Re: Chevron Station 351860 (Pineapple Texaco)

5138 Old Seward Highway, Anchorage, Hazard ID: 4692

Dear Mr. Bishop:

Thank you for your continued work on the monitoring and assessment of this site. In the interest of moving this site quicker toward closure the Alaska Department of Conservation, Contaminated Site Program (ADEC) is requesting a report summarizing all of the historic soil sampling data for this site to identify any locations that had sample results that exceed current ADEC maximum allowable and/or human health cleanup levels. The ADEC also requests that you submit a work plan, including a schedule for conducting the work, for assessing those areas to evaluate whether they still exceed maximum allowable and/or human health cleanup levels. The work plan could include the removal of contaminated soil and/or groundwater in those areas to help accelerate the remediation of this site. ADEC requests that both the report and work plan be submitted by May 1, 2020.

The ADEC looks forward to working with you in the cost-effective and timely completion of the site work for site closure. If you have any questions regarding this letter you can reach me at 907-269-7525 or via email at <a href="mailto:robert.weimer@alaska.gov">robert.weimer@alaska.gov</a>.

Sincerely,

Robert Weimer Project Manager
