite monitoring wells;
- Submitting this data summary report.

On September 16, 2018, Shannon & Wilson, Inc. personnel performed field activities in accordance with our ADEC approved Work Plan (WP) dated August 16, 2018.

SOIL SAMPLING

Prior to conducting ground penetrating activities, we performed utility locates at the site. We subcontracted GeoTek to advance three soil borings (Figure 2) in the area where DRO contamination above its ADEC CUL was detected in 2007. A photographic log is presented in Attachment A. The soil borings were advanced to the groundwater interface at depths of ten feet bgs. We logged soil borings, presented in Attachment B as graphic boring logs. We collected two primary samples from each boring at depths up to nine feet bgs. The sample depths were determined based on field-screening results from a photoionization detector (PID), presented in Attachment B, along with our sample collection logs.

Soil samples were submitted to SGS North America, Inc. (SGS) for analysis of DRO by Alaska Method AK102; gasoline-range organics (GRO) by AK101; and BTEX by Environmental Protection Agency (EPA) Method SW8260C. One soil sample was submitted additionally for the analysis of volatile organic compounds (VOCs) by EPA SW8260C; and polynuclear aromatic hydrocarbons (PAHs) by the 8270SIM method.

WATER SAMPLING

Concurrent with soil sampling activities, we collected groundwater samples from three temporary well points collocated with the soil borings. GeoTek Alaska drove the three temporary wells to a depth of 11 ft bgs. spanning the water table. We collected water sampled using a peristaltic pump with a reduced flow rate to avoid volatilizing the water through air entrainment. Our Well Sampling Logs are presented in Attachment B.

Water samples were submitted to SGS for analysis of DRO by AK102; GRO by AK101; and BTEX by EPA SW8260C One water sample was submitted additionally for the analysis of VOCs by EPA SW8260C; and PAHs by the 8270SIM method.

MONITORING WELL DECOMMISSIONING

Shannon and Wilson and Geotek Alaska decommissioned the onsite monitoring wells (WP-1 and WP-2) in general accordance with ADEC's *Monitoring Well Guidance*, dated September 2016. The wells were constructed of 1.5-inch welded steel casings, ten feet bgs. Both wells were fully removed by hand and backfilled with bentonite clay to the original ground surface. We understand you will be decommissioning the onsite recovery well culvert.

The goal in decommissioning the onsite monitoring wells recovery culvert is to remove them in a manner that ensures the abandoned borehole is sealed to a lesser permeability than the native soils surrounding the borehole.

RESULTS

We received two laboratory reports from SGS (Work Orders 1189757 and 1189758; Attachment C). Summary tables of soil and water analytical results are included at the end of this report in Tables 1 and 2, respectively. Analytical sample results above ADEC CULs are presented in Figure 2. We also completed ADEC laboratory data-review checklists (LDRC) presented in Attachment D.

We compared soil sample results to 18 AAC 75 *Table B1 Method Two – Soil Cleanup Levels* (Migration to Groundwater) and *Table B2 Method Two – Petroleum Hydrocarbon Cleanup Levels* (Under 40-inch Zone). We compared groundwater sample results to 18 AAC 75 *Table C – Groundwater Cleanup Levels*.

Soil Results

GRO and DRO exceeded the ADEC CULs in the upgradient soil boring location SB18-03 at a depth of 8.0-8.5 feet bgs. DRO exceeded the ADEC CUL in soil boring locations SB18-01 at 5.0-9.0 feet bgs, and SB18-02 at 8.0-8.6 feet bgs.

No additional analytes were detected in the current sampling event exceeding ADEC CULs.

Water Results

DRO exceeded the ADEC CUL in the temporary well point upgradient of the former UST (TWP10-03). DRO and naphthalene exceeded ADEC CULs in temporary well point TWP18-01.

No additional analytes were detected in the current sampling event exceeding ADEC CULs.

QUALITY ASSURANCE / QUALITY CONTROL

We reviewed analytical results provided by SGS for laboratory quality control (QC) samples and also conducted our own quality assurance (QA) assessment for this project. We reviewed chain-of-custody records and laboratory sample-receipt forms to document that we followed proper custody procedures, met sample-holding times, and kept samples properly chilled (between 0 degrees Celsius [°C] and 6°C) during shipping. Our QA review procedures allow us to document accuracy and precision of analytical data and document that the analyses were sufficiently sensitive to detect analytes at levels below regulatory levels.

For this report, we reviewed soil and water data reported in SGS work orders 1189757 and 1189758, respectively. Laboratory reports contain case narratives, sample-receipt forms, analytical results and a copy of the chain-of-custody form. We consider the results to be acceptable and representative for assessing site conditions at the time and location they were collected. Details regarding results of our QA analyses are presented in the LDRCs (Attachment D).

Our review of the data reveals that some analytical samples experienced method and data-quality failures (surrogate recovery, method blank detection, equipment blank detection, laboratory control sample percent recovery failures, etc.). None of the data-quality failures caused data to be considered unusable.

Four analytes were reported as non-detects but had laboratory reporting limits greater than ADEC CULs; we cannot determine whether these analytes are present in the samples at concentrations less than the reporting limits but greater than the regulatory levels. Analytical results considered affected by method and laboratory data-quality failures are flagged in Tables 1 and 2.

CONCLUSIONS AND RECOMMENDATIONS

DRO was detected at each soil boring location and two temporary well point locations exceeding ADEC CULS. Additionally, naphthalene was detected above the ADEC CUL from the temporary well point nearest the culvert.

The upgradient soil results near the property boundary contain DRO concentrations at levels greater than soil results closest to the former UST. Soil and water containing DRO appear restricted to a narrow zone about 5-9 feet bgs on the southern edge of the excavation and upgradient of the source.

Groundwater gradient is to the northwest regionally. The downgradient onsite monitoring wells have not resulted in detections greater than ADEC CULs. VOCs have not been detected in the cross-gradient private drinking water well at 1066 Eliz Road.

The removal of the remaining known extent of contamination would be impractical and would require the removal of a large amount of clean overburden. We request site closure with institutional controls at the former home-heating oil UST, with follow up sampling to occur in ten years or when the property is listed for sale, whichever comes first.

CLOSURE

This report was prepared for the exclusive use of Timothy Woster and his representatives, in accordance with our scope of services. This report should not be used for other purposes without Shannon & Wilson's review. The document "*Important Information about Your Environmental Site Assessment/Evaluation Report*" is presented in Attachment E to help you and others understand the use and limitations of this report. We relied on third party data in our review of site history and offer no assurance of its accuracy.

Our observations represent site conditions as they existed during our sampling activities. Our observations are specific to the locations and times noted herein and may not be applicable to all areas of the site. No number of samples, along with analytical testing, can precisely predict the characteristics, quality, or distribution of site conditions. Potential variations include, but are not limited to:

- The conditions between sampling points may be different.
- The passage of time or intervening causes (natural and manmade) may result in changes to site conditions.
- Contaminant concentrations may change in response to natural conditions, chemical reactions, and/or other events.
- The presence, distribution, and concentration of contaminants may vary from our sampling locations. Our tests may not represent the highest contaminant concentrations at the site.
- The report should not be used without our approval if any of the following occurs:
- Conditions change due to natural forces or human activity under, at, or adjacent to the site.
- Project details change, or new information becomes available such that our analyses, conclusion, and recommendations may be affected.

