Re: Former Reindeer Mountain Lodge  
Leaking Underground Storage Tank (LUST)  
Event ID 1250

Dear Mr. Duroousseau:

The Alaska Department of Environmental Conservation, Contaminated Sites Program (ADEC), reviewed Nortech's letter and laboratory data from the July 20, 2006 sampling of the groundwater monitoring well located in the former dispenser island at the above LUST site. According to the report, the groundwater was analyzed for gasoline range organics, benzene, toluene, ethylbenzene, xylenes, and lead. All the compounds analyzed for were below ADEC's cleanup levels.

ADEC approves the decommissioning of the on-site monitoring well. According to the conditional closure letter dated March 22, 2006, condition #3 has been completed and is no longer considered a condition of the closure.

If you have any questions or concerns pertaining to this matter, please contact me at 451-5174 or via e-mail at [Deborah\\_Williams@dec.state.ak.us](mailto:Deborah_Williams@dec.state.ak.us).

Sincerely,

Deborah Williams  
Environmental Program Specialist
