RPD	relative percent difference

ADEC Contaminated Sites Program Laboratory Data Review Checklist

Completed By:	Leslie Brooks	**CS Site Name:**	Eielson AFB Basewide PFAS	**Lab Name:**	Pace Analytical National
Title:	Environmental Scientist	**ADEC File No.:**	107.38.150	**Lab Report No.:**	L1756419
Consulting Firm:	Arctic Data Services	**Hazard ID No.:**	26773	**Lab Report Date:**	August 9, 2024

Note: *Any N/A or No box checked must have an explanation in the comments box.*

1. **Laboratory**

   a. Did an ADEC Contaminated Sites Laboratory Approval Program (CS-LAP) approved laboratory receive and perform all of the submitted sample analyses?
   Yes ☒ No ☐ N/A ☐
   Comments: All samples were received and analyzed by Pace Analytical National – Mount Juliet, Tennessee. The laboratory is ADEC CS approved for the analyses performed, where required.

   b. If the samples were transferred to another "network" laboratory or sub-contracted to an alternate laboratory, was the laboratory performing the analyses CS-LAP approved?
   Yes ☐ No ☐ N/A ☒
   Comments: No samples were transferred to or analyzed by another laboratory.

2. **Chain of Custody (CoC)**

   a. Is the CoC information completed, signed, and dated (including released/received by)?
   Yes ☒ No ☐ N/A ☐
   Comments: Click or tap here to enter text.

   b. Were the correct analyses requested?
   Yes ☐ No ☒ N/A ☐
   Analyses requested: Alkalinity (SM2320B), TOC (SM5310C), TDS (SM2540C), TSS (SM2540D), anions (300.0), nitrate/nitrite (353.2), RCRA metals (6020A/7470A), and total/dissolved Fe/Mn/Ca/Mg (6010C). Hardness (SM3500, per QAPP) was not requested, but per correspondence with the lab hardness was determined by EPA Method 130.1 using volume from alkalinity bottle.
   Comments: Clarifications were submitted in a revised electronic CoC.

3. Laboratory Sample Receipt Documentation

a. Is the sample/cooler temperature documented and within range at receipt (0° to 6° C)?
Yes ☒ No ☐ N/A ☐
Cooler temperature(s): 3.0, 4.5, 5.7, 1.5
Comments: Samples were received within the acceptable temperature range.

b. Is the sample preservation acceptable – acidified waters, methanol preserved soil (GRO, BTEX, VOCs, etc.)?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Is the sample condition documented – broken, leaking, zero headspace (VOA vials); canister vacuum/pressure checked and no open valves, etc.?
Yes ☒ No ☐ N/A ☐
Comments: Samples were received in good condition.

d. If there were any discrepancies, were they documented? For example, incorrect sample containers/preservation, sample temperature outside of acceptable range, insufficient or missing samples, canister not holding a vacuum, etc.?
Yes ☐ No ☐ N/A ☒
Comments: There were no sample receiving discrepancies.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability are not affected.

4. Case Narrative

a. Is the case narrative present and understandable?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are there discrepancies, errors, or QC failures identified by the lab?
Yes ☐ No ☒ N/A ☐
Comments: The case narrative referred to qualifications throughout the report for documentation of QC failures; none were summarized or discussed in the case narrative. The case narrative noted that sample quantity was not sufficient to complete TSS analysis per recommended method guidelines for sample CACMW-001-110-070924. Analysis was completed; presumably the laboratory had insufficient volume to re-run the analysis in response to an LCS failure.

c. Were all the corrective actions documented?
Yes ☐ No ☐ N/A ☒
Comments: No corrective actions were performed.

d. What is the effect on data quality/usability according to the case narrative?
Comments: The case narrative made no comments on data quality or usability.

5. Sample Results

a. Are the correct analyses performed/reported as requested on CoC?
Yes ☐ No ☒ N/A ☐
Comments: TOC was analyzed by EPA Method 9060A instead of SM5310C, and hardness was analyzed by EPA Method 130.1 instead of SM3500.

b. Are all applicable holding times met?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Are all soils reported on a dry weight basis?
Yes ☐ No ☐ N/A ☒
Comments: No soil samples were submitted in this workorder.

d. Are the reported limits of quantitation (LoQ) or limits of detections (LOD), or reporting limits (RL) less than the Cleanup Level or the action level for the project?
Yes ☐ No ☒ N/A ☐
Comments: LOQs and LODs for non-detect results were compared to the Project Screening Levels (PSLs) as defined in Worksheet #15 of the UFP-QAPP. LOQs and LODs for cadmium and mercury were above PSLs for all samples.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Methods used for hardness and TOC produce comparable data. Data quality was not affected. The UFP-QAPP states the project will use the LOD as the PSL for arsenic, cadmium, and mercury

6. QC Samples

a. Method Blank

i. Was one method blank reported per matrix, analysis, and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Are all method blank results less than LOQ (or RL)?
Yes ☒ No ☐
Comments: TOC was detected below the LOQ and LOD but above the DL for method blanks in prep batches WG2323624 and WG2323629 at 246 ug/L and 114 ug/L respectively.

iii. If above LoQ or RL, what samples are affected?
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated method blank concentration. No samples were affected.

iv. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected

v. Data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected

b. Laboratory Control Sample/Duplicate (LCS/LCSD)

i. Organics – Are one LCS/LCSD reported per matrix, analysis and 20 samples? (LCS/LCSD required per AK methods, LCS required per SW846)
Yes ☐ No ☐ N/A ☒
Comments: No organic methods were performed in this work order.

ii. Metals/Inorganics – Are one LCS and one sample duplicate reported per matrix, analysis and 20 samples?
Yes ☐ No ☒ N/A ☐
Comments: 6020 prep batch WG2324884 was missing a duplicate.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods: AK101 60%-120%, AK102 75%-125%, AK103 60%-120%; all other analyses see the laboratory QC pages)
Yes ☐ No ☒ N/A ☐
Comments: LCS recovery was below laboratory limits for Total Suspended Solids in prep batches WG2322808 and WG2322815.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? Was the RPD reported from LCS/LCSD, and or sample/sample duplicate? (AK Petroleum methods 20%; all other analyses see the laboratory QC pages)
Yes ☐ No ☒ N/A ☐
Comments: Laboratory duplicate RPD of Total Suspended Solids (TSS) in sample CACMW-002-160-07112 was reported above the laboratory control limit of 10%.

v. If %R or RPD is outside of acceptable limits, what samples are affected?

Comments: TSS results for samples CACMW-001-060-070924, CACMW-001-110-070924, CACMW-001-160-071024, CACMW-002-060-071024, and CACMW-003-060-071024 are considered affected by the recovery failures. No samples were affected by the RPD failure as both the parent sample and laboratory duplicate results were below the LOQ.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☒ No ☐ N/A ☐
Comments: Affected TSS results are qualified 'J-' as estimated with low bias due to low LCS recovery.

vii. Is the data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

c. Matrix Spike/Matrix Spike Duplicate (MS/MSD)

i. Organics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No organic methods were performed in this work order.

ii. Metals/Inorganics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☒ N/A ☐
Comments: Sample CACMW-003-160-071124 was submitted with additional volume for MS/MSD analysis. However, MS/MSD analysis was not run for methods SM2320B, SM2540C, and SM2540D.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable?
Yes ☐ No ☒ N/A ☐
Comments: MS/MSD recoveries were above laboratory control limits for Nitrate-Nitrite in sample CACMW-003-160-071124.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? RPD reported from MS/MSD, and or sample/sample duplicate.
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

v. If %R or RPD is outside of acceptable limits, what samples are affected?

Comments: Project-sample results are not considered affected if the associated MS/MSD was recovered high and the associated analyte was not detected in the parent sample. No samples were affected.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

vii. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

d. Surrogates – Organics Only or Isotope Dilution Analytes (IDA) – Isotope Dilution Methods Only

i. Are surrogate/IDA recoveries reported for organic analyses – field, QC, and laboratory samples?
Yes ☐ No ☐ N/A ☒
Comments: No organic methods were performed in this work order.

ii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods 50-150 %R for field samples and 60-120 %R for QC samples; all other analyses see the laboratory report pages)
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. Do the sample results with failed surrogate/IDA recoveries have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

e. Trip Blanks

i. Is one trip blank reported per matrix, analysis, and for each cooler containing volatile samples? Yes ☐ No ☐ N/A ☒
Comments: No volatile analyses were performed in this work order.

ii. Are all results less than LoQ or RL?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. If above LoQ or RL, what samples are affected?
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

f. Field Duplicate

i. Are one field duplicate submitted per matrix, analysis, and 10 project samples?
Yes ☐ No ☒ N/A ☐
Comments No field duplicates were submitted in this work order. Refer to DQA for evaluation of overall field duplicate collection frequency.

ii. Was the duplicate submitted blind to lab?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. Precision – All relative percent differences (RPD) less than specified project objectives? (Recommended: 30% water or air, 50% soil)

$$RPD\ (\%) = \left| \frac{R_1 - R_2}{\left(\frac{R_1 + R_2}{2}\right)} \right| X\ 100$$

Where R_1 = Sample Concentration

R_2 = Field Duplicate Concentration

Is the data quality or usability affected? (Explain)

Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iv. Is the data quality or usability affected? (Explain)
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

g. Decontamination or Equipment Blanks

i. Were decontamination or equipment blanks collected?
Yes ☒ No ☐ N/A ☐
Comments: The following field blanks and equipment blanks were reported in SDG L1758446: CACMW-EB02-071524, CACMW-EB03-071624 CACMW-FB02-071524, CACMW-FB03-071624

ii. Are all results less than LoQ or RL?

Yes ☒ No ☐ N/A ☐
Comments: All detections were below LOD. See checklist L1758446 for details.

iii. If above LoQ or RL, specify what samples are affected.
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated blank concentration. Fluoride results for all samples in this work order are considered affected

iv. Are data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Affected results below the LOD were qualified with a "UB" as false-positives and are considered non-detect up to the LOD, and results above the LOD were qualified with “J+” flags as estimated with high bias. Refer to the data quality assessment for discussion of potential impacts to data usability.

7. Other Data Flags/Qualifiers (ACOE, AFCEE, Lab Specific, etc.)

a. Are they defined and appropriate?
Yes ☒ No ☐ N/A ☐

ADEC Contaminated Sites Program Laboratory Data Review Checklist

Completed By:	Leslie Brooks	**CS Site Name:**	Eielson AFB Basewide PFAS	**Lab Name:**	Pace Analytical National
Title:	Environmental Scientist	**ADEC File No.:**	107.38.150	**Lab Report No.:**	L1758081
Consulting Firm:	Arctic Data Services	**Hazard ID No.:**	26773	**Lab Report Date:**	August 8, 2024

Note: *Any N/A or No box checked must have an explanation in the comments box.*

1. **Laboratory**

   a. Did an ADEC Contaminated Sites Laboratory Approval Program (CS-LAP) approved laboratory receive and perform all of the submitted sample analyses?
   Yes ☒ No ☐ N/A ☐
   Comments: All samples were received and analyzed by Pace Analytical National – Mount Juliet, Tennessee. The laboratory is ADEC CS approved for the analysis performed, where required.

   b. If the samples were transferred to another "network" laboratory or sub-contracted to an alternate laboratory, was the laboratory performing the analyses CS-LAP approved?
   Yes ☐ No ☐ N/A ☒
   Comments: No samples were transferred to or analyzed by another laboratory.

2. **Chain of Custody (CoC)**

   a. Is the CoC information completed, signed, and dated (including released/received by)?
   Yes ☒ No ☐ N/A ☐
   Comments: Click or tap here to enter text.

   b. Were the correct analyses requested?
   Yes ☐ No ☒ N/A ☐
   Analyses requested: Hardness (130.2), alkalinity (SM2320B), TOC (SM5310C), TDS (SM2540C), TSS (2540D), anions (300), nitrate/nitrite (353.2), RCRA metals (6020A/7470A), and total/dissolved Fe/Mn/Ca/Mg (6010C).
   Comments: The method requested for hardness did not match the method listed in the QAPP (SM3500).

3. Laboratory Sample Receipt Documentation

a. Is the sample/cooler temperature documented and within range at receipt (0° to 6° C)?
Yes ☒ No ☐ N/A ☐
Cooler temperature(s): 5.7, 3.3, 1.2
Comments: Samples were received within acceptable temperature range.

b. Is the sample preservation acceptable – acidified waters, methanol preserved soil (GRO, BTEX, VOCs, etc.)?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Is the sample condition documented – broken, leaking, zero headspace (VOA vials); canister vacuum/pressure checked and no open valves, etc.?
Yes ☒ No ☐ N/A ☐
Comments: Samples were received in good condition.

d. If there were any discrepancies, were they documented? For example, incorrect sample containers/preservation, sample temperature outside of acceptable range, insufficient or missing samples, canister not holding a vacuum, etc.?
Yes ☐ No ☐ N/A ☒
Comments: There were no sample receiving discrepancies.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability are not affected.

4. Case Narrative

a. Is the case narrative present and understandable?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are there discrepancies, errors, or QC failures identified by the lab?
Yes ☐ No ☒ N/A ☐
Comments: The case narrative referred to qualifications throughout the report for documentation of QC failures; none were summarized or discussed in the case narrative.

c. Were all the corrective actions documented?
Yes ☐ No ☐ N/A ☒
Comments: No corrective actions were performed.

d. What is the effect on data quality/usability according to the case narrative?
Comments: The case narrative made no comments on data quality or usability.

5. Sample Results

a. Are the correct analyses performed/reported as requested on CoC?
Yes ☐ No ☒ N/A ☐
Comments: TOC was analyzed by EPA Method 9060A instead of SM5310C, and hardness was analyzed by EPA Method 130.1 instead of SM3500.

b. Are all applicable holding times met?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Are all soils reported on a dry weight basis?
Yes ☐ No ☐ N/A ☒
Comments: No soil samples were submitted in this workorder.

d. Are the reported limits of quantitation (LoQ) or limits of detections (LOD), or reporting limits (RL) less than the Cleanup Level or the action level for the project?
Yes ☐ No ☒ N/A ☐
Comments: LOQs and LODs for non-detect results were compared to the Project Screening Levels (PSLs) as defined in Worksheet #15 of the UFP-QAPP. LOQs and LODs for cadmium and mercury were above PSLs for all samples.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Methods used for hardness and TOC produce comparable data. Data quality was not affected. The UFP-QAPP states the project will use the LOD as the PSL for arsenic, cadmium, and mercury

6. QC Samples

a. Method Blank

i. Was one method blank reported per matrix, analysis, and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Are all method blank results less than LOQ (or RL)?
Yes ☒ No ☐
Comments: Click or tap here to enter text.

iii. If above LoQ or RL, what samples are affected?
Comments: N/A; there were no method blank detections.

iv. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?

Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

v. Data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

b. Laboratory Control Sample/Duplicate (LCS/LCSD)

i. Organics – Are one LCS/LCSD reported per matrix, analysis and 20 samples? (LCS/LCSD required per AK methods, LCS required per SW846)
Yes ☐ No ☐ N/A ☒
Comments: No organic methods were performed in this workorder.

ii. Metals/Inorganics – Are one LCS and one sample duplicate reported per matrix, analysis and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods: AK101 60%-120%, AK102 75%-125%, AK103 60%-120%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? Was the RPD reported from LCS/LCSD, and or sample/sample duplicate? (AK Petroleum methods 20%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: N/A; there were no %R or RPD outside control limits.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

vii. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

c. Matrix Spike/Matrix Spike Duplicate (MS/MSD)

i. Organics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No organic methods were performed in this workorder.

ii. Metals/Inorganics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: There were no project-specific MS/MSD submitted in this work order. Refer to DQA for evaluation of overall MS/MSD collection frequency. Non-project related MS/MSDs are not reviewed. Additionally, the laboratory performed MS analysis for batch QC purposes for the following sample: CAMW-004-110-071224

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable?
Yes ☐ No ☒ N/A ☐
Comments: MS recoveries were below laboratory limits for the following: CAMW-004-110-071224 - Chloride

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? RPD reported from MS/MSD, and or sample/sample duplicate.
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: The following results were considered affected by low MS/MSD recovery:
CAMW-004-110-071224 - Chloride

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☒ No ☐ N/A ☐
Comments: Detected results affected by low MS/MSD recovery failures are qualified 'J-' as estimated with a low bias.

vii. Is the data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

d. Surrogates – Organics Only or Isotope Dilution Analytes (IDA) – Isotope Dilution Methods Only

i. Are surrogate/IDA recoveries reported for organic analyses – field, QC, and laboratory samples?
Yes ☐ No ☐ N/A ☒
Comments: No organic methods were performed in this work order.

ii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods 50-150 %R for field samples and 60-120 %R for QC samples; all other analyses see the laboratory report pages)
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. Do the sample results with failed surrogate/IDA recoveries have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

e. Trip Blanks

i. Is one trip blank reported per matrix, analysis, and for each cooler containing volatile samples? Yes ☐ No ☐ N/A ☒
Comments: No volatile analyses were performed in this work order.

ii. Are all results less than LoQ or RL?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. If above LoQ or RL, what samples are affected?
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

f. Field Duplicate

i. Are one field duplicate submitted per matrix, analysis, and 10 project samples?
Yes ☒ No ☐ N/A ☐

Comments: The following field duplicate pair was submitted in this work order: CACMW-004-160-071224 / CACMW-GW-FD01-071224

ii. Was the duplicate submitted blind to lab?
Yes ☐ No ☒ N/A ☐
Comments: The field duplicate ID included "FD" identifying it as a field duplicate; however, the associated primary sample could not be readily determined from the field duplicate ID. Future sampling should not include identifiers such as "FD" so field duplicates are blind to the laboratory.

iii. Precision – All relative percent differences (RPD) less than specified project objectives? (Recommended: 30% water or air, 50% soil)

$$RPD\ (\%) = \left| \frac{R_1 - R_2}{\left(\frac{R_1 + R_2}{2}\right)} \right| X\ 100$$

Where R_1 = Sample Concentration

R_2 = Field Duplicate Concentration

Is the data quality or usability affected? (Explain)

Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iv. Is the data quality or usability affected? (Explain)
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

g. Decontamination or Equipment Blanks

i. Were decontamination or equipment blanks collected?
Yes ☒ No ☐ N/A ☐
Comments: The following field blanks and equipment blanks were reported in SDG L1758446: CACMW-EB02-071524, CACMW-EB03-071624, CACMW-FB02-071524, CACMW-FB03-071624

ii. Are all results less than LoQ or RL?
Yes ☒ No ☐ N/A ☐
Comments: All detections were below LOD. See checklist L1758446 for details.

iii. If above LoQ or RL, specify what samples are affected.
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated blank concentration. Fluoride results for all samples in this work order are considered affected.

iv. Are data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Affected results below the LOD were qualified with a “UB” as false-positives and are considered non-detect up to the LOD, and results above the LOD were qualified with a “J+” as estimated with high bias. Refer to the data quality assessment for discussion of potential impacts to data usability.

7. Other Data Flags/Qualifiers (ACOE, AFCEE, Lab Specific, etc.)

a. Are they defined and appropriate?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ADEC Contaminated Sites Program Laboratory Data Review Checklist

Completed By:	Leslie Brooks	**CS Site Name:**	Eielson AFB Basewide PFAS	**Lab Name:**	Pace Analytical National
Title:	Environmental Scientist	**ADEC File No.:**	107.38.150	**Lab Report No.:**	L1758446
Consulting Firm:	Arctic Data Services	**Hazard ID No.:**	26773	**Lab Report Date:**	August 8, 2024

Note: *Any N/A or No box checked must have an explanation in the comments box.*

1. **Laboratory**

   a. Did an ADEC Contaminated Sites Laboratory Approval Program (CS-LAP) approved laboratory receive and perform all of the submitted sample analyses?
   Yes ☒ No ☐ N/A ☐
   Comments: All samples were received and analyzed by Pace Analytical National – Mount Juliet, Tennessee. The laboratory is ADEC CS approved for the analyses performed, where required.

   b. If the samples were transferred to another "network" laboratory or sub-contracted to an alternate laboratory, was the laboratory performing the analyses CS-LAP approved?
   Yes ☐ No ☐ N/A ☒
   Comments: No samples were transferred to or analyzed by another laboratory.

2. **Chain of Custody (CoC)**

   a. Is the CoC information completed, signed, and dated (including released/received by)?
   Yes ☒ No ☐ N/A ☐
   Comments: Click or tap here to enter text.

   b. Were the correct analyses requested?
   Yes ☐ No ☒ N/A ☐
   Analyses requested: Hardness (130.2), alkalinity (SM2320B), TOC (9060), TDS (2540C), TSS (2540D), anions (9056), nitrate/nitrite (353), RCRA metals (6020A/7470A), and total/dissolved Fe/Mn/Ca/Mg (6010C)
   Comments: The methods requested for hardness and TOC did not match the methods listed in the QAPP (SM3500 and SM5310C, respectively).

3. Laboratory Sample Receipt Documentation

a. Is the sample/cooler temperature documented and within range at receipt (0° to 6° C)?
Yes ☒ No ☐ N/A ☐
Cooler temperature(s): 1.4, 2.5, 3.1, 1.6, 4.6, 5.2, 4.5
Comments: Click or tap here to enter text.

b. Is the sample preservation acceptable – acidified waters, methanol preserved soil (GRO, BTEX, VOCs, etc.)?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Is the sample condition documented – broken, leaking, zero headspace (VOA vials); canister vacuum/pressure checked and no open valves, etc.?
Yes ☒ No ☐ N/A ☐
Comments: Samples were received in good condition.

d. If there were any discrepancies, were they documented? For example, incorrect sample containers/preservation, sample temperature outside of acceptable range, insufficient or missing samples, canister not holding a vacuum, etc.?
Yes ☐ No ☐ N/A ☒
Comments: There were no sample receiving discrepancies.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

4. Case Narrative

a. Is the case narrative present and understandable?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are there discrepancies, errors, or QC failures identified by the lab?
Yes ☐ No ☒ N/A ☐
Comments: The case narrative referred to qualifications throughout the report for documentation of QC failures; none were summarized or discussed in the case narrative.

c. Were all the corrective actions documented?
Yes ☐ No ☐ N/A ☒
Comments: No corrective actions were performed.

d. What is the effect on data quality/usability according to the case narrative?
Comments: The case narrative made no comments on data quality or usability.

5. Sample Results

a. Are the correct analyses performed/reported as requested on CoC?
Yes ☒ No ☐ N/A ☐
Comments: However as noted in Section 2.b., methods requested for hardness and TOC did not match the QAPP.

b. Are all applicable holding times met?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Are all soils reported on a dry weight basis?
Yes ☐ No ☐ N/A ☒
Comments: No soil samples were submitted in this work order.

d. Are the reported limits of quantitation (LoQ) or limits of detections (LOD), or reporting limits (RL) less than the Cleanup Level or the action level for the project?
Yes ☐ No ☒ N/A ☐
Comments: LOQs and LODs for non-detect results were compared to the Project Screening Levels (PSLs) as defined in Worksheet #15 of the UFP-QAPP. LOQs and LODs for cadmium and mercury were above PSLs for all samples.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Methods used for hardness and TOC produce comparable data. Data quality was not affected. The UFP-QAPP states the project will use the LOD as the PSL for arsenic, cadmium, and mercury.

6. QC Samples

a. Method Blank

i. Was one method blank reported per matrix, analysis, and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Are all method blank results less than LOQ (or RL)?
Yes ☒ No ☐
Comments: TOC was detected below the LOQ and LOD but above the DL for method blank in prep batch WG2327213, at 434 ug/L.

iii. If above LoQ or RL, what samples are affected?
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated method blank concentration. No sample results were affected.

iv. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

v. Data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

b. Laboratory Control Sample/Duplicate (LCS/LCSD)

i. Organics – Are one LCS/LCSD reported per matrix, analysis and 20 samples? (LCS/LCSD required per AK methods, LCS required per SW846)
Yes ☐ No ☐ N/A ☒
Comments: No organic methods were performed in this work order.

ii. Metals/Inorganics – Are one LCS and one sample duplicate reported per matrix, analysis and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods: AK101 60%-120%, AK102 75%-125%, AK103 60%-120%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? Was the RPD reported from LCS/LCSD, and or sample/sample duplicate? (AK Petroleum methods 20%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: N/A; there were no %R or RPD outside control limits.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

vii. Is the data quality or usability affected?

Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

c. Matrix Spike/Matrix Spike Duplicate (MS/MSD)

i. Organics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No organic methods were performed in this work order.

ii. Metals/Inorganics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☒ N/A ☐
Comments: Sample CACMW-006-060-071524 was submitted with additional volume for MS/MSD analysis. However, MS/MSD analysis was not run for methods SM2320B, SM2540C, and SM2540D.
Additionally, the laboratory performed MS/MSD analysis for batch QC purposes for the following samples: CACMW-006-160-071524, CACMW-007-060-071524, and CACMW-008-110-071624

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable?
Yes ☐ No ☒ N/A ☐
Comments: MS/MSD recoveries were below laboratory limits for the following:
CACMW-006-060-071524 – Hardness, Nitrate-nitrite, Chloride
CACMW-007-060-071524 – Dissolved Manganese
CACMW-008-110-071624 – Nitrate-Nitrite

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? RPD reported from MS/MSD, and or sample/sample duplicate.
Yes ☐ No ☒ N/A ☐
Comments: MSD RPD was above the laboratory control limit (20%) for Nitrate-Nitrite in sample CACMW-008-110-071624.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: MS/MSD recovery failures are only considered to affect parent-sample data quality if the spiking concentration is greater than 1/4 the native concentration of the analyte in the parent sample. MS/MSD recovery failures are not considered to affect data quality when results exceed the calibration range. An MSD RPD failure only affects parent-sample data quality if the failing analyte is detected in the parent sample. No results were affected by MS/MSD RPD failures.
The following results were considered affected by low MS/MSD recovery:

CACMW-006-060-071524 – Nitrate-Nitrite, Chloride
CACMW-008-110-071624 – Nitrate-Nitrite

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☒ No ☐ N/A ☐
Comments: Detected results affected by low MS/MSD recovery failures are qualified 'J-' as estimated with a low bias. Non-detect results affected by low MS/MSD recovery are qualified 'UJ' indicating there is uncertainty in the absence of the analyte at the reporting limit, due to a low bias.

vii. Is the data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

d. Surrogates – Organics Only or Isotope Dilution Analytes (IDA) – Isotope Dilution Methods Only

i. Are surrogate/IDA recoveries reported for organic analyses – field, QC, and laboratory samples?
Yes ☐ No ☐ N/A ☒
Comments: No organic methods were performed in this work order.

ii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods 50-150 %R for field samples and 60-120 %R for QC samples; all other analyses see the laboratory report pages)
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. Do the sample results with failed surrogate/IDA recoveries have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

e. Trip Blanks

i. Is one trip blank reported per matrix, analysis, and for each cooler containing volatile samples? Yes ☐ No ☐ N/A ☒
Comments: No volatile analyses were performed in this work order.

ii. Are all results less than LoQ or RL?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. If above LoQ or RL, what samples are affected?
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

f. Field Duplicate

i. Are one field duplicate submitted per matrix, analysis, and 10 project samples?
Yes ☒ No ☐ N/A ☐
Comments: The following field duplicate pairs were submitted in this work order:
CACMW-007-060-071524 / CACMW-GW-FD02-071524
CACMW-008-110-071624 / CACMW-GW-FD03-071624

ii. Was the duplicate submitted blind to lab?
Yes ☐ No ☒ N/A ☐
Comments: The field duplicate IDs included “FD” identifying it as a field duplicate; however, the associated primary sample could not be readily determined from the field duplicate IDs. Future sampling should not include identifiers such as “FD” so field duplicates are blind to the laboratory.

iii. Precision – All relative percent differences (RPD) less than specified project objectives? (Recommended: 30% water or air, 50% soil)

$$RPD\ (\%) = \left| \frac{R_1 - R_2}{\left(\frac{R_1 + R_2}{2}\right)} \right| X\ 100$$

Where R_1 = Sample Concentration

R_2 = Field Duplicate Concentration

Is the data quality or usability affected? (Explain)

Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iv. Is the data quality or usability affected? (Explain)
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

g. Decontamination or Equipment Blanks

i. Were decontamination or equipment blanks collected?
Yes ☒ No ☐ N/A ☐
Comments: The following field blanks and equipment blanks were reported in this work order: CACMW-EB02-071524, CACMW-EB03-071624, CACMW-FB02-071524, CACMW-FB03-071624

ii. Are all results less than LoQ or RL?
Yes ☒ No ☐ N/A ☐
Comments: The following were detected below the LOQ and LOD but above the DL:

CACMW-EB02-071524	Chloride	404 ug/l
CACMW-EB02-071524	Fluoride	134 ug/l
CACMW-EB03-071624	Calcium (dissolved)	103 ug/l
CACMW-EB03-071624	Chloride	394 ug/l
CACMW-EB03-071624	Fluoride	90.9 ug/l
CACMW-FB03-071524	Fluoride	118 ug/l

iii. If above LoQ or RL, specify what samples are affected.
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated method blank concentration. Fluoride results for all samples in this work order are considered affected.

iv. Are data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Affected results below the LOD were qualified with a "UB" as false-positives and are considered non-detect up to the LOD and results above the LOD were qualified with a “J+” as estimated with high bias. Refer to the data quality assessment for discussion of potential impacts to data usability.

7. Other Data Flags/Qualifiers (ACOE, AFCEE, Lab Specific, etc.)

a. Are they defined and appropriate?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ADEC Contaminated Sites Program Laboratory Data Review Checklist

Completed By:	Leslie Brooks	**CS Site Name:**	Eielson AFB Basewide PFAS	**Lab Name:**	Pace Analytical Services
Title:	Environmental Scientist	**ADEC File No.:**	107.38.150	**Lab Report No.:**	ZG13006
Consulting Firm:	Arctic Data Services	**Hazard ID No.:**	26773	**Lab Report Date:**	August 19, 2024

Note: *Any N/A or No box checked must have an explanation in the comments box.*

1. **Laboratory**

   a. Did an ADEC Contaminated Sites Laboratory Approval Program (CS-LAP) approved laboratory receive and perform all of the submitted sample analyses?
   Yes ☒ No ☐ N/A ☐
   Comments: All samples were received and analyzed by Pace Analytical Services – West Columbia, South Carolina. The laboratory is ADEC CS approved for the analyses performed, where required

   b. If the samples were transferred to another "network" laboratory or sub-contracted to an alternate laboratory, was the laboratory performing the analyses CS-LAP approved?
   Yes ☐ No ☐ N/A ☒
   Comments: No samples were transferred to or analyzed by another laboratory.

2. **Chain of Custody (CoC)**

   a. Is the CoC information completed, signed, and dated (including released/received by)?
   Yes ☒ No ☐ N/A ☐
   Comments: Click or tap here to enter text.

   b. Were the correct analyses requested?
   Yes ☒ No ☐ N/A ☐
   Analyses requested: : PFAS (1633)
   Comments: Click or tap here to enter text.

3. **Laboratory Sample Receipt Documentation**

   a. Is the sample/cooler temperature documented and within range at receipt (0° to 6° C)?
   Yes ☒ No ☐ N/A ☐

Cooler temperature(s): 5.6
Comments: Samples were received within acceptable temperature range.

b. Is the sample preservation acceptable – acidified waters, methanol preserved soil (GRO, BTEX, VOCs, etc.)?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Is the sample condition documented – broken, leaking, zero headspace (VOA vials); canister vacuum/pressure checked and no open valves, etc.?
Yes ☒ No ☐ N/A ☐
Comments: Samples were received in good condition.

d. If there were any discrepancies, were they documented? For example, incorrect sample containers/preservation, sample temperature outside of acceptable range, insufficient or missing samples, canister not holding a vacuum, etc.?
Yes ☐ No ☐ N/A ☒
Comments: There were no sample receiving discrepancies.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability are not affected.

4. Case Narrative

a. Is the case narrative present and understandable?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are there discrepancies, errors, or QC failures identified by the lab?
Yes ☐ No ☒ N/A ☐
Comments: The laboratory report case narrative documented QC anomalies which are addressed in the following relevant sections of this checklist.

c. Were all the corrective actions documented?
Yes ☐ No ☐ N/A ☒
Comments: The following corrective actions were noted in the case narrative. Surrogate recovery for the following sample was outside control limits: ZG13006-007. Re-extraction and/or re-analysis was performed outside of holding time and all data has been reported.

d. What is the effect on data quality/usability according to the case narrative?
Comments: The case narrative made no comments on data quality or usability.

5. Sample Results

a. Are the correct analyses performed/reported as requested on CoC?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are all applicable holding times met?
Yes ☐ No ☒ N/A ☐
Comments: Reanalysis for sample CACMW-003-160-071124 was extracted 5 days past the recommended 28-day extraction holding time. Affected results are qualified as estimated ('J' for detects and 'UJ' for non-detects).

c. Are all soils reported on a dry weight basis?
Yes ☐ No ☐ N/A ☒
Comments: No soil samples were submitted in this workorder.

d. Are the reported limits of quantitation (LoQ) or limits of detections (LOD), or reporting limits (RL) less than the Cleanup Level or the action level for the project?
Yes ☐ No ☒ N/A ☐
Comments: LOQs and LODs for non-detect results were compared to the Project Screening Levels (PSLs) as defined in Worksheet #15 of the UFP-QAPP. LOQ and LODs for HFPO-DA were above PSLs for all samples

e. Is the data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

6. QC Samples

a. Method Blank

i. Was one method blank reported per matrix, analysis, and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Are all method blank results less than LOQ (or RL)?
Yes ☒ No ☐
Comments: The following were detected in method blanks below the LOQ and LOD but above the DL:
Batch 16118 PFOS 0.028 ng/L

iii. If above LoQ or RL, what samples are affected?

Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated method blank concentration. No samples were affected.

iv. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

v. Data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

b. Laboratory Control Sample/Duplicate (LCS/LCSD)

i. Organics – Are one LCS/LCSD reported per matrix, analysis and 20 samples? (LCS/LCSD required per AK methods, LCS required per SW846)
Yes ☐ No ☒ N/A ☐
Comments: Batch 15603 had no sample duplicate.

ii. Metals/Inorganics – Are one LCS and one sample duplicate reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods: AK101 60%-120%, AK102 75%-125%, AK103 60%-120%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? Was the RPD reported from LCS/LCSD, and or sample/sample duplicate? (AK Petroleum methods 20%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: N/A; there were no %R or RPD failures.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?

Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

vii. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

c. Matrix Spike/Matrix Spike Duplicate (MS/MSD)

i. Organics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Sample CACMW-003-160-071124 was submitted with additional volume for MS/MSD analysis.

ii. Metals/Inorganics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable?
Yes ☐ No ☒ N/A ☐
Comments: MS/MSD recoveries were below laboratory limits for PFDS, PFTrDA, 11Cl-PF3OUdS, and PFDoS for the initial analysis of parent sample CACMW-003-160-071124. Additionally, recoveries of 11Cl-PF3OUdS and PFDoS were extremely low (%R < 10%).

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? RPD reported from MS/MSD, and or sample/sample duplicate.
Yes ☐ No ☒ N/A ☐
Comments: MSD RPD were above laboratory limits for PFDS, PFTrDA, 11Cl-PF3OUdS, and PFDoS for the initial analysis of parent sample CACMW-003-160-071124.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: Associated results in the initial analysis of parent sample CACMW-003-160-071124 are affected.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☒ No ☐ N/A ☐
Comments: Non-detect results affected by low MS/MSD recovery are qualified 'UJ' indicating there is uncertainty in the absence of the analyte

at the reporting limit, due to a low bias. Non-detect results affected by extremely low recovery are qualified 'X' as recommended for rejection.

vii. Is the data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

d. Surrogates – Organics Only or Isotope Dilution Analytes (IDA) – Isotope Dilution Methods Only

i. Are surrogate/IDA recoveries reported for organic analyses – field, QC, and laboratory samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods 50-150 %R for field samples and 60-120 %R for QC samples; all other analyses see the laboratory report pages)
Yes ☐ No ☒ N/A ☐
Comments: 1633 IDA recoveries for 13C2-Perfluorotetradecanoic acid, d7-MeFOSE, and d9-EtFOSE in the initial analysis of sample CACMW-003-160-071124 were below laboratory limits. Recoveries of d7-MeFOSE and d9-EtFOSE were extremely low (%R < 10%). Additionally, several IDA recoveries were below limits for the MS/MSD of CACMW-003-160-071124.

iii. Do the sample results with failed surrogate/IDA recoveries have data flags? If so, are the data flags clearly defined?
Yes ☒ No ☐ N/A ☐
Comments: Non-detect results affected by low IDA recovery are qualified 'UJ' indicating there is uncertainty in the absence of the analyte at the reporting limit, due to a low bias. Non-detect results affected by extremely low recovery are qualified 'X' as recommended for rejection.

iv. Is the data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

e. Trip Blanks

i. Is one trip blank reported per matrix, analysis, and for each cooler containing volatile samples? Yes ☐ No ☐ N/A ☒
Comments: No volatile analyses were performed in this work order.

ii. Are all results less than LoQ or RL?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. If above LoQ or RL, what samples are affected?
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

f. Field Duplicate

i. Are one field duplicate submitted per matrix, analysis, and 10 project samples?
Yes ☐ No ☒ N/A ☐
Comments: No field duplicates were submitted in this work order. Refer to DQA for evaluation of overall field duplicate collection frequency.

ii. Was the duplicate submitted blind to lab?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. Precision – All relative percent differences (RPD) less than specified project objectives? (Recommended: 30% water or air, 50% soil)

$$RPD\ (\%) = \left| \frac{R_1 - R_2}{\left(\frac{R_1 + R_2}{2}\right)} \right| X\ 100$$

Where R_1 = Sample Concentration

R_2 = Field Duplicate Concentration

Is the data quality or usability affected? (Explain)

Yes ☐ No ☐ N/A ☒
Comments: N/A; see above

iv. Is the data quality or usability affected? (Explain)
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

g. Decontamination or Equipment Blanks

i. Were decontamination or equipment blanks collected?
Yes ☒ No ☐ N/A ☐

Comments: The following field blanks and equipment blanks were reported in SDG ZG19005: CACMW-EB02-071524, CACMW-EB03-071624 CACMW-FB02-071524, CACMW-FB03-071624

ii. Are all results less than LoQ or RL?
Yes ☒ No ☐ N/A ☐
Comments: All detections were below LOD. See checklist ZG19005 for details.

iii. If above LoQ or RL, specify what samples are affected.
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated blank concentration. No samples were affected.

iv. Are data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

7. Other Data Flags/Qualifiers (ACOE, AFCEE, Lab Specific, etc.)

a. Are they defined and appropriate?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ADEC Contaminated Sites Program Laboratory Data Review Checklist

Completed By:	Leslie Brooks	**CS Site Name:**	Eielson AFB Basewide PFAS	**Lab Name:**	Pace Analytical Services
Title:	Environmental Scientist	**ADEC File No.:**	107.38.150	**Lab Report No.:**	ZG18020
Consulting Firm:	Arctic Data Services	**Hazard ID No.:**	26773	**Lab Report Date:**	August 22, 2024

Note: *Any N/A or No box checked must have an explanation in the comments box.*

1. **Laboratory**

   a. Did an ADEC Contaminated Sites Laboratory Approval Program (CS-LAP) approved laboratory receive and perform all of the submitted sample analyses?
   Yes ☒ No ☐ N/A ☐
   Comments: All samples were received and analyzed by Pace Analytical Services – West Columbia, South Carolina. The laboratory is ADEC CS approved for the analyses performed, where required

   b. If the samples were transferred to another "network" laboratory or sub-contracted to an alternate laboratory, was the laboratory performing the analyses CS-LAP approved?
   Yes ☐ No ☐ N/A ☒
   Comments: No samples were transferred to or analyzed by another laboratory.

2. **Chain of Custody (CoC)**

   a. Is the CoC information completed, signed, and dated (including released/received by)?
   Yes ☒ No ☐ N/A ☐
   Comments: Click or tap here to enter text.

   b. Were the correct analyses requested?
   Yes ☒ No ☐ N/A ☐
   Analyses requested: PFAS (1633)
   Comments: Click or tap here to enter text.

3. **Laboratory Sample Receipt Documentation**

   a. Is the sample/cooler temperature documented and within range at receipt (0° to 6° C)?
   Yes ☒ No ☐ N/A ☐

Cooler temperature(s): 2.4
Comments: Samples were received within acceptable temperature range.

b. Is the sample preservation acceptable – acidified waters, methanol preserved soil (GRO, BTEX, VOCs, etc.)?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Is the sample condition documented – broken, leaking, zero headspace (VOA vials); canister vacuum/pressure checked and no open valves, etc.?
Yes ☒ No ☐ N/A ☐
Comments: Samples were received in good condition.

d. If there were any discrepancies, were they documented? For example, incorrect sample containers/preservation, sample temperature outside of acceptable range, insufficient or missing samples, canister not holding a vacuum, etc.?
Yes ☐ No ☐ N/A ☒
Comments: There were no sample receiving discrepancies.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability are not affected.

4. Case Narrative

a. Is the case narrative present and understandable?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are there discrepancies, errors, or QC failures identified by the lab?
Yes ☐ No ☒ N/A ☐
Comments: The laboratory report case narrative documented QC anomalies which are addressed in the following relevant sections of this checklist.

Additionally, the laboratory qualified PFOS results in both the initial and reanalysis of sample CACMW-004-110-071224 as having exceeded the calibration range. Affected results are qualified 'J' as estimated for exceeding the calibration range.

c. Were all the corrective actions documented?
Yes ☐ No ☐ N/A ☒
Comments: The following corrective actions were noted in the case narrative. Surrogate recovery for the following sample was outside control limits: ZG18020-001, ZG18020-002, ZG18020-004, ZG18020-005. Re-extraction and/or re-analysis was performed outside of holding time and all data has been reported.

d. What is the effect on data quality/usability according to the case narrative?
Comments: The case narrative made no comments on data quality or usability.

5. Sample Results

a. Are the correct analyses performed/reported as requested on CoC?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are all applicable holding times met?
Yes ☐ No ☒ N/A ☐
Comments: Reanalysis for samples CACMW-004-110-071224, CACMW-004-160-071224, CACMW-005-160-071224, and CACMW-GW-FD01-071224 were extracted 5 days past the recommended 28-day extraction holding time. Affected results are qualified as estimated ('J' for detects and 'UJ' for non-detects).

c. Are all soils reported on a dry weight basis?
Yes ☐ No ☐ N/A ☒
Comments: No soil samples were submitted in this workorder.

d. Are the reported limits of quantitation (LoQ) or limits of detections (LOD), or reporting limits (RL) less than the Cleanup Level or the action level for the project?
Yes ☐ No ☒ N/A ☐
Comments: LOQs and LODs for non-detect results were compared to the Project Screening Levels (PSLs) as defined in Worksheet #15 of the UFP-QAPP. LOQ and LODs for HFPO-DA were above PSLs for all samples

e. Is the data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

6. QC Samples

a. Method Blank

i. Was one method blank reported per matrix, analysis, and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Are all method blank results less than LOQ (or RL)?
Yes ☒ No ☐
Comments: The following were detected in method blanks below the LOQ and LOD but above the DL:
Batch 16172 PFOS 0.36 ng/L

iii. If above LoQ or RL, what samples are affected?
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated method blank concentration. No samples were affected.

iv. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

v. Data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

b. Laboratory Control Sample/Duplicate (LCS/LCSD)

i. Organics – Are one LCS/LCSD reported per matrix, analysis and 20 samples? (LCS/LCSD required per AK methods, LCS required per SW846)
Yes ☐ No ☒ N/A ☐
Comments: Batches 15815 and 16172 had no sample duplicate.

ii. Metals/Inorganics – Are one LCS and one sample duplicate reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods: AK101 60%-120%, AK102 75%-125%, AK103 60%-120%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? Was the RPD reported from LCS/LCSD, and or sample/sample duplicate? (AK Petroleum methods 20%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: N/A; there were no %R or RPD failures.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

vii. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

c. Matrix Spike/Matrix Spike Duplicate (MS/MSD)

i. Organics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: There were no project-specific MS/MSD submitted in this work order. Refer to DQA for evaluation of overall MS/MSD collection frequency. Non-project related MS/MSDs are not reviewed

ii. Metals/Inorganics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? RPD reported from MS/MSD, and or sample/sample duplicate.
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: N/A; see above.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☒ No ☐ N/A ☐
Comments: N/A; see above.

vii. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

d. Surrogates – Organics Only or Isotope Dilution Analytes (IDA) – Isotope Dilution Methods Only

i. Are surrogate/IDA recoveries reported for organic analyses – field, QC, and laboratory samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods 50-150 %R for field samples and 60-120 %R for QC samples; all other analyses see the laboratory report pages)
Yes ☐ No ☒ N/A ☐
Comments: 1633 IDA recoveries for 13C2-Perfluorotetradecanoic acid, d7-MeFOSE, and/or d9-EtFOSE in the initial analysis and reanalysis of samples CACMW-004-110-071224, CACMW-004-160-071224, CACMW-005-160-071224, and CACMW-GW-FD01-071224 were below laboratory limits. Recoveries of d7-MeFOSE and d9-EtFOSE were extremely low (%R < 10%) in several cases. Refer to DQA for details.

iii. Do the sample results with failed surrogate/IDA recoveries have data flags? If so, are the data flags clearly defined?
Yes ☒ No ☐ N/A ☐
Comments: Non-detect results affected by low IDA recovery are qualified 'UJ' indicating there is uncertainty in the absence of the analyte at the reporting limit, due to a low bias. Non-detect results affected by extremely low recovery are qualified ‘X’ as recommended for rejection.

iv. Is the data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

e. Trip Blanks

i. Is one trip blank reported per matrix, analysis, and for each cooler containing volatile samples? Yes ☐ No ☐ N/A ☒
Comments: No volatile analyses were performed in this work order.

ii. Are all results less than LoQ or RL?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. If above LoQ or RL, what samples are affected?
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

f. Field Duplicate

i. Are one field duplicate submitted per matrix, analysis, and 10 project samples?
Yes ☒ No ☐ N/A ☐
Comments: The following field duplicate pair was submitted in this work order: CACMW-004-160-071224 / CACMW-GW-FD01-071224.

ii. Was the duplicate submitted blind to lab?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iii. Precision – All relative percent differences (RPD) less than specified project objectives? (Recommended: 30% water or air, 50% soil)

$$RPD\ (\%) = \left| \frac{R_1 - R_2}{\left(\frac{R_1 + R_2}{2}\right)} \right| X\ 100$$

Where R_1 = Sample Concentration

R_2 = Field Duplicate Concentration

Is the data quality or usability affected? (Explain)

Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iv. Is the data quality or usability affected? (Explain)
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

g. Decontamination or Equipment Blanks

i. Were decontamination or equipment blanks collected?
Yes ☒ No ☐ N/A ☐
Comments: The following field blanks and equipment blanks were reported in SDG ZG19005: CACMW-EB02-071524, CACMW-EB03-071624 CACMW-FB02-071524, CACMW-FB03-071624

ii. Are all results less than LoQ or RL?
Yes ☒ No ☐ N/A ☐
Comments: All detections were below LOD. See checklist ZG19005 for details.

iii. If above LoQ or RL, specify what samples are affected.
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated blank concentration. FOSA in sample CACMW-GW-FD01-071224 is considered affected.

iv. Are data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Affected results below the LOD were qualified with a "UB" as false-positives and are considered non-detect up to the LOD and results above the LOD were qualified with a “J+” as estimated with high bias. Refer to the data quality assessment for discussion of potential impacts to data usability.

7. Other Data Flags/Qualifiers (ACOE, AFCEE, Lab Specific, etc.)

a. Are they defined and appropriate?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ADEC Contaminated Sites Program Laboratory Data Review Checklist

Completed By:	Leslie Brooks	**CS Site Name:**	Eielson AFB Basewide PFAS	**Lab Name:**	Pace Analytical Services
Title:	Environmental Scientist	**ADEC File No.:**	107.38.150	**Lab Report No.:**	ZG19005
Consulting Firm:	Arctic Data Services	**Hazard ID No.:**	26773	**Lab Report Date:**	August 28, 2024

Note: *Any N/A or No box checked must have an explanation in the comments box.*

1. **Laboratory**

   a. Did an ADEC Contaminated Sites Laboratory Approval Program (CS-LAP) approved laboratory receive and perform all of the submitted sample analyses?
   Yes ☒ No ☐ N/A ☐
   Comments: All samples were received and analyzed by Pace Analytical Services – West Columbia, South Carolina. The laboratory is ADEC CS approved for the analyses performed, where required

   b. If the samples were transferred to another "network" laboratory or sub-contracted to an alternate laboratory, was the laboratory performing the analyses CS-LAP approved?
   Yes ☐ No ☐ N/A ☒
   Comments: No samples were transferred to or analyzed by another laboratory.

2. **Chain of Custody (CoC)**

   a. Is the CoC information completed, signed, and dated (including released/received by)?
   Yes ☒ No ☐ N/A ☐
   Comments: Click or tap here to enter text.

   b. Were the correct analyses requested?
   Yes ☒ No ☐ N/A ☐
   Analyses requested: : PFAS (1633)
   Comments: Click or tap here to enter text.

3. **Laboratory Sample Receipt Documentation**

   a. Is the sample/cooler temperature documented and within range at receipt (0° to 6° C)?
   Yes ☒ No ☐ N/A ☐

Cooler temperature(s): 1.7, 2.4, 1.9, 2.7
Comments: Samples were received within acceptable temperature range.

b. Is the sample preservation acceptable – acidified waters, methanol preserved soil (GRO, BTEX, VOCs, etc.)?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Is the sample condition documented – broken, leaking, zero headspace (VOA vials); canister vacuum/pressure checked and no open valves, etc.?
Yes ☒ No ☐ N/A ☐
Comments: Samples were received in good condition.

d. If there were any discrepancies, were they documented? For example, incorrect sample containers/preservation, sample temperature outside of acceptable range, insufficient or missing samples, canister not holding a vacuum, etc.?
Yes ☐ No ☐ N/A ☒
Comments: There were no sample receiving discrepancies.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability are not affected.