- If the site ownership or land use has changed.
- More than ten years has passed since the date of this summary letter report.
- Regulations, laws, or cleanup CULs has changed.

If any of these occur, we should be retained to review the applicability or our analyses, conclusions, and recommendations.

State and/or federal agencies may require reporting of the information included in this report. Shannon & Wilson does not assume the responsibility for reporting these findings and therefore has not, and will not, disclose the results of this study unless specifically requested and authorized by Timothy Woster, or as required by law. Regulatory agencies may reach different conclusions than Shannon & Wilson.

Sincerely,

SHANNON & WILSON, INC.

Notes:
ADEC Groundwater-Cleanup Levels from 18 AAC 75.345, Table C.
DUP Sample *TWP18-101* is a field-duplicate of sample *TWP18-01*
mg/L milligrams per liter
µg/L micrograms per liter
ADEC Alaska Department of Environmental Conservation
VOCs volatile organic compounds
PAHs polynuclear aromatic hydrocarbons
NA Not applicable; the ADEC Cleanup Level is not established for this analyte
< Analyte not detected; listed as less than the limit of detection (LOD) unless otherwise flagged due to quality-control failures.
— Analytical sample not collected; analyte not required.
J Estimated concentration, detected greater than the detection limit (DL) and less than the limit of quantitation (LOQ). Flag applied by the laboratory.
J* Estimated concentration due to quality control failures. Flag applied by Shannon & Wilson, Inc.
JL* Estimated concentration, biased low due to quality control failures. Flag applied by Shannon & Wilson, Inc.
JH* Estimated concentration, biased high due to quality control failures. Flag applied by Shannon & Wilson, Inc.
bold Reporting limit (LOD) exceeds regulatory limit.
BOLD Detected concentration exceeds regulatory limit.

FIELD FORMS

FIELD ACTIVITIES DAILY LOG

Date 9/16/2018
Sheet 1 of 1
Project No. 101607

Project Name: 1066 ELIZ
Field activity subject: Soil Borings & Temporary Well Point Sampling
Description of daily activities and events: 0615 - Calibrate YSI & PID
0640 - Depart office
0700 - Meet w/ drillers
0710 - Arrive on site
- Drill SB18-01
Set TWP-01
- Collect samples
- Drill SB18-02
Set TWP-02
- Collect samples
- Drill SB18-03
Set TWP-03
- Collect samples
- Remove MW-1 & MW-2
- Both 10' wells, fully removed.
- All holes filled w/ bentonite
- Purge water/Decon water run through GAC #1
- Soil containerized in buckets
1205 - Depart site
1225 - Arrive at office, unload truck, Finalize paperwork.

Visitors on site: —

Changes from plans/specifications and other special orders and important decisions:
—

Weather conditions: Cloudy, 40°F

Important telephone calls: —

Personnel on site: CAB, SXS
Signature: [signature]
Date: 9/16/2018

SGS LABORATORYDATA REPORTS WORK ORDERS (1189757 AND 1189758)

Laboratory Report of Analysis

To: Shannon & Wilson-Fairbanks
2355 Hill Rd
Fairbanks, AK 99707

Report Number: **1189757**

Client Project: **101607 1066 ELIZ**

Dear Sheila Hinckley,

Enclosed are the results of the analytical services performed under the referenced project for the received samples and associated QC as applicable. The samples are certified to meet the requirements of the National Environmental Laboratory Accreditation Conference Standards. Copies of this report and supporting data will be retained in our files for a period of ten years in the event they are required for future reference. All results are intended to be used in their entirety and SGS is not responsible for use of less than the complete report. Any samples submitted to our laboratory will be retained for a maximum of fourteen (14) days from the date of this report unless other archiving requirements were included in the quote.

If there are any questions about the report or services performed during this project, please call Jennifer at (907) 562-2343. We will be happy to answer any questions or concerns which you may have.

Thank you for using SGS North America Inc. for your analytical services. We look forward to working with you again on any additional analytical needs.

Sincerely,
SGS North America Inc.

Stephen C. Ede
Alaska Division Technical Director

Case Narrative

SGS Client: Shannon & Wilson-Fairbanks

SGS Project: 1189757

Project Name/Site: 101607 1066 ELIZ

Refer to sample receipt form for information on sample condition.

SB18-02-02 **1189757005 PS**
AK101 - Surrogate recovery for 4-bromofluorobenzene does not meet QC criteria. Sample was analyzed twice and results confirmed.

SB18-03-02 **1189757007 PS**
AK101 - Surrogate recovery for 4-bromofluorobenzene does not meet QC criteria due to matrix interference.
8260C - Surrogate recovery for 4-bromofluorobenzene does not meet QC criteria due to matrix interference.

Trip Blank **1189757008 TB**
SW8260C - There was insufficient sample volume to perform analysis.

* QC comments may be associated with the field samples found in this report. When applicable, comments will be applied to the associated field samples.

Report of Manual Integrations

Laboratory ID	Client Sample ID	Analytical Batch	Analyte	Reason
8270D SIM (PAH)				
1476238	1185180003MS	XMS11088	Benzo(a)Anthracene	RP

Manual Integration Reason Code Descriptions

Code	Description
O	Original Chromatogram
M	Modified Chromatogram
SS	Skimmed surrogate
BLG	Closed baseline gap
RP	Reassign peak name
PIR	Pattern integration required
IT	Included tail
SP	Split peak
RSP	Removed split peak
FPS	Forced peak start/stop
BLC	Baseline correction
PNF	Peak not found by software

All DRO/RRO analysis are integrated per SOP.

Print Date: 09/27/2018 4:09:06PM

Laboratory Qualifiers

Enclosed are the analytical results associated with the above work order. All results are intended to be used in their entirety and SGS is not responsible for use of less than the complete report. This document is issued by the Company under its General Conditions of Service accessible at <http://www.sgs.com/en/Terms-and-Conditions.aspx>. Attention is drawn to the limitation of liability, indenmification and jurisdiction issues defined therein.

Any holder of this document is advised that information contained hereon reflects the Company's findings at the time of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exonerate parties to a transaction from exercising all their rights and obligations under the transaction documents. Any unauthorized alteration, forgery or falsification of the context or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law.

SGS maintains a formal Quality Assurance/Quality Control (QA/QC) program. A copy of our Quality Assurance Plan (QAP), which outlines this program, is available at your request. The laboratory certification numbers are AK00971 (DW Chemistry & Microbiology) & 17-021 (CS) for ADEC and 2944.01 for DOD ELAP/ISO17025 (RCRA methods: 1020B, 1311, 3010A, 3050B, 3520C, 3550C, 5030B, 5035A, 6020A, 7470A, 7471B, 8015C, 8021B, 8082A, 8260C, 8270D, 8270D-SIM, 9040C, 9045D, 9056A, 9060A, AK101 and AK102/103). Except as specifically noted, all statements and data in this report are in conformance to the provisions set forth by the SGS QAP and, when applicable, other regulatory authorities.

