Nikiski Completions Facility Removal Action Report
ADEC Report Comments

Dear Mr. Clodfelter:

The Alaska Department of Environmental Conservation Contaminated Sites Program (ADEC), would like to thank you for submitting your Nikiski Completions Facility Removal Action Report for the Baker Oil Tools site located in Nikiski, Alaska, prepared by Ahtna Engineering. Our office received this work plan addendum on October 27, 2014.

Has the septic system been eliminated as a source of contamination, and will there be any further investigation in this area?

Your consultant discussed using pressure transducers to aid in groundwater elevation monitoring. Do you intend to complete this task and what is the schedule?

Have you scheduled a date for drilling additional monitoring wells to determine the extent of groundwater contamination at the site?

If you have questions about this letter, or any other aspect of this project, please contact me at (907) 262-3412, or via e-mail at peter.campbell@alaska.gov

Sincerely,

A handwritten signature in black ink, appearing to read "Peter Campbell". The signature is fluid and cursive, with a long horizontal stroke at the end.

Peter Campbell