4. Case Narrative

a. Is the case narrative present and understandable?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are there discrepancies, errors, or QC failures identified by the lab?
Yes ☐ No ☒ N/A ☐
Comments: The laboratory report case narrative documented QC anomalies which are addressed in the following relevant sections of this checklist.

c. Were all the corrective actions documented?
Yes ☐ No ☐ N/A ☒
Comments: The following corrective actions were noted in the case narrative. The following samples were diluted due to the nature of the sample matrix: ZG19005-001, ZG19005-001MS, ZG19005-001MSD, ZG19005-005, ZG19005-006, ZG19005-007, ZG19005-008, ZG19005-009, ZG19005-014, ZG19005-015. The LOQ has been elevated to reflect the dilution. Samples were dark in color. Surrogate recovery for the following sample was outside control limits: ZG19005-011, ZG19005-013. Re-extraction and/or re-analysis was performed outside of holding time and all data has been reported.

d. What is the effect on data quality/usability according to the case narrative?
Comments: The case narrative made no comments on data quality or usability.

5. Sample Results

a. Are the correct analyses performed/reported as requested on CoC?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are all applicable holding times met?
Yes ☐ No ☒ N/A ☐
Comments: Reanalysis for samples CACMW-EB03-071624 and CACMW-FB04-071624 were extracted 8 days past the recommended 28-day extraction holding time. Field QC samples are not flagged

c. Are all soils reported on a dry weight basis?
Yes ☐ No ☐ N/A ☒
Comments: No soil samples were submitted in this workorder.

d. Are the reported limits of quantitation (LoQ) or limits of detections (LOD), or reporting limits (RL) less than the Cleanup Level or the action level for the project?
Yes ☐ No ☒ N/A ☐
Comments: LOQs and LODs for non-detect results were compared to the Project Screening Levels (PSLs) as defined in Worksheet #15 of the UFP-QAPP. LOQ and LODs for HFPO-DA were above PSLs for all samples

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

6. QC Samples

a. Method Blank

i. Was one method blank reported per matrix, analysis, and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Are all method blank results less than LOQ (or RL)?
Yes ☒ No ☐
Comments: Click or tap here to enter text.

iii. If above LoQ or RL, what samples are affected?
Comments: NA; there were no method blank detections.

iv. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

v. Data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

b. Laboratory Control Sample/Duplicate (LCS/LCSD)

i. Organics – Are one LCS/LCSD reported per matrix, analysis and 20 samples? (LCS/LCSD required per AK methods, LCS required per SW846)
Yes ☐ No ☒ N/A ☐
Comments: Batches 15901 and 16574 had no sample duplicate.

ii. Metals/Inorganics – Are one LCS and one sample duplicate reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods: AK101 60%-120%, AK102 75%-125%, AK103 60%-120%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? Was the RPD reported from LCS/LCSD, and or sample/sample duplicate? (AK Petroleum methods 20%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: N/A; there were no %R or RPD failures.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

vii. Is the data quality or usability affected?

Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

c. Matrix Spike/Matrix Spike Duplicate (MS/MSD)

i. Organics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Sample CACMW-006-060-071524 was submitted with additional volume for MS/MSD analysis.

ii. Metals/Inorganics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable?
Yes ☐ No ☒ N/A ☐
Comments: MS/MSD recoveries were above laboratory limits for PFOS.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? RPD reported from MS/MSD, and or sample/sample duplicate.
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: MS/MSD recovery failures are only considered to affect parent-sample data quality if the spiking concentration is greater than 1/4 the native concentration of the analyte in the parent sample. No samples were affected.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

vii. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

d. Surrogates – Organics Only or Isotope Dilution Analytes (IDA) – Isotope Dilution Methods Only

i. Are surrogate/IDA recoveries reported for organic analyses – field, QC, and laboratory samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods 50-150 %R for field samples and 60-120 %R for QC samples; all other analyses see the laboratory report pages)
Yes ☐ No ☒ N/A ☐
Comments: 1633 IDA recoveries for 13C8-Perfluorooctane sulfonamide in the initial analysis of sample CACMW-EB03-071624 and 13C8-Perfluorooctane sulfonamide and d3-MeFOSSA in the initial analysis of sample CACMW-FB04-071624 were below laboratory limits.

iii. Do the sample results with failed surrogate/IDA recoveries have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: Field QC samples are not flagged.

iv. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

e. Trip Blanks

i. Is one trip blank reported per matrix, analysis, and for each cooler containing volatile samples? Yes ☐ No ☐ N/A ☒
Comments: No volatile analyses were performed in this work order.

ii. Are all results less than LoQ or RL?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. If above LoQ or RL, what samples are affected?
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

f. Field Duplicate

i. Are one field duplicate submitted per matrix, analysis, and 10 project samples?
Yes ☐ No ☒ N/A ☐
Comments: The following field duplicate pairs were submitted in this work order:
CACMW-007-060-071524 / CACMW-GW-FD02-071524
CACMW-008-110-071624 / CACMW-GW-FD03-071624

ii. Was the duplicate submitted blind to lab?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iii. Precision – All relative percent differences (RPD) less than specified project objectives? (Recommended: 30% water or air, 50% soil)

$$RPD\ (\%) = \left| \frac{R_1 - R_2}{\left(\frac{R_1 + R_2}{2}\right)} \right| X\ 100$$

Where R_1 = Sample Concentration

R_2 = Field Duplicate Concentration

Is the data quality or usability affected? (Explain)

Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iv. Is the data quality or usability affected? (Explain)
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

g. Decontamination or Equipment Blanks

i. Were decontamination or equipment blanks collected?
Yes ☒ No ☐ N/A ☐
Comments: The following field blanks and equipment blanks were reported in SDG ZG19005: CACMW-EB02-071524, CACMW-EB03-071624 CACMW-FB02-071524, CACMW-FB03-071624

ii. Are all results less than LoQ or RL?
Yes ☒ No ☐ N/A ☐
Comments: The following were detected below the LOQ and LOD but above the DL:
CACMW-EB03-071624 PFHxS 0.22 ng/l (initial)
CACMW-EB03-071624 PFOS 0.49 ng/l (initial)

CACMW-EB03-071624	PFOA	0.57 ng/l (initial)
CACMW-EB03-071624	PFHxS	0.23 ng/l (reanalysis)
CACMW-EB03-071624	PFHxA	0.28 ng/l (reanalysis)
CACMW-EB03-071624	FOSA	0.31 ng/l (reanalysis)
CACMW-EB03-071624	PFOS	0.51 ng/l (reanalysis)
CACMW-FB04-071624	PFHxS	0.21 ng/l (initial)
CACMW-FB04-071624	PFOS	0.47 ng/l (initial)
CACMW-FB04-071624	PFOA	0.48 ng/l (initial)
CACMW-FB04-071624	PFHxS	0.28 ng/l (reanalysis)
CACMW-FB04-071624	PFOS	0.82 ng/l (reanalysis)
CACMW-FB04-071624	PFOA	0.63 ng/l (reanalysis)

iii. If above LoQ or RL, specify what samples are affected.
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated blank concentration. FOSA in samples CACMW-007-160-071524 and CACMW-008-160-071624 are considered affected.

iv. Are data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Affected results below the LOD were qualified with a "UB" as false-positives and are considered non-detect up to the LOD and results above the LOD were qualified with a “J+” as estimated with high bias. Refer to the data quality assessment for discussion of potential impacts to data usability

7. Other Data Flags/Qualifiers (ACOE, AFCEE, Lab Specific, etc.)

a. Are they defined and appropriate?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

Data Quality Assessment

This letter summarizes the findings of a data quality assessment (DQA) conducted by Arctic Data Services, LLC (ADS) for the above-referenced project data on behalf of Arcadis U.S., Inc. Precision, accuracy, sensitivity, representativeness, comparability, and completeness of the data was evaluated by reviewing laboratory-supplied quality assurance/quality control (QA/QC) information as well as conducting independent QA/QC checks on the data. A Stage 2B data validation was performed on 100% of project sample per- and polyfluoroalkyl substances (PFAS) data, in general accordance with the DoD *General Data Validation Guidelines* (2019) and method-specific modules, where they exist, and the *Uniform Federal Policy – Quality Assurance Project Plan, Data Gap Investigation & Groundwater Pilot Study Construction in Support of the Groundwater Response Action for PFAS Treatment at Site FT009P* (Ahtna Solutions-Arcadis 8(a) Joint Venture, LLC, 2024). Stage 2B validation includes reviewing sample handling, custody, sample-batch level QC information, and instrument-level QC data; applying data qualifiers to sample results affected by anomalies and QC failures; and summarizing the impacts to data quality. This validation exceeds the requirements of the Alaska Department of Environmental Conservation (ADEC) *Technical Memorandum 22-001, Guidelines for Data Reporting* (August 2022). Additionally, Stage 4 data validation was performed on 10% of the project sample data relating to analysis of PFAS as described in the Stage 4 Validation section below; Stage 4 data validation includes Stage 3 recalculation of field and QC sample results.

Laboratory QC-sample recoveries and relative percent differences (RPDs) were compared to measurement quality objectives (MQOs) specified in the UFP-QAPP, EPA Draft Method 1633, and/or laboratory control limits. Field-duplicate RPDs were compared to MQOs defined in Worksheet #12 of the UFP-QAPP for the applicable matrix. Limits of quantitation (LOQs) and limits of detection (LODs) were compared to project screening levels (PSLs) listed in Worksheet #15 of the 2024 UFP-QAPP to evaluate analytical sensitivity.

ADEC laboratory data review checklists (attached) were completed for each laboratory work order and summarize Stage 2A data validation findings. Separate checklists were prepared summarizing Stage 2B data validation findings and are also attached. Table 1 (attached) provides a list of qualified results. Table 2 lists the samples that were randomly selected for Stage 3/4 validation. Tables 3 through 5 summarize results recalculated in the course of Stage 3 data validation. The following sections provide a summary of data validation findings for each QA/QC element reviewed; failures or anomalies that had no impact to data quality are discussed in the checklists and are not further described herein.

Sample Analysis Summary

A total of 226 passive flux meter (PFM) resin samples (including field duplicates) were collected and submitted in five sample delivery groups (SDGs) to Pace Columbia for analysis of the following:

- Per- and polyfluoroalkyl substances (PFAS) by EPA Draft Method 1633

Stage 2A Data Validation

The following sections summarize findings of a Stage 2A data validation, which includes review of preparatory-batch-level QC information. Only failures affecting project-sample data quality are discussed here; for more information, refer to the attached ADEC laboratory data review checklists.

Sample Preservation, Handling, Custody, and Holding Times

Sample receipt forms were reviewed to check that samples were received in good condition, properly preserved, and within the required temperature range. Chain of custody forms were reviewed to confirm that custody was not breached during sample handling. Dates of sample collection, preparation, and analysis were compared to check that method holding times were not exceeded.

There were no handling, custody, or holding time failures determined to affect project-sample data quality; see checklists for details.

Method Blanks

The laboratories analyzed and reported a method blank (MB) sample for each preparatory batch, to check for laboratory-based sample contamination. If and where analytes were detected in a MB, corresponding project-sample results were compared to the MB concentration and were considered potentially affected if detected within 5 times the MB concentration. Affected results above the LOD are qualified with 'J+' flags indicating the results are estimated with a high bias and results below the LOD were qualified with 'UB' flags as false-positives and are considered non-detect up to the LOD. This flagging criteria is in accordance with the *Data Validation*

Guidelines Modules 1, 3, 3, and 4 Revised Table for Sample Qualification in the Presence of Blank Contamination (DoD, 2022).

The following method blank detections were determined to affect project-sample data quality:

- **ZI12013.** There was one method blank detection below the LOQ but above the DL. One perfluorooctane sulfonamide (FOSA) result was affected; refer to the checklist and Table 1 for details.
- **ZI12016.** There were five method blank detections below the LOQ but above the DL. A total of 16 FOSA results were affected; refer to the checklist and Table 1 for details.
- **ZI12017.** There were three method blank detections below the LOQ but above the DL. A total of 16 FOSA results were affected; refer to the checklist and Table 1 for details.

Laboratory Control Samples and Duplicates

The laboratory analyzed and reported a laboratory control sample (LCS) for each preparatory batch, to assess laboratory extraction efficiency and analytical accuracy. In some cases, LCS duplicates (LCSDs) were used to assess analytical precision. LCS/LCSD recovery information and LCSD RPD information (where available) were reviewed.

The following LCS/LCSD recovery and/or RPD failures were determined to affect project-sample data quality:

- **ZI12016**. LCS recovery of FOSA was above control limits in batches 18871, 18873, and 19251. FOSA results for 10 project samples are considered affected and were qualified 'J+' as estimated with high bias. See checklist and Table 1 for details.

Matrix Spike Samples

Matrix spikes (MS) and MS duplicates (MSD) were analyzed for select organic batches, to evaluate potential matrix interference affecting accuracy and/or precision. MS/MSD recovery and RPDs were evaluated only if the parent sample (the sample spiked for the MS/MSD) was in the project-sample set. Additionally, MS/MSD recovery failures are only considered to affect parent-sample data quality if the spiking concentration is at least 3 times greater than the native concentration of the analyte in the parent sample.

Samples CACMW-007-060-37.5-081724-FM-R and CACMW-008-060-27-090624-FM-R were submitted with additional volume for project-specific MS/MSD analysis. Additionally, the laboratory performed MS/MSD analysis on several other samples for batch QC purposes.

The following MS/MSD recovery and/or RPD failures were determined to affect project-sample data quality:

- **ZH22013.** MSD RPD for perfluorohexane sulfonic acid (PFHxS) was above control limits in the MSD of parent sample CACMW-007-060-37.5-081724-FM-R. The affected result was qualified 'J' as estimated; see checklist and Table 1 for details.
- **ZI12017.** MSD RPD for perfluorooctanoic acid (PFOA) was above control limits in the MSD of parent sample CACMW-005-110-82.25-090524-FM-R. The affected result was qualified 'J' as estimated; see checklist and Table 1 for details.

Extracted Internal Standard Recoveries

Samples submitted for PFAS analysis were spiked with radio-labelled extracted internal standards (EIS; also referred to as isotope dilution analytes) to evaluate accuracy, check for matrix interference on a sample-specific basis, and to quantify the associated target analyte(s). Due to the nature of isotope dilution, a direction of bias is not inferred for EIS recovery failures; the results are quantitated using the EIS as an analyte-specific internal standard, thereby correcting for low or high bias.

The following EIS recovery failures were determined to affect project-sample data quality:

- **ZH22013.** There were two EIS recovery failures for sample CACMW-003-160-153.25-081524-FM-R. 2-N-ethylperfluoro-1-octanesulfonamido-ethanol (EtFOSE) and 2-N-methylperfluoro-1-octanesulfonamido-ethanol (MeFOSE) were qualified 'X' as recommended for rejection due to extremely low recovery. See checklist and Table 1 for details.

Field Duplicates

Ten field duplicate samples were collected and submitted blind to the laboratory for 216 primary samples just short of the required frequency of one per 20 primary samples (specified in the UFP-QAPP). RPDs between field-duplicate results were calculated; where analytes were not detected, the LOD was used in the calculation. RPDs were compared to a MQO of 50% for solids.

There were no field duplicate RPD failures considered to affect project-sample data quality.

Field Blanks

Samples CACMW-CO-1-081924, CACMW-CO-2-081924, CACMW-CO-3-081924, CACMW-CO-4-081924, and CACMW-CO-5-081924 were collected as field blanks (FB) and submitted with resin samples in SDG ZH22013; the FBs were conservatively assumed to correspond to all resin samples in SDGs ZH22011 and ZH22013.

Samples CACMW-CO-1-090924, CACMW-CO-2-090924, CACMW-CO-3-090924, and CACMW-CO-4-090924 were collected as field blanks (FB) and submitted with resin samples in SDG ZI12013; the FBs were conservatively assumed to correspond to all resin samples in SDGs ZI12013, ZI12016, and ZI12017.

The FBs were used to check for potential cross-contamination of samples from sample handling processes. Where analytes were detected in the blanks, corresponding project-sample results were compared to the blank concentration and were considered potentially affected if detected within 5 times the blank concentration in resin samples. Professional judgement was used to determine if data quality was affected for individual results, depending upon relative collection times and concentrations of associated samples. Affected results above the LOD are qualified with 'J+' flags indicating the results are estimated with a high bias and results below the LOD were qualified with 'UB' flags as false-positives and are considered non-detect up to the LOD.