The following descriptors or qualifiers may be found in your report:

*	The analyte has exceeded allowable regulatory or control limits.
!	Surrogate out of control limits.
B	Indicates the analyte is found in a blank associated with the sample.
CCV/CVA/CVB	Continuing Calibration Verification
CCCV/CVC/CVCA/CVCB	Closing Continuing Calibration Verification
CL	Control Limit
DF	Analytical Dilution Factor
DL	Detection Limit (i.e., maximum method detection limit)
E	The analyte result is above the calibrated range.
GT	Greater Than
IB	Instrument Blank
ICV	Initial Calibration Verification
J	The quantitation is an estimation.
LCS(D)	Laboratory Control Spike (Duplicate)
LLQC/LLIQC	Low Level Quantitation Check
LOD	Limit of Detection (i.e., 1/2 of the LOQ)
LOQ	Limit of Quantitation (i.e., reporting or practical quantitation limit)
LT	Less Than
MB	Method Blank
MS(D)	Matrix Spike (Duplicate)
ND	Indicates the analyte is not detected.
RPD	Relative Percent Difference
U	Indicates the analyte was analyzed for but not detected.

Note: Sample summaries which include a result for "Total Solids" have already been adjusted for moisture content. All DRO/RRO analyses are integrated per SOP.

FAIRBANKS SAMPLE RECEIPT FORM

Note: This form is to be completed by Fairbanks Receiving Staff for all samples

Review Criteria:	Condition:	Comments/Actions Taken
Were **custody seals** intact? Note # & location, if applicable. COC accompanied samples?	Yes No ~~N/A~~ Yes No N/A	□*Exemption permitted if sampler hand carries/delivers.*
Temperature blank compliant* (i.e., 0-6°C) *If >6°C, were samples collected <8 hours ago?* *If <0°C, were all sample containers ice free?* Cooler ID: 1 @ 3.5 w/Therm. ID: D40 Cooler ID: ____ @ ____ w/Therm. ID: ____ Cooler ID: ____ @ ____ w/Therm. ID: ____ Cooler ID: ____ @ ____ w/Therm. ID: ____ Cooler ID: ____ @ ____ w/Therm. ID: ____ If samples are received without a temperature blank, the "cooler temperature" will be documented in lieu of the temperature blank and "**COOLER TEMP**" will be noted to the right. In cases where neither a temp blank nor cooler temp can be obtained, note ambient ( ) or chilled ( ). Please check one.	Yes No Yes No ~~N/A~~ Yes No ~~N/A~~	□*Exemption permitted if chilled & collected <8hrs ago* ***Note: Identify containers received at non-compliant temperature. Use form FS-0029 if more space is needed.***
Delivery Method: ~~Client~~ (hand carried) Other: ____	Tracking/AB# : Or see attached ~~Or N/A~~	
→For samples received with payment, note amount ($) and whether cash / check / CC (**circle one**) was received.		
Were samples in **good condition** (no leaks/cracks/breakage)? Packing material used (specify all that apply): ~~Bubble Wrap~~ Separate plastic bags Vermiculite Other: ____	~~Yes~~ No N/A	***Note: some samples are sent to Anchorage without inspection by SGS Fairbanks personnel.***
Were **Trip Blanks** (i.e., VOAs, LL-Hg) in cooler with samples?	~~Yes~~ No N/A	
For **RUSH/SHORT Hold Time**, were COC/Bottles flagged accordingly? Was Rush/Short HT email sent, if applicable?	Yes No ~~N/A~~ Yes No ~~N/A~~	

Additional notes (if applicable):

Profile #: Need New

Note to Client: any "no" circled above indicates non-compliance with standard procedures and may impact data quality.

e-Sample Receipt Form

SGS Workorder #: **1189757**

Review Criteria	Condition (Yes, No, N/A)	Exceptions Noted below
Chain of Custody / Temperature Requirements		N/A Exemption permitted if sampler hand carries/delivers.
Were Custody Seals intact? Note # & location	YES	1F 1B
COC accompanied samples?	YES	
N/A **Exemption permitted if chilled & collected <8 hours ago, or for samples where chilling is not required		
Temperature blank compliant* (i.e., 0-6 °C after CF)?	YES	Cooler ID: 1 @ 1.2 °C Therm. ID: D36
	N/A	Cooler ID: @ °C Therm. ID:
	N/A	Cooler ID: @ °C Therm. ID:
	N/A	Cooler ID: @ °C Therm. ID:
	N/A	Cooler ID: @ °C Therm. ID:
If >6°C, were samples collected <8 hours ago?	N/A	
If <0°C, were sample containers ice free?	N/A	
If samples received without a temperature blank, the "cooler temperature" will be documented in lieu of the temperature blank & "**COOLER TEMP**" will be noted to the right. In cases where neither a temp blank nor cooler temp can be obtained, note "ambient" or "chilled".		
Note: Identify containers received at non-compliant temperature . Use form FS-0029 if more space is needed.		
Holding Time / Documentation / Sample Condition Requirements		Note: Refer to form F-083 "Sample Guide" for specific holding times.
Were samples received within holding time?	YES	
Do samples **match COC**** (i.e.,sample IDs,dates/times collected)?	YES	
**Note: If times differ <1hr, record details & login per COC.		
Were analyses requested unambiguous? (i.e., method is specified for analyses with >1 option for analysis)	YES	
		N/A ***Exemption permitted for metals (e.g,200.8/6020A).
Were proper containers (type/mass/volume/preservative***)used?	YES	
Volatile / LL-Hg Requirements		
Were Trip Blanks (i.e., VOAs, LL-Hg) in cooler with samples?	YES	
Were all water VOA vials free of headspace (i.e., bubbles ≤ 6mm)?	N/A	
Were all soil VOAs field extracted with MeOH+BFB?	YES	

Note to Client: Any "No", answer above indicates non-compliance with standard procedures and may impact data quality.

Additional notes (if applicable):

Container Condition Glossary

Containers for bacteriological, low level mercury and VOA vials are not opened prior to analysis and will be assigned condition code OK unless evidence indicates than an inappropriate container was submitted.

OK - The container was received at an acceptable pH for the analysis requested.
BU - The container was received with headspace greater than 6mm.
DM - The container was received damaged.
FR - The container was received frozen and not usable for Bacteria or BOD analyses.
IC - The container provided for microbiology analysis was not a laboratory-supplied, pre-sterilized container and therefore was not suitable for analysis.
PA - The container was received outside of the acceptable pH for the analysis requested. Preservative was added upon receipt and the container is now at the correct pH. See the Sample Receipt Form for details on the amount and lot # of the preservative added.
PH - The container was received outside of the acceptable pH for the analysis requested. Preservative was added upon receipt, but was insufficient to bring the container to the correct pH for the analysis requested. See the Sample Receipt Form for details on the amount and lot # of the preservative added.

