Re: Draft Groundwater Monitoring Report
Beluga River Pump Area Assessment
ADEC Report Approval and Report Comments

Drew Anderson,

The Alaska Department of Environmental Conservation, Contaminated Sites Program (ADEC) has reviewed the Draft Groundwater Monitoring Report – Beluga River Unit, associated with five open sites in the Beluga River Field, located on the west side of Cook Inlet, near Tyonek, Alaska. The report was received in our office on May 3, 2023. This letter concerns Beluga River Pump Area Assessment site. The report is approved. ADEC has the following comments.

It appears that the monitoring wells at this site have not been sampled for PAH compounds. During the next sample event site wells should be tested for PAH compounds in preparation for having data to close the site. Well FG-10 will be sampled until it meets the cleanup criteria for two sample events.

If you have questions about this letter, or any other aspect of this project, please contact me at (907) 262-3412, or by e-mail at peter.campbell@alaska.gov.

Sincerely,

Peter Campbell
Peter Campbell
ADEC Project manager