The following FB detections were considered to affect project-sample data quality:

- **ZH22011**. Seven PFAS analytes were detected in one or more FBs (reported in SDG ZH22013). A total of 350 results were considered affected; see checklist and Table 1 for details.
- **ZH22013**. Seven PFAS analytes were detected in one or more FBs reported in this SDG. A total of 252 results were considered affected; see checklist and Table 1 for details.
- **ZI12013**. Six PFAS analytes were detected in one or more FBs reported in this SDG. A total of 117 results were considered affected; see checklist and Table 1 for details.
- **ZI12016**. Six PFAS analytes were detected in one or more FBs (reported in SDG ZI12013). A total of 189 results were considered affected; see checklist and Table 1 for details.
- **ZI12017**. Six PFAS analytes were detected in one or more FBs (reported in SDG ZI12013). A total of 148 results were considered affected; see checklist and Table 1 for details.

Other QC Anomalies

The laboratory reported the following QC failures that were considered to affect project-sample data quality:

- **ZH22011**. The laboratory qualified PFOS in sample CACMW-004-110-92.75-081624-FM-R as having exceeded the calibration range. The affected result is qualified 'J' as estimated for exceeding the calibration range.

Resolution of Multiple Qualifiers

In the instance that a single result was affected by multiple QC anomalies imparting differing qualifiers or a conflicting bias, a decision was made as to the most appropriate and conservative qualifier for the final result, as follows.

- Five results were affected by FB detections ('J+') and ion ratio failures ('J'). Since the direction of bias is not entirely clear, the 'J' flag is retained as the final qualifier.
- Two results were affected by MB detections ('UB') and high LCS recovery failures ('J+'). Because the results were below the LOD and likely attributable to laboratory-based sample contamination, the 'UB' flag is retained as the final qualifier.

Stage 2B Data Validation

The following sections summarize findings of a Stage 2B data validation of the PFAS dataset, which includes review of instrument-level QC information. Only failures affecting project-sample data quality are discussed here; for more information, refer to the attached Stage 2B data validation checklists.

Additional Stage 2A 1633 PFAS Checks

Additional Stage 2A checks are included in the Stage 2B data validation as they are method-specific and are not covered by the standard ADEC Laboratory Data Review Checklist. For LC-MS/MS Methods, additional Stage 2A checks include ion rations, non-extracted internal standards (NIS), low-level laboratory control samples (LLCS), bile salt interference, and qualitative identification standards compared to method or QSM criteria.

The following anomalies were determined to affect project-sample data quality:

- **ZH22011**. N-Methylperfluoroocatane sulfonamidoacetic acid (MeFOSAA) in sample CACMW-008-110-103.25-081724-FM-R and perfluoropentanoic acid (PFPA) in sample CACMW-004-060-37.5-081624-FM-R had ion ratios outside laboratory limits. Affected results were qualified 'J' as estimated; see checklist and Table 1 for details.
- **ZI12013**. PFPA in sample CACMW-007-060-27-090624-FM-R had ion ratios outside laboratory limits. Affected results were qualified 'J' as estimated; see checklist and Table 1 for details.
- **ZI12016**. Perfluorononanoic acid (PFNA) in samples CACMW-001-160-122.25-090424-FM-R and CACMW-002-110-66.5-090424-FM-R had ion ratios outside laboratory limits. Affected results were qualified 'J' as estimated; see checklist and Table 1 for details.
- **ZI12017**. Perfluorotridecanoic acid (PFTriA) in samples CACMW-006-160-132.25-090524-FM-R and CACMW-007-110-82.25-090624-FM-R and PFOA in sample CACMW-008-060-16.5-090624-FM-R had ion ratios outside laboratory limits. Affected results were qualified 'J' as estimated; see checklist and Table 1 for details.

Tuning & Instrument Performance

For LC-MS/MS methods, MS tune checks were evaluated against method-specific criteria. Instrument performance checks, such as mass calibration and mass peak, were reviewed where reported and compared to

method or QSM criteria. There were no tuning or instrument performance anomalies affecting project-sample data quality.

Initial Calibration and Verification

The initial calibration for each analysis was reviewed, to check for compliance with method and/or QSM requirements. This included checking that an appropriate number of standards (calibration points) were used, the frequency of calibrations met method and/or project-specific QC requirements, and that the calibration curve met method requirements (e.g. an $r^2 \geq 0.99$). Initial calibrations were acceptable for each analysis.

ICV samples were verified to be from a second source and were reviewed to verify the accuracy of the initial calibration.

The following ICV recovery failures were determined to affect project-sample data quality:

- **ZH22011**. ICV recovery for 8:2FTS for calibration 092224C-1633+ICAL.b was above laboratory limits. Ten results were considered affected and qualified 'J+' as estimated with high bias; see checklist and Table 1 for details.

Continuing Calibration Verification and Instrument Sensitivity Check

Laboratory batch summaries and/or run logs were reviewed to check that all project samples were bracketed by CCVs, and that CCV percent recoveries were within control limits for target analytes. CCV analysis frequency was acceptable.

The laboratory analyzed and reported instrument sensitivity checks (ISCs) to check instrument detection capabilities at the required reporting limits. Laboratory batch summaries and/or run logs were reviewed to check that an ISC was performed at least once daily prior to sample and analysis, and that ISC percent recoveries were within control limits. ISC analysis frequency and percent recoveries were acceptable.

There were no CCV/ISC recovery failures determined to affect project-sample data quality; see checklists for details.

Instrument Blanks

Laboratory batch summaries and/or run logs were reviewed to check that instrument blanks (IBs) were performed immediately following the highest standard analyzed, daily prior to analyzing standards, after each CCV, and immediately following samples with PFAS concentrations exceeding the quantitation range. Each IB analysis was reviewed to check that IB target analyte concentrations were below one half of the LOQ. IB performance and target analyte concentrations were acceptable.

Stage 3 and 4 Data Validation

The following sections summarize findings of the 10% Stage 3 and Stage 4 data validation, which includes recalculation of select results (Stage 3) and qualitative review of analyte identification and quantitation (Stage 4). A random selection of 10% of project field samples per SDG were selected for recalculation. All instrument QC samples related to field sample analysis were recalculated. Associated preparatory-batch QC samples (MB, LCS/LCSD, MS/MSD) were recalculated. Only target analytes that were detected in one or more field samples were recalculated. For all selected samples, EIS recoveries were recalculated and compared to reported recoveries. Standards traceability was also reviewed.

For Stage 4 validation, target compound identification and manual integrations were reviewed as described below; there were no tentatively identified compounds reported for this project.

Instrument Calibration, Performance, and Instrument QC Samples

Initial calibrations were recalculated using raw instrument responses from the quantitation reports for calibration standards. The laboratory used an average response factor (RF) calibration for all methods and analytes. Concentrations were calculated based on associated internal standards.

ICV and bracketing CCV percent recoveries were recalculated and verified against reported recoveries. IBs were recalculated and verified below one-half the LOQ.

Field Samples and Field/Lab QC Samples

A random selection of 10% of field samples for each SDG were selected for Stage 3 recalculation; see Table 2 for a list of selected samples. For the selected field samples, all detected target analyte results were recalculated and compared to the reported results. Additionally, all EIS recoveries were recalculated and verified against reported percent recoveries.

At least one MB, LCS/LCSD, and MS/MSD per SDG were recalculated. When detections were reported in an associated blank (MB or FB), the sample was selected for recalculation. Overall, recalculated results matched reported results, with occasional slight differences likely due to rounding. For recalculations, no rounding was performed until the very end; the laboratory may have rounded intermediate values, accounting for the slight differences.

No anomalies were identified during recalculation of project field sample and field and lab QC sample results that could not be attributed to rounding differences.

Standards Traceability

Laboratory reports were reviewed to verify the certificates of analysis were included for all stock standard solutions, and that the standards used in the ICV were from a secondary source. Standards preparation logs were reviewed to check that stock standards were diluted properly into working standards for the ICAL and spiking solutions. Standards preparation logs appeared complete and there were no anomalies identified.

Target Compound Identification

Target compound identification was evaluated by qualitatively reviewing signal to noise ratios and relative retention times for target analyte peaks, and presence of valid spectra with passing mass/ion ratios (for MS methods). This evaluation was performed for roughly 10% of positive detections within the randomly selected samples; no anomalies were identified.

Manual Integrations

Manual integrations were noted in the case narratives and with "M" flags on associated results. There was an unusually high frequency of manual integrations in all work orders, for laboratory instrument QC samples, batch QC samples, and field samples, including nearly all detections in field samples. In most cases, the justification listed was "incorrect auto integration". A representative selection of manual integrations was reviewed, comparing the chromatograms before and after manual integration. In general, manual integrations were consistently performed across all field and QC samples and appeared appropriate. However, justification for manual integrations could have been more descriptive (e.g. base-line correction, split peak, etc.).

Summary of Data Quality Indicators

The following sections summarize the findings of the above review with respect to the six data quality indicators: sensitivity, precision, accuracy, representativeness, comparability, and completeness.

Sensitivity

Sensitivity describes the ability of the sampling and analytical methodology to meet detection and/or quantitation limit objectives. Analytical sensitivity was evaluated by checking that LODs for non-detect results were below relevant PSLs. A non-detect result is considered to be adequately sensitive if the LOD is below the PSL.

There were no PSLs for the PFM resin samples. Overall analytical sensitivity is deemed acceptable for the purposes of this project.

Precision

Precision is a measure of the reproducibility of repetitive measurements. Precision was evaluated based on laboratory QC-sample RPDs and field-duplicate RPDs. Two sample results were affected by MSD RPD failures. No sample results were affected by field duplicate RPD failures. Overall precision is deemed acceptable for the purposes of this project.

Accuracy

Accuracy is a measure of the correctness, or the closeness, between the true value and the quantity detected. Accuracy was evaluated based on target-analyte recoveries for laboratory batch-level and instrument-level QC samples, and surrogate recoveries for project samples. Accuracy also may be affected by sample contamination identified in blank samples, or by sample handling, preservation, or holding time anomalies.

Ten results were affected by LCS/LCSD recovery failures. Two results were affected by EIS recovery failures. No results were affected by MS/MSD recovery failures. A total of 1,089 results were affected by sample contamination identified in blank samples (MB or FB). One result was affected by a calibration exceedance. Eight results were affected by ion ratio failures. A total of 10 results were affected by ICV recovery failures. Impact to data usability was generally minor, with the exception of two results that were recommended for rejection ('X'-flagged) due to extremely low EIS recovery. Target analyte and/or EIS recoveries for laboratory QC samples and select field samples were verified through Stage 3 recalculations, with no significant discrepancies identified that would impact project-sample data quality. Overall accuracy is deemed acceptable for the purposes of this project, with exceptions noted above.

Representativeness

Representativeness describes the degree to which data accurately and precisely represent site characteristics. Representativeness is affected by factors such as sample frequency and matrix or contaminant heterogeneity, as well as analytical performance (including sensitivity, accuracy, and precision), sample preservation, handling, and holding times, and sample cross-contamination.

Samples were collected in accordance with an approved work plan, and MQOs defined in the UFP-QAPP were generally met. Sensitivity, precision, and accuracy were acceptable for the purposes of this project. Results qualified due to QC anomalies affecting precision and accuracy are usable as qualified but are not wholly representative of site conditions. Overall, results were considered adequately representative of environmental conditions for the purposes of this project.

Comparability

Comparability describes whether two data sets can be considered equivalent with respect to project goals. Comparability is affected by factors such as sampling methodology and analytical performance (including sensitivity, accuracy, and precision). Comparability was evaluated by checking that standard analytical methods were employed, and analytical performance was acceptable.

Data review findings generally support that the dataset is comparable. Overall comparability should be evaluated by the project team considering sample collection methodology and historic results alongside data quality and analytical methodology.

Completeness

Completeness describes the amount of valid data obtained from the sampling event(s). It is calculated as the percentage of usable measurements compared to the total number of measurements. Two results were recommended for rejection in this review. The dataset is over 99.9% complete. Overall completeness should be reviewed by the project team during data usability assessment. Data usability assessment should include determining whether the two results recommended for rejection during data validation are indeed unusable for the purposes of this project. If so, the 'X' flags and results should be replaced with 'R' flags for final reporting.

Conclusions

Sensitivity, precision, accuracy, representativeness, comparability, and completeness were deemed acceptable, and the data are usable for the purposes of this project. Stage 3/4 validation confirmed target analytes were appropriately identified and quantitated and that results were appropriately calculated. A total of 1,108 results were qualified due to QC anomalies, and two results were recommended for rejection. Qualified results are listed in Table 1.

Limitations

This review was based solely on information provided by the analytical laboratory in the laboratory reports and staged electronic data deliverables for the SDGs reviewed. A data quality assessment reduces the risk of reliance on data of compromised quality; however, it does not eliminate that risk.

Definitions:

ng/g	nanograms per gram
SDG	sample delivery group
CAS	Chemical Abstract Service registry number
DL	detection limit
LOD	limit of detection
LOQ	limit of quantitiation
QC	quality control
N/A	not applicable

Notes:

MB	Method blank detection
FB	Field or equipment blank detection
Ion_ratio	Ion ratio failure
LCS %R	Laboratory control sample percent recovery failure
Cal Exceed	Instrument calibration range was exceeded
HT	Analyzed outside of holding time
Low EIS %R	Extracted internal standard percent recovery below lower control limit
MSD RPD	Matrix spike duplicate sample relative percent difference failure
R<10%	Percent recovery less than 10 percent
ICV	Initial calibration verification failure
CCV	Continuing calibration verification failure

Flags:

J-	The result is estimated with a low bias.
J+	The result is estimated with a high bias.
J	The result is estimated with an unknown bias.
UJ	Not detected and reported less than limit of detection, estimated.
M	The manual integration laboratory qualifier has been preserved with the data as informational data for the end user; there was no impact on the data usability.
UB	The result is considered not detected (less than the listed reporting limit) due to sample contamination identified in an associated blank sample.
X	The result is recommended for rejection

Lab Flags:

B	Detected in the method blank
E	Quantitation of compound exceeded the calibration range
J	Estimated result < LOQ and > DL
L	LCS/LCSD failure
M	Manual integration
Q	Surrogate failure
S	MS/MSD failure
U	Not detected at or above the LOD

Key

	from quantitation report
	from reported calibration
	from lab report/EDD
	calculated value/comparison

%R	percent recovery
Avg	average
Calc.	calculated
CAS	Chemical Abstract Service registry number
CF	concentration factor
Conc.	concentration
EIS	extracted internal standard
IS	internal standard
ND	not detected
ng/L	nanograms per liter
RF	response factor

Key

	from quantitation report
	from reported calibration
	from lab report/EDD
	calculated value/comparison

%R	percent recovery
Avg	average
Calc.	calculated
CAS	Chemical Abstract Service registry number
CF	concentration factor
Conc.	concentration
EIS	extracted internal standard
IS	internal standard
ND	not detected
ng/L	nanograms per liter
RF	response factor

Key

from quantitation report
from reported calibration
from lab report/SEDD
calculated value/comparison

%R	percent recovery
Avg	average
Calc.	calculated
CAS	Chemical Abstract Service registry number
CF	concentration factor
Conc.	concentration
EIS	extracted internal standard
g	grams
IS	internal standard
mL	milliliters
ND	not detected
ng/g	nanograms per gram
ng/L	nanograms per liter
On Col.	on column
RF	response factor
RPD	relative percent difference

Key

	from quantitation report
	from reported calibration
	from lab report/SEDD
	calculated value/comparison

%R	percent recovery
Avg	average
Calc.	calculated
CAS	Chemical Abstract Service registry number
CF	concentration factor
Conc.	concentration
EIS	extracted internal standard
g	grams
IS	internal standard
mL	milliliters
ND	not detected
ng/g	nanograms per gram
ng/L	nanograms per liter
On Col.	on column
RF	response factor
RPD	relative percent difference

Key

	from quantitation report
	from reported calibration
	from lab report/SEDD
	calculated value/comparison

%R	percent recovery
Avg	average
Calc.	calculated
CAS	Chemical Abstract Service registry number
CF	concentration factor
Conc.	concentration
EIS	extracted internal standard
g	grams
IS	internal standard
mL	milliliters
ND	not detected
ng/g	nanograms per gram
ng/L	nanograms per liter
On Col.	on column
RF	response factor
RPD	relative percent difference

Key

	from quantitation report
	from reported calibration
	from lab report/SEDD
	calculated value/comparison

%R	percent recovery
Avg	average
Calc.	calculated
CAS	Chemical Abstract Service registry number
CF	concentration factor
Conc.	concentration
EIS	extracted internal standard
g	grams
IS	internal standard
mL	milliliters
ND	not detected
ng/g	nanograms per gram
ng/L	nanograms per liter
On Col.	on column
RF	response factor
RPD	relative percent difference

ADEC Contaminated Sites Program Laboratory Data Review Checklist

Completed By:	Hannah Woody	**CS Site Name:**	Eielson AFB Basewide PFAS	**Lab Name:**	Pace Analytical Services
Title:	Environmental Scientist	**ADEC File No.:**	107.38.150	**Lab Report No.:**	ZH22011
Consulting Firm:	Arctic Data Services	**Hazard ID No.:**	26773	**Lab Report Date:**	October 7, 2024

Note: *Any N/A or No box checked must have an explanation in the comments box.*

1. **Laboratory**

   a. Did an ADEC Contaminated Sites Laboratory Approval Program (CS-LAP) approved laboratory receive and perform all of the submitted sample analyses?
   Yes ☒ No ☐ N/A ☐
   Comments: All samples were received and analyzed by Pace Analytical Services – West Columbia, South Carolina. The laboratory is ADEC CS approved for the analyses performed, where required

   b. If the samples were transferred to another "network" laboratory or sub-contracted to an alternate laboratory, was the laboratory performing the analyses CS-LAP approved?
   Yes ☐ No ☐ N/A ☒
   Comments: No samples were transferred to or analyzed by another laboratory.