Laboratory Report of Analysis

To: Shannon & Wilson-Fairbanks
2355 Hill Rd
Fairbanks, AK 99707

Report Number: **1189758**

Client Project: **101607 1066 ELIZ**

Dear Sheila Hinckley,

Enclosed are the results of the analytical services performed under the referenced project for the received samples and associated QC as applicable. The samples are certified to meet the requirements of the National Environmental Laboratory Accreditation Conference Standards. Copies of this report and supporting data will be retained in our files for a period of ten years in the event they are required for future reference. All results are intended to be used in their entirety and SGS is not responsible for use of less than the complete report. Any samples submitted to our laboratory will be retained for a maximum of fourteen (14) days from the date of this report unless other archiving requirements were included in the quote.

If there are any questions about the report or services performed during this project, please call Jennifer at (907) 562-2343. We will be happy to answer any questions or concerns which you may have.

Thank you for using SGS North America Inc. for your analytical services. We look forward to working with you again on any additional analytical needs.

Sincerely,
SGS North America Inc.

_____

Case Narrative

SGS Client: **Shannon & Wilson-Fairbanks**
SGS Project: **1189758**
Project Name/Site: **101607 1066 ELIZ**
Project Contact: **Sheila Hinckley**

Refer to sample receipt form for information on sample condition.

TWP18-01 (1189758001) PS

8270D SIM - PAH surrogate recovery for 2-Methylnaphthalene-d10 and Fluoranthene-d10 do not meet QC criteria due to matrix interference.

TWP18-101 (1189758002) PS

AK101 - Surrogate recovery for 4-bromofluorobenzene does not meet QC criteria due to matrix interference.

*QC comments may be associated with the field samples found in this report. When applicable, comments will be applied to associated field samples.

Laboratory Qualifiers

Enclosed are the analytical results associated with the above work order. All results are intended to be used in their entirety and SGS is not responsible for use of less than the complete report. This document is issued by the Company under its General Conditions of Service accessible at <http://www.sgs.com/en/Terms-and-Conditions.aspx>. Attention is drawn to the limitation of liability, indenmification and jurisdiction issues defined therein.

Any holder of this document is advised that information contained hereon reflects the Company's findings at the time of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exonerate parties to a transaction from exercising all their rights and obligations under the transaction documents. Any unauthorized alteration, forgery or falsification of the context or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law.

SGS maintains a formal Quality Assurance/Quality Control (QA/QC) program. A copy of our Quality Assurance Plan (QAP), which outlines this program, is available at your request. The laboratory certification numbers are AK00971 (DW Chemistry & Microbiology) & 17-021 (CS) for ADEC and 2944.01 for DOD ELAP/ISO17025 (RCRA methods: 1020B, 1311, 3010A, 3050B, 3520C, 3550C, 5030B, 5035A, 6020A, 7470A, 7471B, 8015C, 8021B, 8082A, 8260C, 8270D, 8270D-SIM, 9040C, 9045D, 9056A, 9060A, AK101 and AK102/103). Except as specifically noted, all statements and data in this report are in conformance to the provisions set forth by the SGS QAP and, when applicable, other regulatory authorities.

The following descriptors or qualifiers may be found in your report:

*	The analyte has exceeded allowable regulatory or control limits.
!	Surrogate out of control limits.
B	Indicates the analyte is found in a blank associated with the sample.
CCV/CVA/CVB	Continuing Calibration Verification
CCCV/CVC/CVCA/CVCB	Closing Continuing Calibration Verification
CL	Control Limit
DF	Analytical Dilution Factor
DL	Detection Limit (i.e., maximum method detection limit)
E	The analyte result is above the calibrated range.
GT	Greater Than
IB	Instrument Blank
ICV	Initial Calibration Verification
J	The quantitation is an estimation.
LCS(D)	Laboratory Control Spike (Duplicate)
LLQC/LLIQC	Low Level Quantitation Check
LOD	Limit of Detection (i.e., 1/2 of the LOQ)
LOQ	Limit of Quantitation (i.e., reporting or practical quantitation limit)
LT	Less Than
MB	Method Blank
MS(D)	Matrix Spike (Duplicate)
ND	Indicates the analyte is not detected.
RPD	Relative Percent Difference
U	Indicates the analyte was analyzed for but not detected.

Note: Sample summaries which include a result for "Total Solids" have already been adjusted for moisture content. All DRO/RRO analyses are integrated per SOP.

FAIRBANKS SAMPLE RECEIPT FORM

Note: This form is to be completed by Fairbanks Receiving Staff for all samples

Review Criteria:	Condition:	Comments/Actions Taken
Were **custody seals** intact? Note # & location, if applicable. COC accompanied samples?	Yes No ~~N/A~~ ~~Yes~~ No N/A	□*Exemption permitted if sampler hand carries/delivers.*
Temperature blank compliant* (i.e., 0-6°C) *If >6°C, were samples collected <8 hours ago?* *If <0°C, were all sample containers ice free?* Cooler ID: 1 @ 3.5 w/Therm. ID: D40 Cooler ID: ____ @ ____ w/Therm. ID: ____ Cooler ID: ____ @ ____ w/Therm. ID: ____ Cooler ID: ____ @ ____ w/Therm. ID: ____ Cooler ID: ____ @ ____ w/Therm. ID: ____ If samples are received without a temperature blank, the "cooler temperature" will be documented in lieu of the temperature blank and "**COOLER TEMP**" will be noted to the right. In cases where neither a temp blank nor cooler temp can be obtained, note ambient ( ) or chilled ( ). Please check one.	~~Yes~~ No Yes No ~~N/A~~ Yes No ~~N/A~~	□*Exemption permitted if chilled & collected <8hrs ago* ***Note: Identify containers received at non-compliant temperature. Use form FS-0029 if more space is needed.***
Delivery Method: ~~Client~~ (hand carried) Other: ____	Tracking/AB# : Or see attached ~~Or N/A~~	
→For samples received with payment, note amount ($) and whether cash / check / CC (**circle one**) was received.		
Were samples in **good condition** (no leaks/cracks/breakage)? Packing material used (specify all that apply): ~~Bubble Wrap~~ Separate plastic bags Vermiculite Other: ____	~~Yes~~ No N/A	***Note: some samples are sent to Anchorage without inspection by SGS Fairbanks personnel.***
Were **Trip Blanks** (i.e., VOAs, LL-Hg) in cooler with samples?	~~Yes~~ No N/A	
For **RUSH/SHORT Hold Time**, were COC/Bottles flagged accordingly? Was Rush/Short HT email sent, if applicable?	Yes No ~~N/A~~ Yes No ~~N/A~~	

Additional notes (if applicable):

Profile #: Need WO

Note to Client: any "no" circled above indicates non-compliance with standard procedures and may impact data quality.

