Re: Draft Site Characterization and Groundwater Sampling Work Plan
Beluga River Unit Pump Area Assessment
ADEC Work Plan Approval

Drew Anderson,

The Alaska Department of Environmental Conservation, Contaminated Sites Program (ADEC) has reviewed the Draft Site Characterization and Groundwater Sampling Work Plan – Beluga River Unit Pump Area Assessment, associated with five open sites in the Beluga River Field, located on the west side of Cook Inlet, near Tyonek, Alaska. The report was received in our office on September 1, 2023. This letter concerns Beluga River Unit Pump Area Assessment site. ADEC has the following comments.

As this site is moving toward closure, all remaining monitoring wells should be tested for PAH compounds to be assured that they meet cleanup standards.

If you have questions about this letter, or any other aspect of this project, please contact me at (907) 262-3412, or by e-mail at peter.campbell@alaska.gov.

Sincerely,

Peter Campbell
ADEC Project manager