2. **Chain of Custody (CoC)**

   a. Is the CoC information completed, signed, and dated (including released/received by)?
   Yes ☐ No ☒ N/A ☐
   Comments: The CoC is missing a release signature.

   b. Were the correct analyses requested?
   Yes ☒ No ☐ N/A ☐
   Analyses requested: PFAS (1633)
   Comments: Click or tap here to enter text.

3. **Laboratory Sample Receipt Documentation**

   a. Is the sample/cooler temperature documented and within range at receipt (0° to 6° C)?
   Yes ☒ No ☐ N/A ☐

Cooler temperature(s): 3.7, 5.8
Comments: Samples were received within acceptable temperature range.

b. Is the sample preservation acceptable – acidified waters, methanol preserved soil (GRO, BTEX, VOCs, etc.)?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Is the sample condition documented – broken, leaking, zero headspace (VOA vials); canister vacuum/pressure checked and no open valves, etc.?
Yes ☒ No ☐ N/A ☐
Comments: Samples were received in good condition.

d. If there were any discrepancies, were they documented? For example, incorrect sample containers/preservation, sample temperature outside of acceptable range, insufficient or missing samples, canister not holding a vacuum, etc.?
Yes ☐ No ☐ N/A ☒
Comments: There were no sample receiving discrepancies.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability are not affected.

4. Case Narrative

a. Is the case narrative present and understandable?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are there discrepancies, errors, or QC failures identified by the lab?
Yes ☒ No ☐ N/A ☐
Comments: The laboratory report case narrative documented QC anomalies addressed in the following relevant sections of this checklist or the relevant sections of the 2B checklist.

c. Were all the corrective actions documented?
Yes ☐ No ☐ N/A ☒
Comments: No corrective actions were required or performed.

d. What is the effect on data quality/usability according to the case narrative?
Comments: The case narrative made no comments on data quality or usability.

5. Sample Results

a. Are the correct analyses performed/reported as requested on CoC?
Yes ☒ No ☐ N/A ☐

Comments: Click or tap here to enter text.

b. Are all applicable holding times met?
Yes ☒ No ☐ N/A ☐
Comments:

c. Are all soils reported on a dry weight basis?
Yes ☐ No ☐ N/A ☒
Comments: No soil samples were submitted in this workorder.

d. Are the reported limits of quantitation (LoQ) or limits of detections (LOD), or reporting limits (RL) less than the Cleanup Level or the action level for the project?
Yes ☐ No ☐ N/A ☒
Comments: PFM Resin does not have ADEC or other screening limits.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability was not affected.

6. QC Samples

a. Method Blank

i. Was one method blank reported per matrix, analysis, and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Are all method blank results less than LOQ (or RL)?
Yes ☒ No ☐
Comments: Click or tap here to enter text.

iii. If above LoQ or RL, what samples are affected?
Comments: Click or tap here to enter text.

iv. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

v. Data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

b. Laboratory Control Sample/Duplicate (LCS/LCSD)

i. Organics – Are one LCS/LCSD reported per matrix, analysis and 20 samples? (LCS/LCSD required per AK methods, LCS required per SW846)
Yes ☐ No ☒ N/A ☐
Comments: There were no LCSD reported. MSDs were generally used to check batch precision; however, batches 18180, 18510, and 18516 had no QC duplicate.

ii. Metals/Inorganics – Are one LCS and one sample duplicate reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods: AK101 60%-120%, AK102 75%-125%, AK103 60%-120%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? Was the RPD reported from LCS/LCSD, and or sample/sample duplicate? (AK Petroleum methods 20%; all other analyses see the laboratory QC pages)
Yes ☐ No ☐ N/A ☒
Comments: There were no LCSDs performed.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: N/A; there were no %R or RPD failures.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

vii. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected. Batch precision could not be evaluated for those batches missing QC duplicates (see above).

c. Matrix Spike/Matrix Spike Duplicate (MS/MSD)

i. Organics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Samples CACMW-004-060-53.25-081624-FM-R, CACMW-005-110-92.75-081624-FM-R, CACMW-007-160-148-081724-FM-R, and FD-2-081724-FM-R were selected by the laboratory for MS/MSD analysis.

ii. Metals/Inorganics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable?
Yes ☐ No ☒ N/A ☐
Comments: MS/MSD recoveries were outside laboratory limits for PFOS in sample CACMW-004-060-53.25-081624-FM-R and PFOS, PFHxS, and PFOA in sample CACMW-005-110-92.75-081624-FM-R.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? RPD reported from MS/MSD, and or sample/sample duplicate.
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: MS/MSD recovery failures are only considered to affect parent-sample data quality if the spiking concentration is at least 3 times greater than the native concentration of the analyte in the parent sample. No samples were affected.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

vii. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

d. Surrogates – Organics Only or Isotope Dilution Analytes (IDA) – Isotope Dilution Methods Only

i. Are surrogate/IDA recoveries reported for organic analyses – field, QC, and laboratory samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods 50-150 %R for field samples and 60-120 %R for QC samples; all other analyses see the laboratory report pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iii. Do the sample results with failed surrogate/IDA recoveries have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: There were no IDA recovery failures.

iv. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

e. Trip Blanks

i. Is one trip blank reported per matrix, analysis, and for each cooler containing volatile samples? Yes ☐ No ☐ N/A ☒
Comments: No volatile analyses were performed in this work order.

ii. Are all results less than LoQ or RL?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. If above LoQ or RL, what samples are affected?
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

f. Field Duplicate

i. Are one field duplicate submitted per matrix, analysis, and 10 project samples?
Yes ☐ No ☒ N/A ☐

Comments: The following field duplicate pairs were submitted in this work order:
CACMW-004-060-37.5-081624-FM-R / FD-1-081624-FM-R
CACMW-007-160-148-081724-FM-R / FD-2-081724-FM-R
CACMW-008-110-98-081724-FM-R / FD-3-081724-FM-R

Refer to DQA for overall evaluation of field duplicate collection frequency.

ii. Was the duplicate submitted blind to lab?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iii. Precision – All relative percent differences (RPD) less than specified project objectives? (Recommended: 30% water or air, 50% soil)

$$RPD\ (\%) = \left| \frac{R_1 - R_2}{\left(\frac{R_1 + R_2}{2}\right)} \right| X\ 100$$

Where R_1 = Sample Concentration

R_2 = Field Duplicate Concentration

Is the data quality or usability affected? (Explain)

Yes ☒ No ☐ N/A ☐
Comments: N/A; see above

iv. Is the data quality or usability affected? (Explain)
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

g. Decontamination or Equipment Blanks

i. Were decontamination or equipment blanks collected?
Yes ☒ No ☐ N/A ☐
Comments: The following samples were submitted as field blanks and reported in SDG ZH22013:
CACMW-CO-1-081924, CACMW-CO-2-081924, CACMW-CO-3-081924, CACMW-CO-4-081924, and CACMW-CO-5-081924

ii. Are all results less than LoQ or RL?
Yes ☐ No ☒ N/A ☐
Comments: See checklist ZH22013 for details.

iii. If above LoQ or RL, specify what samples are affected.
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated blank

concentration. 6:2FTS, PFNA, PFOA, PFTriA, PFUnA, PFDA, and PFHxA in all samples in this work order are considered affected.

iv. Are data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Affected results below the LOD were qualified with a "UB" as false-positives and are considered non-detect up to the LOD and results above the LOD were qualified with a “J+” as estimated with high bias. Refer to the data quality assessment for discussion of potential impacts to data usability.

7. Other Data Flags/Qualifiers (ACOE, AFCEE, Lab Specific, etc.)

a. Are they defined and appropriate?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ADEC Contaminated Sites Program Laboratory Data Review Checklist

Completed By:	Hannah Woody	**CS Site Name:**	Eielson AFB Basewide PFAS	**Lab Name:**	Pace Analytical Services
Title:	Environmental Scientist	**ADEC File No.:**	107.38.150	**Lab Report No.:**	ZH22013
Consulting Firm:	Arctic Data Services	**Hazard ID No.:**	26773	**Lab Report Date:**	October 4, 2024

Note: *Any N/A or No box checked must have an explanation in the comments box.*

1. **Laboratory**

   a. Did an ADEC Contaminated Sites Laboratory Approval Program (CS-LAP) approved laboratory receive and perform all of the submitted sample analyses?
   Yes ☒ No ☐ N/A ☐
   Comments: All samples were received and analyzed by Pace Analytical Services – West Columbia, South Carolina. The laboratory is ADEC CS approved for the analyses performed, where required

   b. If the samples were transferred to another "network" laboratory or sub-contracted to an alternate laboratory, was the laboratory performing the analyses CS-LAP approved?
   Yes ☐ No ☐ N/A ☒
   Comments: No samples were transferred to or analyzed by another laboratory.

2. **Chain of Custody (CoC)**

   a. Is the CoC information completed, signed, and dated (including released/received by)?
   Yes ☐ No ☒ N/A ☐
   Comments: The CoC is missing release date and time.

   b. Were the correct analyses requested?
   Yes ☒ No ☐ N/A ☐
   Analyses requested: PFAS (1633)
   Comments: Click or tap here to enter text.

3. **Laboratory Sample Receipt Documentation**

   a. Is the sample/cooler temperature documented and within range at receipt (0° to 6° C)?
   Yes ☒ No ☐ N/A ☐

Cooler temperature(s): 3.7, 5.8
Comments: Samples were received within acceptable temperature range.

b. Is the sample preservation acceptable – acidified waters, methanol preserved soil (GRO, BTEX, VOCs, etc.)?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Is the sample condition documented – broken, leaking, zero headspace (VOA vials); canister vacuum/pressure checked and no open valves, etc.?
Yes ☒ No ☐ N/A ☐
Comments: Samples were received in good condition.

d. If there were any discrepancies, were they documented? For example, incorrect sample containers/preservation, sample temperature outside of acceptable range, insufficient or missing samples, canister not holding a vacuum, etc.?
Yes ☐ No ☐ N/A ☒
Comments: There were no sample receiving discrepancies.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability are not affected.

4. Case Narrative

a. Is the case narrative present and understandable?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are there discrepancies, errors, or QC failures identified by the lab?
Yes ☒ No ☐ N/A ☐
Comments: The laboratory report case narrative documented QC anomalies addressed in the following relevant sections of this checklist.

c. Were all the corrective actions documented?
Yes ☐ No ☐ N/A ☒
Comments: No corrective actions were required or performed.

d. What is the effect on data quality/usability according to the case narrative?
Comments: The case narrative made no comments on data quality or usability.

5. Sample Results

a. Are the correct analyses performed/reported as requested on CoC?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are all applicable holding times met?
Yes ☒ No ☐ N/A ☐
Comments:

c. Are all soils reported on a dry weight basis?
Yes ☐ No ☐ N/A ☒
Comments: No soil samples were submitted in this workorder.

d. Are the reported limits of quantitation (LoQ) or limits of detections (LOD), or reporting limits (RL) less than the Cleanup Level or the action level for the project?
Yes ☐ No ☐ N/A ☒
Comments: PFM Resin does not have ADEC or other screening limits..

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability was not affected.

6. QC Samples

a. Method Blank

i. Was one method blank reported per matrix, analysis, and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Are all method blank results less than LOQ (or RL)?
Yes ☐ No ☒
Comments: The following were detected in method blanks
Batch 18303 PFOS 0.026 ng/g
Batch 18516 PFOS 0.027 ng/g

iii. If above LoQ or RL, what samples are affected?
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated method blank concentration. No samples were affected.

iv. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

v. Data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

b. Laboratory Control Sample/Duplicate (LCS/LCSD)

i. Organics – Are one LCS/LCSD reported per matrix, analysis and 20 samples? (LCS/LCSD required per AK methods, LCS required per SW846)
Yes ☒ No ☐ N/A ☐
Comments: There were no LCSD reported. MSDs were generally used to check batch precision; however, batches 17976, 18515, 18251, and 18516 had no QC duplicate.

ii. Metals/Inorganics – Are one LCS and one sample duplicate reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods: AK101 60%-120%, AK102 75%-125%, AK103 60%-120%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? Was the RPD reported from LCS/LCSD, and or sample/sample duplicate? (AK Petroleum methods 20%; all other analyses see the laboratory QC pages)
Yes ☐ No ☐ N/A☒
Comments: N/A; no LCSD were reported.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: N/A; there were no %R failures.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

vii. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected. Batch precision could not be evaluated for those batches missing QC duplicates (see above).

c. Matrix Spike/Matrix Spike Duplicate (MS/MSD)

i. Organics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☒ N/A ☐
Comments: Samples CACMW-002-110-92.75-081524-FM-R, CACMW-003-110-108.5-081624-FM-R, CACMW-003-110-870.5-081624-FM-R, CACMW-003-160-153.25-081524-FM-R, CACMW-007-060-37.5-081724-FM-R were selected by the laboratory for MS/MSD analysis.

ii. Metals/Inorganics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable?
Yes ☐ No ☒ N/A ☐
Comments: MS/MSD recoveries were outside laboratory limits for the following: PFHxS, PFOA, 6:2FTS, and PFHxA in sample CACMW-002-110-92.75-081524-FM-R. PFHxS, PFOS, and 6:2FTS in sample CACMW-003-160-153.25-081524-FM-R. PFHxS, PFOS, and 6:2FTS in sample CACMW-007-060-37.5-081724-FM-R. PFHxS and PFOS, in sample CACMW-003-110-108.5-081624-FM-R. PFOS in sample CACMW-003-110-870.5-081624-FM-R.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? RPD reported from MS/MSD, and or sample/sample duplicate.
Yes ☐ No ☒ N/A ☐
Comments: MSD RPD was above laboratory limits for PFHxS in sample CACMW-007-060-37.5-081724-FM-R.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: MS/MSD recovery failures are only considered to affect parent-sample data quality if the spiking concentration is at least 3 times greater than the native concentration of the analyte in the parent sample. No samples were affected by recovery failures. CACMW-007-060-37.5-081724-FM-R is considered affected by the RPD failure.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?