e-Sample Receipt Form

SGS Workorder #: **1189758**

Review Criteria	Condition (Yes, No, N/A)	Exceptions Noted below
Chain of Custody / Temperature Requirements		N/A Exemption permitted if sampler hand carries/delivers.
Were Custody Seals intact? Note # & location	YES	1F 1B
COC accompanied samples?	YES	
N/A **Exemption permitted if chilled & collected <8 hours ago, or for samples where chilling is not required		
Temperature blank compliant* (i.e., 0-6 °C after CF)?	YES	Cooler ID: 1 @ 1.2 °C Therm. ID: D36
	N/A	Cooler ID: @ °C Therm. ID:
	N/A	Cooler ID: @ °C Therm. ID:
	N/A	Cooler ID: @ °C Therm. ID:
	N/A	Cooler ID: @ °C Therm. ID:
If >6°C, were samples collected <8 hours ago?	N/A	
If <0°C, were sample containers ice free?	N/A	
If samples received without a temperature blank, the "cooler temperature" will be documented in lieu of the temperature blank & "**COOLER TEMP**" will be noted to the right. In cases where neither a temp blank nor cooler temp can be obtained, note "ambient" or "chilled".		
Note: Identify containers received at non-compliant temperature . Use form FS-0029 if more space is needed.		
Holding Time / Documentation / Sample Condition Requirements		Note: Refer to form F-083 "Sample Guide" for specific holding times.
Were samples received within holding time?	YES	
Do samples **match COC**** (i.e.,sample IDs,dates/times collected)?	YES	
**Note: If times differ <1hr, record details & login per COC.		
Were analyses requested unambiguous? (i.e., method is specified for analyses with >1 option for analysis)	YES	
		N/A ***Exemption permitted for metals (e.g,200.8/6020A).
Were proper containers (type/mass/volume/preservative***)used?	YES	
Volatile / LL-Hg Requirements		
Were Trip Blanks (i.e., VOAs, LL-Hg) in cooler with samples?	YES	
Were all water VOA vials free of headspace (i.e., bubbles ≤ 6mm)?	YES	
Were all soil VOAs field extracted with MeOH+BFB?	N/A	

Note to Client: Any "No", answer above indicates non-compliance with standard procedures and may impact data quality.

Container Condition Glossary

Containers for bacteriological, low level mercury and VOA vials are not opened prior to analysis and will be assigned condition code OK unless evidence indicates than an inappropriate container was submitted.

OK - The container was received at an acceptable pH for the analysis requested.
BU - The container was received with headspace greater than 6mm.
DM - The container was received damaged.
FR - The container was received frozen and not usable for Bacteria or BOD analyses.
IC - The container provided for microbiology analysis was not a laboratory-supplied, pre-sterilized container and therefore was not suitable for analysis.
PA - The container was received outside of the acceptable pH for the analysis requested. Preservative was added upon receipt and the container is now at the correct pH. See the Sample Receipt Form for details on the amount and lot # of the preservative added.
PH - The container was received outside of the acceptable pH for the analysis requested. Preservative was added upon receipt, but was insufficient to bring the container to the correct pH for the analysis requested. See the Sample Receipt Form for details on the amount and lot # of the preservative added.

Consultant Firm:

Shannon & Wilson, Inc.

Laboratory Name:

SGS North America, Inc.

Laboratory Report Number:

1189757

ADEC File Number:

100.38.215

Hazard Identification Number:

4438

1189757

1. Laboratory

   a. Did an ADEC CS approved laboratory receive and perform all of the submitted sample analyses?

   ☑ Yes ☐ No Comments:

   b. If the samples were transferred to another "network" laboratory or sub-contracted to an alternate laboratory, was the laboratory performing the analyses ADEC CS approved?

   ☐ Yes ☑ No Comments:

   N/A; the samples were not transferred to another laboratory. Analysis was performed by SGS North America, Inc. in Anchorage, Alaska.

2. Chain of Custody (CoC)

   a. CoC information completed, signed, and dated (including released/received by)?

   ☑ Yes ☐ No Comments:

   b. Correct Analyses requested?

   ☑ Yes ☐ No Comments:

3. Laboratory Sample Receipt Documentation

   a. Sample/cooler temperature documented and within range at receipt (0° to 6° C)?

   ☑ Yes ☐ No Comments:

   The sample receipt forms note the cooler temperature to be within temperature range.

   b. Sample preservation acceptable – acidified waters, Methanol preserved VOC soil (GRO, BTEX, Volatile Chlorinated Solvents, etc.)?

   ☑ Yes ☐ No Comments:

   c. Sample condition documented – broken, leaking (Methanol), zero headspace (VOC vials)?

   ☑ Yes ☐ No Comments:

   The sample receipt form notes that the samples were received in good condition.

d. If there were any discrepancies, were they documented? For example, incorrect sample containers/preservation, sample temperature outside of acceptable range, insufficient or missing samples, etc.?

☐ Yes ☒ No Comments:

There were no discrepancies identified by the laboratory.

e. Data quality or usability affected?

Comments:

There was no effect on data quality or usability.

4. Case Narrative

a. Present and understandable?

☒ Yes ☐ No Comments:

b. Discrepancies, errors, or QC failures identified by the lab?

☒ Yes ☐ No Comments:

The case narrative notes that the AK101 surrogate recovery for 4-bromofluorobenzene in sample *SB18-02-02* did not meet QC criteria. The sample was analyzed twice and results were confirmed

The case narrative notes that AK101 and 8260C surrogate recovery for 4-bromofluorobenzene in sample *SB18-03-02* did not meet QC criteria due to matrix interference.

The case narrative notes that the SW8260C trip blank contained insufficient sample volume to perform analysis.

c. Were all corrective actions documented?

☐ Yes ☒ No Comments:

The laboratory does not note any corrective actions.

d. What is the effect on data quality/usability according to the case narrative?

Comments:

The laboratory does not note any effect on data quality or usability.

5. Samples Results

a. Correct analyses performed/reported as requested on COC?

☒ Yes ☐ No Comments:

b. All applicable holding times met?

☑ Yes ☐ No Comments:

c. All soils reported on a dry weight basis?

☑ Yes ☐ No Comments:

d. Are the reported LOQs less than the Cleanup Level or the minimum required detection level for the project?

☑ Yes ☐ No Comments:

Reporting limits were below ADEC cleanup levels for the requested analytes, for non-detect results, with the following exceptions. VOC analytes bromodichloromethane, dibromochloromethane, vinyl chloride, 1.2-dibromoethane, 1,2-dichloroethane 1,2,3-trichloropropane and 1,2-dibromo-3-chloropropane were not detected in the project sample and have reporting limits greater than ADEC cleanup levels. We cannot assess if the analytes are present in the sample at a concentration greater than the cleanup level but less than the reporting limit.

e. Data quality or usability affected?

☑ Yes ☐ No Comments:

We cannot assess if the analytes noted above are present in the sample at a concentration greater than the cleanup level but less than the reporting limit.

6. QC Samples

a. Method Blank

i. One method blank reported per matrix, analysis and 20 samples?

☑ Yes ☐ No Comments:

ii. All method blank results less than limit of quantitation (LOQ)?

☑ Yes ☐ No Comments:

GRO were detected at estimated concentrations below the LOQ in blanks 1476742 and 1477270.

iii. If above LOQ, what samples are affected?

