Re: Draft Groundwater Monitoring Report  
Abandoned Diesel Tank Farm  
ADEC Report Approval and Report Comments

Drew Anderson,

The Alaska Department of Environmental Conservation, Contaminated Sites Program (ADEC) has reviewed the Draft Groundwater Monitoring Report – Beluga River Unit, associated with five open sites in the Beluga River Field, located on the west side of Cook Inlet, near Tyonek, Alaska. The report was received in our office on May 3, 2023. This letter concerns Abandoned Diesel Tank Farm site. The report is approved. ADEC has the following comments.

The property in question is owned by the Kenai Peninsula Borough. The monitoring wells sampled indicate that groundwater contamination has attenuated over time. To close this site, Hilcorp should assess the source area to assure that contaminated soils or groundwater are not present.

Hilcorp will submit a work plan to assess the site. If the site is free of contamination below cleanup levels, prepare a detailed site history to document the site conditions for closure.

If you have questions about this letter, or any other aspect of this project, please contact me at (907) 262-3412, or by e-mail at [peter.campbell@alaska.gov](mailto:peter.campbell@alaska.gov).

Sincerely,

*Peter Campbell*

Peter Campbell  
ADEC Project manager