Yes ☒ No ☐ N/A ☐
Comments: Results affected by RPD failure were qualified “J” as estimated with indeterminate bias.

vii. Is the data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

d. Surrogates – Organics Only or Isotope Dilution Analytes (IDA) – Isotope Dilution Methods Only

i. Are surrogate/IDA recoveries reported for organic analyses – field, QC, and laboratory samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods 50-150 %R for field samples and 60-120 %R for QC samples; all other analyses see the laboratory report pages)
Yes ☐ No ☒ N/A ☐
Comments: 1633 IDA recoveries for d7-MeFOSE and d9-EtFOSE in the initial analysis of CACMW-003-160-153.25-081524-FM-R were below laboratory limits. Recoveries of d7-MeFOSE and d9-EtFOSE were extremely low (%R < 10%). Additionally, several IDA recoveries were below limits for the MS/MSD of CACMW-002-110-92.75-081524-FM-RM and CACMW-003-160-153.25-081524-FM-R.

iii. Do the sample results with failed surrogate/IDA recoveries have data flags? If so, are the data flags clearly defined?
Yes ☒ No ☐ N/A ☐
Comments: Non-detect results affected by extremely low recovery are qualified ‘X’ as recommended for rejection.

iv. Is the data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

e. Trip Blanks

i. Is one trip blank reported per matrix, analysis, and for each cooler containing volatile samples? Yes ☐ No ☐ N/A ☒
Comments: No volatile analyses were performed in this work order.

ii. Are all results less than LoQ or RL?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. If above LoQ or RL, what samples are affected?
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

f. Field Duplicate

i. Are one field duplicate submitted per matrix, analysis, and 10 project samples?
Yes ☐ No ☐ N/A ☒
Comments: No field duplicates were submitted with this work order. Refer to the data quality assessment for evaluation of overall field duplicate collection frequency.

ii. Was the duplicate submitted blind to lab?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above

iii. Precision – All relative percent differences (RPD) less than specified project objectives? (Recommended: 30% water or air, 50% soil)

$$RPD\ (\%) = \left| \frac{R_1 - R_2}{\left(\frac{R_1 + R_2}{2}\right)} \right| X\ 100$$

Where R_1 = Sample Concentration

R_2 = Field Duplicate Concentration

Is the data quality or usability affected? (Explain)

Yes ☐ No ☐ N/A ☒
Comments: N/A; see above

iv. Is the data quality or usability affected? (Explain)
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

g. Decontamination or Equipment Blanks

i. Were decontamination or equipment blanks collected?
Yes ☐ No ☐ N/A ☒

Comments: The following samples were submitted as field blanks and reported in SDG ZH22013:
CACMW-CO-1-081924, CACMW-CO-2-081924, CACMW-CO-3-081924, CACMW-CO-4-081924, and CACMW-CO-5-081924.

ii. Are all results less than LoQ or RL?
Yes ☐ No ☒ N/A ☐
Comments: 6:2FTS, PFNA, PFOA, PFTriA, PFUnA, PFDA, and/or PFHxA were detected in one or more field blank.

iii. If above LoQ or RL, specify what samples are affected.
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated blank concentration. 6:2FTS, PFNA, PFOA, PFTriA, PFUnA, PFDA, and PFHxA in all samples in this work order are considered affected.

iv. Are data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Affected results below the LOD were qualified with a "UB" as false-positives and are considered non-detect up to the LOD and results above the LOD were qualified with a “J+” as estimated with high bias. Refer to the data quality assessment for discussion of potential impacts to data usability

7. Other Data Flags/Qualifiers (ACOE, AFCEE, Lab Specific, etc.)

a. Are they defined and appropriate?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ADEC Contaminated Sites Program Laboratory Data Review Checklist

Completed By:	Hannah Woody	**CS Site Name:**	Eielson AFB Basewide PFAS	**Lab Name:**	Pace Analytical Services
Title:	Environmental Scientist	**ADEC File No.:**	107.38.150	**Lab Report No.:**	ZI12013
Consulting Firm:	Arctic Data Services	**Hazard ID No.:**	26773	**Lab Report Date:**	October 16, 2024

Note: *Any N/A or No box checked must have an explanation in the comments box.*

1. **Laboratory**

   a. Did an ADEC Contaminated Sites Laboratory Approval Program (CS-LAP) approved laboratory receive and perform all of the submitted sample analyses?
   Yes ☒ No ☐ N/A ☐
   Comments: All samples were received and analyzed by Pace Analytical Services – West Columbia, South Carolina. The laboratory is ADEC CS approved for the analyses performed, where required

   b. If the samples were transferred to another "network" laboratory or sub-contracted to an alternate laboratory, was the laboratory performing the analyses CS-LAP approved?
   Yes ☐ No ☐ N/A ☒
   Comments: No samples were transferred to or analyzed by another laboratory.

2. **Chain of Custody (CoC)**

   a. Is the CoC information completed, signed, and dated (including released/received by)?
   Yes ☐ No ☒ N/A ☐
   Comments: The digital quality of the CoC included in the report is difficult to read, but the CoC appears to be missing release date and time.

   b. Were the correct analyses requested?
   Yes ☒ No ☐ N/A ☐
   Analyses requested: PFAS (1633)
   Comments: Click or tap here to enter text.

3. Laboratory Sample Receipt Documentation

a. Is the sample/cooler temperature documented and within range at receipt (0° to 6° C)?
Yes ☒ No ☐ N/A ☐
Cooler temperature(s): 2.3, 2.1
Comments: Samples were received within acceptable temperature range.

b. Is the sample preservation acceptable – acidified waters, methanol preserved soil (GRO, BTEX, VOCs, etc.)?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Is the sample condition documented – broken, leaking, zero headspace (VOA vials); canister vacuum/pressure checked and no open valves, etc.?
Yes ☒ No ☐ N/A ☐
Comments: Samples were received in good condition.

d. If there were any discrepancies, were they documented? For example, incorrect sample containers/preservation, sample temperature outside of acceptable range, insufficient or missing samples, canister not holding a vacuum, etc.?
Yes ☐ No ☐ N/A ☒
Comments: There were no sample receiving discrepancies.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability are not affected.

4. Case Narrative

a. Is the case narrative present and understandable?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are there discrepancies, errors, or QC failures identified by the lab?
Yes ☒ No ☐ N/A ☐
Comments: The laboratory report case narrative documented QC anomalies which are addressed in the following relevant sections of this checklist.

c. Were all the corrective actions documented?
Yes ☐ No ☐ N/A ☒
Comments: No corrective actions were required or performed.

d. What is the effect on data quality/usability according to the case narrative?
Comments: The case narrative made no comments on data quality or usability.

5. Sample Results

a. Are the correct analyses performed/reported as requested on CoC?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are all applicable holding times met?
Yes ☒ No ☐ N/A ☐
Comments:

c. Are all soils reported on a dry weight basis?
Yes ☐ No ☐ N/A ☒
Comments: No soil samples were submitted in this workorder.

d. Are the reported limits of quantitation (LoQ) or limits of detections (LOD), or reporting limits (RL) less than the Cleanup Level or the action level for the project?
Yes ☐ No ☐ N/A ☒
Comments: PFM Resin does not have ADEC or other screening limits.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability was not affected.

6. QC Samples

a. Method Blank

i. Was one method blank reported per matrix, analysis, and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Are all method blank results less than LOQ (or RL)?
Yes ☒ No ☐
Comments: There were no MB results above the LOQ. The following MB results were above the LOD but below the LOQ:

Batch 18867 PFOSA 0.055 ng/g

iii. If above LoQ or RL, what samples are affected?
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated method blank concentration. Sample CACMW-008-160-127-090624-FM-R is considered affected.

iv. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☒ No ☐ N/A ☐
Comments: Affected results below the LOD were qualified with a "UB" as false-positives and are considered non-detect up to the LOD and results above the LOD were qualified with a “J+” as estimated with high bias.

v. Data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

b. Laboratory Control Sample/Duplicate (LCS/LCSD)

i. Organics – Are one LCS/LCSD reported per matrix, analysis and 20 samples? (LCS/LCSD required per AK methods, LCS required per SW846)
Yes ☒ No ☐ N/A ☐
Comments: There were no LCSD reported. MSDs were generally used to check batch precision; however, batches 18657 and 18867 had no QC duplicate.

ii. Metals/Inorganics – Are one LCS and one sample duplicate reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods: AK101 60%-120%, AK102 75%-125%, AK103 60%-120%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? Was the RPD reported from LCS/LCSD, and or sample/sample duplicate? (AK Petroleum methods 20%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: N/A; there were no %R or RPD failures.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

vii. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

c. Matrix Spike/Matrix Spike Duplicate (MS/MSD)

i. Organics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☒ N/A ☐
Comments: Sample CACMW-008-060-27-090624-FM-R was selected by the laboratory for MS/MSD analysis.

ii. Metals/Inorganics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable?
Yes ☐ No ☒ N/A ☐
Comments: MS and MSD recoveries were outside of laboratory limits for PFOS in CACMW-008-060-27-090624-FM-R

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? RPD reported from MS/MSD, and or sample/sample duplicate.
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: MS/MSD recovery failures are only considered to affect parent-sample data quality if the spiking concentration is at least 3 times greater than the native concentration of the analyte in the parent sample. No samples were affected by recovery failures.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No project-sample results were affected.

vii. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

d. Surrogates – Organics Only or Isotope Dilution Analytes (IDA) – Isotope Dilution Methods Only

i. Are surrogate/IDA recoveries reported for organic analyses – field, QC, and laboratory samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods 50-150 %R for field samples and 60-120 %R for QC samples; all other analyses see the laboratory report pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iii. Do the sample results with failed surrogate/IDA recoveries have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No project-sample results were affected by IDA recovery failures.

iv. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability is not affected.

e. Trip Blanks

i. Is one trip blank reported per matrix, analysis, and for each cooler containing volatile samples? Yes ☐ No ☐ N/A ☒
Comments: No volatile analyses were performed in this work order.

ii. Are all results less than LoQ or RL?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. If above LoQ or RL, what samples are affected?
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

f. Field Duplicate

i. Are one field duplicate submitted per matrix, analysis, and 10 project samples?
Yes ☐ No ☒ N/A ☐
Comments: No field duplicates were submitted with this SDG. Refer to the data quality assessment for evaluation of overall field duplicate collection and analysis frequency.

ii. Was the duplicate submitted blind to lab?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. Precision – All relative percent differences (RPD) less than specified project objectives? (Recommended: 30% water or air, 50% soil)

$$RPD\ (\%) = \left| \frac{R_1 - R_2}{\left(\frac{R_1 + R_2}{2}\right)} \right| X\ 100$$

Where R_1 = Sample Concentration

R_2 = Field Duplicate Concentration

Is the data quality or usability affected? (Explain)

Yes ☐ No ☐ N/A ☒
Comments: N/A; see above

iv. Is the data quality or usability affected? (Explain)
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

g. Decontamination or Equipment Blanks

i. Were decontamination or equipment blanks collected?
Yes ☐ No ☒ N/A ☐
Comments: The following samples were submitted as field blanks and reported in SDG ZI12013:
CACMW-CO-1-090924, CACMW-CO-2-090924, CACMW-CO-3-090924, and CACMW-CO-4-090924

ii. Are all results less than LoQ or RL?
Yes ☐ No ☒ N/A ☐
Comments: 6:2FTS, PFNA, PFOA, PFTriA, PFUnA, and/or PFHxA were detected in one or more field blank.

iii. If above LoQ or RL, specify what samples are affected.

Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated blank concentration. 6:2FTS, PFNA, PFOA, PFTriA, PFUnA, and PFHxA in all samples in this work order are considered affected

iv. Are data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Affected results below the LOD were qualified with a "UB" as false-positives and are considered non-detect up to the LOD and results above the LOD were qualified with a “J+” as estimated with high bias. Refer to the data quality assessment for discussion of potential impacts to data usability.

7. Other Data Flags/Qualifiers (ACOE, AFCEE, Lab Specific, etc.)

a. Are they defined and appropriate?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ADEC Contaminated Sites Program Laboratory Data Review Checklist

Completed By:	Hannah Woody	**CS Site Name:**	Eielson AFB Basewide PFAS	**Lab Name:**	Pace Analytical Services
Title:	Environmental Scientist	**ADEC File No.:**	107.38.150	**Lab Report No.:**	ZI12016
Consulting Firm:	Arctic Data Services	**Hazard ID No.:**	26773	**Lab Report Date:**	October 29, 2024

Note: *Any N/A or No box checked must have an explanation in the comments box.*

1. **Laboratory**

   a. Did an ADEC Contaminated Sites Laboratory Approval Program (CS-LAP) approved laboratory receive and perform all of the submitted sample analyses?
   Yes ☒ No ☐ N/A ☐
   Comments: All samples were received and analyzed by Pace Analytical Services – West Columbia, South Carolina. The laboratory is ADEC CS approved for the analyses performed, where required

   b. If the samples were transferred to another "network" laboratory or sub-contracted to an alternate laboratory, was the laboratory performing the analyses CS-LAP approved?
   Yes ☐ No ☐ N/A ☒
   Comments: No samples were transferred to or analyzed by another laboratory.

2. **Chain of Custody (CoC)**

   a. Is the CoC information completed, signed, and dated (including released/received by)?
   Yes ☐ No ☒ N/A ☐
   Comments: The digital quality of the CoC included in the report is difficult to read, but the CoC appears to be missing release date and time.

   b. Were the correct analyses requested?
   Yes ☒ No ☐ N/A ☐
   Analyses requested: PFAS (1633)
   Comments: Click or tap here to enter text.

3. Laboratory Sample Receipt Documentation

a. Is the sample/cooler temperature documented and within range at receipt (0° to 6° C)?
Yes ☒ No ☐ N/A ☐
Cooler temperature(s): 2.3, 2.1
Comments: Samples were received within acceptable temperature range.

b. Is the sample preservation acceptable – acidified waters, methanol preserved soil (GRO, BTEX, VOCs, etc.)?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Is the sample condition documented – broken, leaking, zero headspace (VOA vials); canister vacuum/pressure checked and no open valves, etc.?
Yes ☒ No ☐ N/A ☐
Comments: Samples were received in good condition.

d. If there were any discrepancies, were they documented? For example, incorrect sample containers/preservation, sample temperature outside of acceptable range, insufficient or missing samples, canister not holding a vacuum, etc.?
Yes ☐ No ☐ N/A ☒
Comments: There were no sample receiving discrepancies.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability are not affected.

4. Case Narrative

a. Is the case narrative present and understandable?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are there discrepancies, errors, or QC failures identified by the lab?
Yes ☒ No ☐ N/A ☐
Comments: The laboratory report case narrative documented QC anomalies which are addressed in the following relevant sections of this checklist.

c. Were all the corrective actions documented?
Yes ☐ No ☐ N/A ☒
Comments: No corrective actions were required or performed.

d. What is the effect on data quality/usability according to the case narrative?
Comments: The case narrative made no comments on data quality or usability.

5. Sample Results

a. Are the correct analyses performed/reported as requested on CoC?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are all applicable holding times met?
Yes ☒ No ☐ N/A ☐
Comments:

c. Are all soils reported on a dry weight basis?
Yes ☐ No ☐ N/A ☒
Comments: No soil samples were submitted in this workorder.

d. Are the reported limits of quantitation (LoQ) or limits of detections (LOD), or reporting limits (RL) less than the Cleanup Level or the action level for the project?
Yes ☒ No ☐ N/A ☐
Comments: LOQs and LODs for non-detect results were compared to the Project Screening Levels (PSLs) as defined in Worksheet #15 of the UFP-QAPP. LOQ and LODs for all analytes were below PSLs.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability was not affected.

6. QC Samples

a. Method Blank

i. Was one method blank reported per matrix, analysis, and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Are all method blank results less than LOQ (or RL)?
Yes ☒ No ☐
Comments: There were no MB results above the LOQ. The following MB results were above the MDL but below the LOQ:

Batch 18867 PFOSA 0.055 ng/g
Batch 18871 PFOSA 0.096 ng/g
Batch 18873 PFOSA 0.059 ng/g
Batch 18873 PFOS 0.026 ng/g
Batch 18914 PFOSA 0.058 ng/g

iii. If above LoQ or RL, what samples are affected?
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated method blank concentration. PFOSA results for the following samples are considered affected

CACMW-001-110-66.5-090424-FM-R
CACMW-001-160-117-090424-FM-R
CACMW-001-160-127.5-090424-FM-R
CACMW-002-060-16.5-090424-FM-R
CACMW-002-110-66.5-090424-FM-R
CACMW-002-160-121.75-090424-FM-R
CACMW-003-060-21.75-090424-FM-R
CACMW-003-110-71.75-090524-FM-R
CACMW-003-160-121.75-090524-FM-R
CACMW-003-160-132.25-090524-FM-R
CACMW-004-160-116.5-090524-FM-R
CACMW-004-160-121.75-090524-FM-R
CACMW-004-160-127-090524-FM-R
CACMW-004-160-132.25-090524-FM-R
CACMW-005-060-16.5-090524-FM-R
CACMW-005-060-21.75-090524-FM-R

iv. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☒ No ☐ N/A ☐
Comments: Affected results below the LOD were qualified with a "UB" as false-positives and are considered non-detect up to the LOD and results above the LOD were qualified with a “J+” as estimated with high bias.

v. Data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

b. Laboratory Control Sample/Duplicate (LCS/LCSD)

i. Organics – Are one LCS/LCSD reported per matrix, analysis and 20 samples? (LCS/LCSD required per AK methods, LCS required per SW846)
Yes ☒ No ☐ N/A ☐
Comments: There were no LCSD reported. MSDs were generally used to check batch precision; however, batches 18873, 18914, 19251, and 19524 had no QC duplicate.

ii. Metals/Inorganics – Are one LCS and one sample duplicate reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods: AK101 60%-120%, AK102 75%-125%, AK103 60%-120%; all other analyses see the laboratory QC pages)
Yes ☐ No ☒ N/A ☐
Comments: PFOSA recovery in the low-level LCS for batches 18871, 18873, and 19251 was above laboratory limits.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? Was the RPD reported from LCS/LCSD, and or sample/sample duplicate? (AK Petroleum methods 20%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: PFOSA results for the following samples are considered affected

CACMW-001-160-117-090424-FM-R
CACMW-001-160-127.5-090424-FM-R
CACMW-002-060-16.5-090424-FM-R
CACMW-002-110-66.5-090424-FM-R
CACMW-002-160-121.75-090424-FM-R
CACMW-002-160-127-090424-FM-R
CACMW-003-060-21.75-090424-FM-R
CACMW-003-110-71.75-090524-FM-R
CACMW-003-160-121.75-090524-FM-R
CACMW-003-160-132.25-090524-FM-R

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☒ No ☐ N/A ☐
Comments: Detected results were qualified “J+” as estimated with high bias.

vii. Is the data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

c. Matrix Spike/Matrix Spike Duplicate (MS/MSD)

i. Organics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☒ N/A ☐
Comments: Samples CACMW-001-110-82.25-090424-FM-R, CACMW-003-060-27-090424-FM-R, and CACMW-004-110-77-090524-FM-R were selected by the laboratory for MS/MSD analysis.

ii. Metals/Inorganics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable?
Yes ☐ No ☒ N/A ☐
Comments: MS/MSD recoveries were outside of laboratory limits for PFHxS and PFOS in CACMW-001-110-82.25-090424-FM-R
PFOS in CACMW-003-060-27-090424-FM-R
PFOS in CACMW-004-110-77-090524-FM-R

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? RPD reported from MS/MSD, and or sample/sample duplicate.
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: MS/MSD recovery failures are only considered to affect parent-sample data quality if the spiking concentration is at least 3 times greater than the native concentration of the analyte in the parent sample. No sample results were affected by recovery failures.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No project-sample results were affected.

vii. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

d. Surrogates – Organics Only or Isotope Dilution Analytes (IDA) – Isotope Dilution Methods Only

i. Are surrogate/IDA recoveries reported for organic analyses – field, QC, and laboratory samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods 50-150 %R for field samples and 60-120 %R for QC samples; all other analyses see the laboratory report pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iii. Do the sample results with failed surrogate/IDA recoveries have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No project-sample results were affected by IDA recovery failures.

iv. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability is not affected.

e. Trip Blanks

i. Is one trip blank reported per matrix, analysis, and for each cooler containing volatile samples? Yes ☐ No ☐ N/A ☒
Comments: No volatile analyses were performed in this work order.

ii. Are all results less than LoQ or RL?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. If above LoQ or RL, what samples are affected?
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

f. Field Duplicate

i. Are one field duplicate submitted per matrix, analysis, and 10 project samples?