Comments:

The associated project samples either had detections for GRO that were greater than ten times the method blank detection or did not have detections for this analyte.

iv. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?

☐ Yes ☒ No Comments:

The associated project samples either had detections for GRO that were greater than ten times the method blank detection or did not have detections for this analyte.

v. Data quality or usability affected?

Comments:

No; see above.

b. Laboratory Control Sample/Duplicate (LCS/LCSD)

i. Organics – One LCS/LCSD reported per matrix, analysis and 20 samples? (LCS/LCSD required per AK methods, LCS required per SW846)

☒ Yes ☐ No Comments:

LCS/LCSD samples were reported for GRO and DRO analyses.

LCS/LCSD and MS/MSD samples were reported for VOC, BTEX, and PAH analytes.

ii. Metals/Inorganics – one LCS and one sample duplicate reported per matrix, analysis and 20 samples?

☐ Yes ☒ No Comments:

Only organic analyses were requested for this work order.

iii. Accuracy – All percent recoveries (%R) reported and within method or laboratory limits? And project specified DQOs, if applicable. (AK Petroleum methods: AK101 60%-120%, AK102 75%-125%, AK103 60%-120%; all other analyses see the laboratory QC pages)

☐ Yes ☒ No Comments:

The MS 1477561 and/or MSD 1477561 had high recovery failures for failures for hexachlorobutadiene and trichlorofluoromethane.

The MS 1478458 and/or MSD 1478459 had low recovery failures for o-xylene, p&m-xylenes, and total xylenes.

iv. Precision – All relative percent differences (RPD) reported and less than method or laboratory limits? And project specified DQOs, if applicable. RPD reported from LCS/LCSD, MS/MSD, and or sample/sample duplicate. (AK Petroleum methods 20%; all other analyses see the laboratory QC pages)

☒ Yes ☐ No Comments:

v. If %R or RPD is outside of acceptable limits, what samples are affected?

Comments:

The parent samples associated with the MS and MSD recovery failures are affected. However, the parent samples are not a part of the project sample set; the project samples are not affected by these QC failures.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?

☐ Yes ☒ No Comments:

See above.

vii. Data quality or usability affected? (Use comment box to explain.)

Comments:

No; see above.

c. Surrogates – Organics Only

i. Are surrogate recoveries reported for organic analyses – field, QC and laboratory samples?

☒ Yes ☐ No Comments:

ii. Accuracy – All percent recoveries (%R) reported and within method or laboratory limits? And project specified DQOs, if applicable. (AK Petroleum methods 50-150 %R; all other analyses see the laboratory report pages)

☐ Yes ☒ No Comments:

The GRO surrogate 4-bromofluorobenzene had high recoveries for samples *SB18-02-02* and *SB18-03-02*.

The VOC surrogate 4-bromofluorobenzene had a high recovery for sample *SB18-02-02*.

iii. Do the sample results with failed surrogate recoveries have data flags? If so, are the data flags clearly defined?

☒ Yes ☐ No Comments:

The detected GRO results for samples *SB18-02-02* and *SB18-03-02* are considered estimated, biased high, and are flagged 'JH*' in the analytical tables.

The requested BTEX analytes for sample *SB18-02-02* are not associated with the VOC surrogate 4-bromofluorobenzene. The reported results are not affected by the QC failure.

iv. Data quality or usability affected?

Comments:

Yes; see above.

d. Trip blank – Volatile analyses only (GRO, BTEX, Volatile Chlorinated Solvents, etc.): Water and Soil

i. One trip blank reported per matrix, analysis and for each cooler containing volatile samples?
(If not, enter explanation below.)

☑ Yes ☐ No Comments:

ii. Is the cooler used to transport the trip blank and VOA samples clearly indicated on the COC? (If not, a comment explaining why must be entered below)

☑ Yes ☐ No Comments:

iii. All results less than LOQ?

☑ Yes ☐ No Comments:

iv. If above LOQ, what samples are affected?

Comments:

v. Data quality or usability affected?

Comments:

Data quality or usability was not affected; see above.

e. Field Duplicate

i. One field duplicate submitted per matrix, analysis and 10 project samples?

☑ Yes ☐ No Comments:

ii. Submitted blind to lab?

☑ Yes ☐ No Comments:

Field-duplicate sample pair *SB18-01-02* / *SB18-101-02* was submitted with this work order.

iii. Precision – All relative percent differences (RPD) less than specified DQOs? (Recommended: 30% water, 50% soil)

RPD (%) = Absolute value of: $\frac{(R_1-R_2)}{((R_1+R_2)/2)} \times 100$

Where R_1 = Sample Concentration
R_2 = Field Duplicate Concentration

☑ Yes ☐ No Comments:

iv. Data quality or usability affected? (Use the comment box to explain why or why not.)

Comments:

The data quality and/or usability was not affected; see above.

f. Decontamination or Equipment Blank (If not applicable, a comment stating why must be entered below).

☐ Yes ☐ No ☑ Not Applicable

Samples for this project are not collected with reusable equipment, so the prospect of foreign contaminants being introduced through equipment contamination is not plausible.

i. All results less than LOQ?

☐ Yes ☐ No Comments:

N/A; an equipment blank was not submitted with this work order.

ii. If above LOQ, what samples are affected?

Comments:

N/A; an equipment blank was not submitted with this work order.

iii. Data quality or usability affected?

Comments:

The data quality and usability were not affected; see above.

7. Other Data Flags/Qualifiers (ACOE, AFCEE, Lab Specific, etc.)

a. Defined and appropriate?

☐ Yes ☑ No Comments:

There were no other data flags/qualifiers.

1189758

1. Laboratory

   a. Did an ADEC CS approved laboratory receive and perform all of the submitted sample analyses?

   ☑ Yes ☐ No Comments:

   b. If the samples were transferred to another "network" laboratory or sub-contracted to an alternate laboratory, was the laboratory performing the analyses ADEC CS approved?

   ☐ Yes ☑ No Comments:

   N/A; the samples were not transferred to another laboratory. Analysis was performed by SGS North America, Inc. in Anchorage, Alaska.

2. Chain of Custody (CoC)

   a. CoC information completed, signed, and dated (including released/received by)?

   ☑ Yes ☐ No Comments:

   b. Correct Analyses requested?

   ☑ Yes ☐ No Comments:

3. Laboratory Sample Receipt Documentation

   a. Sample/cooler temperature documented and within range at receipt (0° to 6° C)?

   ☑ Yes ☐ No Comments:

   b. Sample preservation acceptable – acidified waters, Methanol preserved VOC soil (GRO, BTEX, Volatile Chlorinated Solvents, etc.)?

   ☑ Yes ☐ No Comments:

   c. Sample condition documented – broken, leaking (Methanol), zero headspace (VOC vials)?

   ☑ Yes ☐ No Comments:

   The sample receipt form notes that the samples were received in good condition.

d. If there were any discrepancies, were they documented? For example, incorrect sample containers/preservation, sample temperature outside of acceptable range, insufficient or missing samples, etc.?

