Soil Remediation Work Plan Approval

Dear Ms. and Mr. Browning:

The Department has reviewed the *Monitoring Well Sampling, Groundwater Flow, and Stockpile Remediation Plan* dated 3 June 05 that was prepared by your consultant ACE Engineering. The plan for remediation, sampling and disposal of the approximately 200 cubic yards of contaminated soils that are stockpiled on site is approved.

Upon receipt and review of the soil remediation report and the ground water sampling report later this summer, the Department will decide on any future course of action that may be required in order to be protective of human health and the environment.

If you have any questions or need further assistance, please contact me at (907) 262-5210, Ext. 233.

Sincerely,

Don Seagren  
Environmental Specialist

CC: Arne Tikka, ACE Engineering/Soldotna