☐ Yes ☒ No Comments:

There were no discrepancies identified by the laboratory.

e. Data quality or usability affected?

Comments:

There was no effect on data quality or usability.

4. Case Narrative

a. Present and understandable?

☒ Yes ☐ No Comments:

b. Discrepancies, errors, or QC failures identified by the lab?

☒ Yes ☐ No Comments:

The project sample *TWP18-01* had PAH surrogate recovery failures for 2-methylnaphthalene-d10 and fluoranthene-d10 due to matrix interference.

The project sample *TWP18-101* had a GRO surrogate recovery failure for 4- bromofluorobenzene due to matrix interference.

c. Were all corrective actions documented?

☐ Yes ☒ No Comments:

The laboratory does not note any corrective actions.

d. What is the effect on data quality/usability according to the case narrative?

Comments:

The laboratory does not note any effect on data quality or usability.

5. Samples Results

a. Correct analyses performed/reported as requested on COC?

☒ Yes ☐ No Comments:

b. All applicable holding times met?

☑ Yes ☐ No Comments:

c. All soils reported on a dry weight basis?

☐ Yes ☑ No Comments:

N/A; soil samples were not submitted for this work order.

d. Are the reported LOQs less than the Cleanup Level or the minimum required detection level for the project?

☑ Yes ☐ No Comments:

Reporting limits were below ADEC cleanup levels for the requested analytes, for non-detect results, with the following exceptions. VOC analyte 1,2,3-trichloropropane was not detected in the project sample *TWP18-01* but has a reporting limit greater than ADEC cleanup levels. We cannot assess if the analytes are present in the sample at a concentration greater than the cleanup level but less than the reporting limit.

e. Data quality or usability affected?

☑ Yes ☐ No Comments:

We cannot assess if the VOC analyte 1,2,3-trichloropropane is present in the sample *TWP18-01* at a concentration greater than the cleanup level but less than the reporting limit.

6. QC Samples

a. Method Blank

i. One method blank reported per matrix, analysis and 20 samples?

☑ Yes ☐ No Comments:

ii. All method blank results less than limit of quantitation (LOQ)?

☑ Yes ☐ No Comments:

iii. If above LOQ, what samples are affected?

Comments:

None; project analytes were not detected in the method blank samples.

iv. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?

☐ Yes ☑ No Comments:

N/A; no samples are affected.

v. Data quality or usability affected?

Comments:

No; see above.

b. Laboratory Control Sample/Duplicate (LCS/LCSD)

i. Organics – One LCS/LCSD reported per matrix, analysis and 20 samples? (LCS/LCSD required per AK methods, LCS required per SW846)

☒ Yes ☐ No Comments:

LCS/LCSD samples were reported for GRO, DRO, and PAH analyses.

LCS/LCSD and MS/MSD samples were reported for VOC analysis.

ii. Metals/Inorganics – one LCS and one sample duplicate reported per matrix, analysis and 20 samples?

☐ Yes ☒ No Comments:

Only organic analyses were the only requested analyses for this work order.

iii. Accuracy – All percent recoveries (%R) reported and within method or laboratory limits? And project specified DQOs, if applicable. (AK Petroleum methods: AK101 60%-120%, AK102 75%-125%, AK103 60%-120%; all other analyses see the laboratory QC pages)

☒ Yes ☐ No Comments:

iv. Precision – All relative percent differences (RPD) reported and less than method or laboratory limits? And project specified DQOs, if applicable. RPD reported from LCS/LCSD, MS/MSD, and or sample/sample duplicate. (AK Petroleum methods 20%; all other analyses see the laboratory QC pages)

☒ Yes ☐ No Comments:

v. If %R or RPD is outside of acceptable limits, what samples are affected?

Comments:

None; analytical accuracy and precision were within laboratory acceptance criteria.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?

☐ Yes ☒ No Comments:

Qualification of the data was not required; see above.

vii. Data quality or usability affected? (Use comment box to explain.)

Comments:

Data quality and/or usability was not affected; see above.

c. Surrogates – Organics Only

i. Are surrogate recoveries reported for organic analyses – field, QC and laboratory samples?

☒ Yes ☐ No Comments:

ii. Accuracy – All percent recoveries (%R) reported and within method or laboratory limits? And project specified DQOs, if applicable. (AK Petroleum methods 50-150 %R; all other analyses see the laboratory report pages)

☐ Yes ☒ No Comments:

The project sample *TWP18-01* had PAH surrogate recovery failures for 2-methylnaphthalene-d10 and fluoranthene-d10 due to matrix interference.

The project sample *TWP18-101* had a GRO surrogate recovery failure for 4- bromofluorobenzene due to matrix interference.

iii. Do the sample results with failed surrogate recoveries have data flags? If so, are the data flags clearly defined?

☒ Yes ☐ No Comments:

The GRO result for project sample *TWP18-101* is considered estimated, biased high, and is flagged 'JH*' in the analytical table.

The PAH results for project sample *TWP18-01* are considered estimated, biased low. Detected results are flagged 'JL*' and non-detect results are flagged 'J*' in the analytical tables.

iv. Data quality or usability affected?

Comments:

Yes; see above.

d. Trip blank – Volatile analyses only (GRO, BTEX, Volatile Chlorinated Solvents, etc.): Water and Soil

i. One trip blank reported per matrix, analysis and for each cooler containing volatile samples?
(If not, enter explanation below.)

☒ Yes ☐ No Comments:

ii. Is the cooler used to transport the trip blank and VOA samples clearly indicated on the COC? (If not, a comment explaining why must be entered below)

☑ Yes ☐ No Comments:

iii. All results less than LOQ?

☑ Yes ☐ No Comments:

Project analytes were not detected in the trip blank sample.

iv. If above LOQ, what samples are affected?

Comments:

N/A; project analytes were not detected in the trip blank sample.

v. Data quality or usability affected?

Comments:

No; see above.

e. Field Duplicate

i. One field duplicate submitted per matrix, analysis and 10 project samples?

☑ Yes ☐ No Comments:

ii. Submitted blind to lab?

☑ Yes ☐ No Comments:

Field-duplicate sample pair *TWP18-01* / *TWP18-101* was submitted with this work order.

iii. Precision – All relative percent differences (RPD) less than specified DQOs? (Recommended: 30% water, 50% soil)

RPD (%) = Absolute value of: $\frac{(R_1-R_2)}{((R_1+R_2)/2)} \times 100$

Where R_1 = Sample Concentration
R_2 = Field Duplicate Concentration

☑ Yes ☐ No Comments:

Field-duplicate RPDs were within the recommended DQO of 30% for water samples, where calculable.

iv. Data quality or usability affected? (Use the comment box to explain why or why not.)

Comments:

The data quality and usability was not affected; see above.

f. Decontamination or Equipment Blank (If not applicable, a comment stating why must be entered below).

☐ Yes ☐ No ☒ Not Applicable

Samples for this project are not collected with reusable equipment, so the prospect of foreign contaminants being introduced through equipment contamination is not plausible.

i. All results less than LOQ?

☐ Yes ☐ No Comments:

N/A; an equipment blank was not submitted with this work order.

ii. If above LOQ, what samples are affected?

Comments:

N/A; an equipment blank was not submitted with this work order.

iii. Data quality or usability affected?

Comments:

The data quality and usability were not affected; see above.

7. Other Data Flags/Qualifiers (ACOE, AFCEE, Lab Specific, etc.)

a. Defined and appropriate?

☐ Yes ☒ No Comments:

There were no other data flags/qualifiers.

ATTACHMENT E

IMPORTANT INFORMATION ABOUT YOUR GEOTECHNICAL/ENVIRONMENTAL REPORT

SHANNON & WILSON, INC.
Geotechnical and Environmental Consultants

Attachment to and part of Report 101607-005

Date: November 29, 2018

To: Mr. Timothy Woster
1066 Eliz Road, North Pole, AK. 99705

IMPORTANT INFORMATION ABOUT YOUR GEOTECHNICAL/ENVIRONMENTAL REPORT

CONSULTING SERVICES ARE PERFORMED FOR SPECIFIC PURPOSES AND FOR SPECIFIC CLIENTS.

Consultants prepare reports to meet the specific needs of specific individuals. A report prepared for a civil engineer may not be adequate for a construction contractor or even another civil engineer. Unless indicated otherwise, your consultant prepared your report expressly for you and expressly for the purposes you indicated. No one other than you should apply this report for its intended purpose without first conferring with the consultant. No party should apply this report for any purpose other than that originally contemplated without first conferring with the consultant.

THE CONSULTANT'S REPORT IS BASED ON PROJECT-SPECIFIC FACTORS.

A geotechnical/environmental report is based on a subsurface exploration plan designed to consider a unique set of project-specific factors. Depending on the project, these may include: the general nature of the structure and property involved; its size and configuration; its historical use and practice; the location of the structure on the site and its orientation; other improvements such as access roads, parking lots, and underground utilities; and the additional risk created by scope-of-service limitations imposed by the client. To help avoid costly problems, ask the consultant to evaluate how any factors that change subsequent to the date of the report may affect the recommendations. Unless your consultant indicates otherwise, your report should not be used: (1) when the nature of the proposed project is changed (for example, if an office building will be erected instead of a parking garage, or if a refrigerated warehouse will be built instead of an unrefrigerated one, or chemicals are discovered on or near the site); (2) when the size, elevation, or configuration of the proposed project is altered; (3) when the location or orientation of the proposed project is modified; (4) when there is a change of ownership; or (5) for application to an adjacent site. Consultants cannot accept responsibility for problems that may occur if they are not consulted after factors which were considered in the development of the report have changed.

SUBSURFACE CONDITIONS CAN CHANGE.

Subsurface conditions may be affected as a result of natural processes or human activity. Because a geotechnical/environmental report is based on conditions that existed at the time of subsurface exploration, construction decisions should not be based on a report whose adequacy may have been affected by time. Ask the consultant to advise if additional tests are desirable before construction starts; for example, groundwater conditions commonly vary seasonally.

Construction operations at or adjacent to the site and natural events such as floods, earthquakes, or groundwater fluctuations may also affect subsurface conditions and, thus, the continuing adequacy of a geotechnical/environmental report. The consultant should be kept apprised of any such events, and should be consulted to determine if additional tests are necessary.

MOST RECOMMENDATIONS ARE PROFESSIONAL JUDGMENTS.

Site exploration and testing identifies actual surface and subsurface conditions only at those points where samples are taken. The data were extrapolated by your consultant, who then applied judgment to render an opinion about overall subsurface conditions. The actual interface between materials may be far more gradual or abrupt than your report indicates. Actual conditions in areas not sampled may differ from those predicted in your report. While nothing can be done to prevent such situations, you and your consultant can work together to help reduce their impacts. Retaining your consultant to observe subsurface construction operations can be particularly beneficial in this respect.

A REPORT'S CONCLUSIONS ARE PRELIMINARY.

The conclusions contained in your consultant's report are preliminary because they must be based on the assumption that conditions revealed through selective exploratory sampling are indicative of actual conditions throughout a site. Actual subsurface conditions can be discerned only during earthwork; therefore, you should retain your consultant to observe actual conditions and to provide conclusions. Only the consultant who prepared the report is fully familiar with the background information needed to determine whether or not the report's recommendations based on those conclusions are valid and whether or not the contractor is abiding by applicable recommendations. The consultant who developed your report cannot assume responsibility or liability for the adequacy of the report's recommendations if another party is retained to observe construction.

THE CONSULTANT'S REPORT IS SUBJECT TO MISINTERPRETATION.

Costly problems can occur when other design professionals develop their plans based on misinterpretation of a geotechnical/environmental report. To help avoid these problems, the consultant should be retained to work with other project design professionals to explain relevant geotechnical, geological, hydrogeological, and environmental findings, and to review the adequacy of their plans and specifications relative to these issues.

BORING LOGS AND/OR MONITORING WELL DATA SHOULD NOT BE SEPARATED FROM THE REPORT.

Final boring logs developed by the consultant are based upon interpretation of field logs (assembled by site personnel), field test results, and laboratory and/or office evaluation of field samples and data. Only final boring logs and data are customarily included in geotechnical/environmental reports. These final logs should not, under any circumstances, be redrawn for inclusion in architectural or other design drawings, because drafters may commit errors or omissions in the transfer process.

To reduce the likelihood of boring log or monitoring well misinterpretation, contractors should be given ready access to the complete geotechnical engineering/environmental report prepared or authorized for their use. If access is provided only to the report prepared for you, you should advise contractors of the report's limitations, assuming that a contractor was not one of the specific persons for whom the report was prepared, and that developing construction cost estimates was not one of the specific purposes for which it was prepared. While a contractor may gain important knowledge from a report prepared for another party, the contractor should discuss the report with your consultant and perform the additional or alternative work believed necessary to obtain the data specifically appropriate for construction cost estimating purposes. Some clients hold the mistaken impression that simply disclaiming responsibility for the accuracy of subsurface information always insulates them from attendant liability. Providing the best available information to contractors helps prevent costly construction problems and the adversarial attitudes that aggravate them to a disproportionate scale.

READ RESPONSIBILITY CLAUSES CLOSELY.

Because geotechnical/environmental engineering is based extensively on judgment and opinion, it is far less exact than other design disciplines. This situation has resulted in wholly unwarranted claims being lodged against consultants. To help prevent this problem, consultants have developed a number of clauses for use in their contracts, reports, and other documents. These responsibility clauses are not exculpatory clauses designed to transfer the consultant's liabilities to other parties; rather, they are definitive clauses that identify where the consultant's responsibilities begin and end. Their use helps all parties involved recognize their individual responsibilities and take appropriate action. Some of these definitive clauses are likely to appear in your report, and you are encouraged to read them closely. Your consultant will be pleased to give full and frank answers to your questions.

The preceding paragraphs are based on information provided by the
ASFE/Association of Engineering Firms Practicing in the Geosciences, Silver Spring, Maryland