Yes ☐ No ☒ N/A ☐
Comments: No field duplicates were submitted with this SDG. Refer to the data quality assessment for evaluation of overall field duplicate collection and analysis frequency.

ii. Was the duplicate submitted blind to lab?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. Precision – All relative percent differences (RPD) less than specified project objectives? (Recommended: 30% water or air, 50% soil)

$$RPD\ (\%) = \left| \frac{R_1 - R_2}{\left(\frac{R_1 + R_2}{2}\right)} \right| X\ 100$$

Where R_1 = Sample Concentration

R_2 = Field Duplicate Concentration

Is the data quality or usability affected? (Explain)

Yes ☐ No ☐ N/A ☒
Comments: N/A; see above

iv. Is the data quality or usability affected? (Explain)
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

g. Decontamination or Equipment Blanks

i. Were decontamination or equipment blanks collected?
Yes ☐ No ☒ N/A ☐
Comments: The following samples were submitted as field blanks and reported in SDG ZI12013:
CACMW-CO-1-090924, CACMW-CO-2-090924, CACMW-CO-3-090924, and CACMW-CO-4-090924

ii. Are all results less than LoQ or RL?
Yes ☐ No ☒ N/A ☐
Comments: 6:2FTS, PFNA, PFOA, PFTriA, PFUnA, and/or PFHxA were detected in one or more field blank.

iii. If above LoQ or RL, specify what samples are affected.
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated blank concentration. 6:2FTS, PFNA, PFOA, PFTriA, PFUnA, and PFHxA in all samples in this work order are considered affected

iv. Are data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Affected results below the LOD were qualified with a "UB" as false-positives and are considered non-detect up to the LOD and results above the LOD were qualified with a “J+” as estimated with high bias. Refer to the data quality assessment for discussion of potential impacts to data usability.

7. Other Data Flags/Qualifiers (ACOE, AFCEE, Lab Specific, etc.)

a. Are they defined and appropriate?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ADEC Contaminated Sites Program Laboratory Data Review Checklist

Completed By:	Hannah Woody	**CS Site Name:**	Eielson AFB Basewide PFAS	**Lab Name:**	Pace Analytical Services
Title:	Environmental Scientist	**ADEC File No.:**	107.38.150	**Lab Report No.:**	ZI12017
Consulting Firm:	Arctic Data Services	**Hazard ID No.:**	26773	**Lab Report Date:**	October 17, 2024

Note: *Any N/A or No box checked must have an explanation in the comments box.*

1. **Laboratory**

   a. Did an ADEC Contaminated Sites Laboratory Approval Program (CS-LAP) approved laboratory receive and perform all of the submitted sample analyses?
   Yes ☒ No ☐ N/A ☐
   Comments: All samples were received and analyzed by Pace Analytical Services – West Columbia, South Carolina. The laboratory is ADEC CS approved for the analyses performed, where required

   b. If the samples were transferred to another "network" laboratory or sub-contracted to an alternate laboratory, was the laboratory performing the analyses CS-LAP approved?
   Yes ☐ No ☐ N/A ☒
   Comments: No samples were transferred to or analyzed by another laboratory.

2. **Chain of Custody (CoC)**

   a. Is the CoC information completed, signed, and dated (including released/received by)?
   Yes ☒ No ☐ N/A ☐
   Comments: The digital quality of the CoC included in the report is difficult to read.

   b. Were the correct analyses requested?
   Yes ☒ No ☐ N/A ☐
   Analyses requested: PFAS (1633)
   Comments: Click or tap here to enter text.

3. **Laboratory Sample Receipt Documentation**

   a. Is the sample/cooler temperature documented and within range at receipt (0° to 6° C)?
   Yes ☒ No ☐ N/A ☐

Cooler temperature(s): 2.3, 2.1
Comments: Samples were received within acceptable temperature range.

b. Is the sample preservation acceptable – acidified waters, methanol preserved soil (GRO, BTEX, VOCs, etc.)?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

c. Is the sample condition documented – broken, leaking, zero headspace (VOA vials); canister vacuum/pressure checked and no open valves, etc.?
Yes ☒ No ☐ N/A ☐
Comments: Samples were received in good condition.

d. If there were any discrepancies, were they documented? For example, incorrect sample containers/preservation, sample temperature outside of acceptable range, insufficient or missing samples, canister not holding a vacuum, etc.?
Yes ☒ No ☐ N/A ☐
Comments: The laboratory noted that 6 samples were received that were not listed on the CoC. These samples had dates but no times. Samples were analyzed for PFAS.

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability are not affected.

4. Case Narrative

a. Is the case narrative present and understandable?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are there discrepancies, errors, or QC failures identified by the lab?
Yes ☒ No ☐ N/A ☐
Comments: The laboratory report case narrative documented QC anomalies which are addressed in the following relevant sections of this checklist.

c. Were all the corrective actions documented?
Yes ☐ No ☐ N/A ☒
Comments: No corrective actions were required or performed.

d. What is the effect on data quality/usability according to the case narrative?
Comments: The case narrative made no comments on data quality or usability.

5. Sample Results

a. Are the correct analyses performed/reported as requested on CoC?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

b. Are all applicable holding times met?
Yes ☒ No ☐ N/A ☐
Comments:

c. Are all soils reported on a dry weight basis?
Yes ☐ No ☐ N/A ☒
Comments: No soil samples were submitted in this workorder.

d. Are the reported limits of quantitation (LoQ) or limits of detections (LOD), or reporting limits (RL) less than the Cleanup Level or the action level for the project?
Yes ☐ No ☐ N/A ☒
Comments: PFM Resin does not have ADEC or other screening limits

e. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability was not affected.

6. QC Samples

a. Method Blank

i. Was one method blank reported per matrix, analysis, and 20 samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Are all method blank results less than LOQ (or RL)?
Yes ☒ No ☐
Comments: There were no MB results above the LOQ. The following MB results were above the MDL but below the LOQ:

Batch 18914 PFOSA 0.058 ng/g
Batch 18915 PFOSA 0.047 ng/g
Batch 18916 PFOSA 0.034 ng/g

iii. If above LoQ or RL, what samples are affected?
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated method blank concentration. The following samples are considered affected:

CACMW-005-110-66.5-090524-FM-R
CACMW-005-160-116.5-090524-FM-R
CACMW-005-160-121.75-090524-FM-R
CACMW-005-160-127-090524-FM-R
CACMW-005-160-132.25-090524-FM-R
CACMW-006-060-21.75-090524-FM-R
CACMW-006-060-27-090524-FM-R
CACMW-006-110-66.5-090524-FM-R
CACMW-006-160-116.5-090524-FM-R
CACMW-006-160-127-090524-FM-R
CACMW-006-160-132.25-090524-FM-R
CACMW-007-160-132.25-090624-FM-R
CACMW-008-160-116.5-090624-FM-R
FD-5-090424-FM-R
FD-8-090524-FM-R
FD-09-090624-FM-R

iv. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☒ No ☐ N/A ☐
Comments: Affected results below the LOD were qualified with a "UB" as false-positives and are considered non-detect up to the LOD and results above the LOD were qualified with a “J+” as estimated with high bias.

v. Data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

b. Laboratory Control Sample/Duplicate (LCS/LCSD)

i. Organics – Are one LCS/LCSD reported per matrix, analysis and 20 samples? (LCS/LCSD required per AK methods, LCS required per SW846)
Yes ☒ No ☐ N/A ☐
Comments: There were no LCSD reported. MSDs were generally used to check batch precision; however, batch 18914 had no QC duplicate.

ii. Metals/Inorganics – Are one LCS and one sample duplicate reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK

Petroleum methods: AK101 60%-120%, AK102 75%-125%, AK103 60%-120%; all other analyses see the laboratory QC pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? Was the RPD reported from LCS/LCSD, and or sample/sample duplicate? (AK Petroleum methods 20%; all other analyses see the laboratory QC pages)
Yes ☐ No ☐ N/A ☒
Comments: No LCSD was performed.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: N/A; there were no %R failures.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☐ No ☐ N/A ☒
Comments: No samples were affected.

vii. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

c. Matrix Spike/Matrix Spike Duplicate (MS/MSD)

i. Organics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☒ N/A ☐
Comments: Samples CACMW-005-110-82.25-090524-FM-R and CACMW-008-110-77-090624-FM-R were selected by the laboratory for MS/MSD analysis.

ii. Metals/Inorganics – Are one MS/MSD reported per matrix, analysis and 20 samples?
Yes ☐ No ☐ N/A ☒
Comments: No inorganic methods were performed in this work order.

iii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable?
Yes ☐ No ☒ N/A ☐
Comments:
MS and MSD recoveries for PFOS, PFOA, and PFHxS were below recovery limits in CACMW-008-110-77-090624-FM-R.

MS and MSD recoveries for PFOS, PFOA, and PFHxS were above recovery limits in CACMW-005-110-82.25-090524-FM-R.

iv. Precision – Are all relative percent differences (RPD) reported and less than method or laboratory limits and project specified objectives, if applicable? RPD reported from MS/MSD, and or sample/sample duplicate.
Yes ☐ No ☒ N/A ☐
Comments: The MSD RPD for PFOA in CACMW-005-110-82.25-090524-FM-R was 31%, exceeding the 30% control criteria.

v. If %R or RPD is outside of acceptable limits, what samples are affected?
Comments: MS/MSD recovery failures are only considered to affect parent-sample data quality if the spiking concentration is at least 3 times greater than the native concentration of the analyte in the parent sample. No samples were affected by recovery failures. CACMW-005-110-82.25-090524-FM-R is considered affected by the RPD failure.

vi. Do the affected sample(s) have data flags? If so, are the data flags clearly defined?
Yes ☒ No ☐ N/A ☐
Comments: Results affected by RPD failure were qualified “J” as estimated with indeterminate bias.

vii. Is the data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Data quality is affected as described above. Refer to the data quality assessment for discussion of potential impacts to data usability.

d. Surrogates – Organics Only or Isotope Dilution Analytes (IDA) – Isotope Dilution Methods Only

i. Are surrogate/IDA recoveries reported for organic analyses – field, QC, and laboratory samples?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

ii. Accuracy – Are all percent recoveries (%R) reported and within method or laboratory limits and project specified objectives, if applicable? (AK Petroleum methods 50-150 %R for field samples and 60-120 %R for QC samples; all other analyses see the laboratory report pages)
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iii. Do the sample results with failed surrogate/IDA recoveries have data flags? If so, are the data flags clearly defined?

Yes ☐ No ☐ N/A ☒
Comments: N/A; there were no IDA recovery failures.

iv. Is the data quality or usability affected?
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability is not affected.

e. Trip Blanks

i. Is one trip blank reported per matrix, analysis, and for each cooler containing volatile samples? Yes ☐ No ☐ N/A ☒
Comments: No volatile analyses were performed in this work order.

ii. Are all results less than LoQ or RL?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

iii. If above LoQ or RL, what samples are affected?
Comments: N/A; see above.

iv. Is the data quality or usability affected?
Yes ☐ No ☐ N/A ☒
Comments: N/A; see above.

f. Field Duplicate

i. Are one field duplicate submitted per matrix, analysis, and 10 project samples?
Yes ☒ No ☐ N/A ☐
Comments: The following field duplicate pairs were submitted in this work order:

FD-4-090424-FM-R / CACMW-002-110-77-090424-FM-R
FD-5-090424-FM-R / CACMW-003-160-127-090424-FM-R
FD-6-090524-FM-R / CACMW-004-060-27-090524-FM-R
FD-7-090524-FM-R / CACMW-004-110-77-090524-FM-R
FD-8-090524-FM-R / CACMW-006-060-27-090524-FM-R
FD-9-090624-FM-R / CACMW-006-110-66.5-090624-FM-R
FD-10-090624-FM-R / CACMW-007-110-66.5-090624-FM-R

Refer to DQA for overall evaluation of field duplicate collection frequency.

ii. Was the duplicate submitted blind to lab?
Yes ☒ No ☐ N/A ☐
Comments: Click or tap here to enter text.

iii. Precision – All relative percent differences (RPD) less than specified project objectives? (Recommended: 30% water or air, 50% soil)

$$RPD\ (\%) = \left| \frac{R_1 - R_2}{\left(\frac{R_1 + R_2}{2}\right)} \right| X\ 100$$

Where R_1 = Sample Concentration

R_2 = Field Duplicate Concentration

Is the data quality or usability affected? (Explain)

Yes ☒ No ☐ N/A ☐
Comments: N/A; there were no field-duplicate RPD failures.

iv. Is the data quality or usability affected? (Explain)
Yes ☐ No ☒ N/A ☐
Comments: Data quality and usability were not affected.

g. Decontamination or Equipment Blanks

i. Were decontamination or equipment blanks collected?
Yes ☐ No ☐ N/A ☒
Comments: The following samples were submitted as field blanks and reported in SDG ZI12013:
CACMW-CO-1-090924, CACMW-CO-2-090924, CACMW-CO-3-090924, and CACMW-CO-4-090924.

ii. Are all results less than LoQ or RL?
Yes ☐ No ☒ N/A ☐
Comments: See checklist ZI12013 for details.

iii. If above LoQ or RL, specify what samples are affected.
Comments: Project-sample results are considered affected if the analyte in question is detected within five times (5X) the associated blank concentration. 6:2FTS, PFNA, PFOA, PFTriA, PFUnA, and PFHxA in all samples in this work order are considered affected.

iv. Are data quality or usability affected?
Yes ☒ No ☐ N/A ☐
Comments: Affected results below the LOD were qualified with a "UB" as false-positives and are considered non-detect up to the LOD and results above the LOD were qualified with a “J+” as estimated with high bias. Refer to the data quality assessment for discussion of potential impacts to data usability.

7. Other Data Flags/Qualifiers (ACOE, AFCEE, Lab Specific, etc.)

a. Are they defined and appropriate?

Yes ☒ No ☐ N/A ☐

Comments: Click or tap here to enter text.

SDG:	ZH22011
Lab Name:	Pace
Completed By:	Leslie Brooks
Date:	11/27/2024
Methods (types) reviewed	1633 (LC-MS/MS)

	Yes	No	N/A
Additional Stage 2A 1633 PFAS Checks – All Field Samples			
Ion ratios within 50-150% of ion ratio of applicable calibration standard?		X	
Extracted Internal Standard (EIS) recovery within 20-150% or laboratory limits?	X		
EIS retention time within 0.40 minutes of retention time of applicable standard?	X		
Non-Extracted Internal Standards (NIS) peak area greater than 30% of the average area of the calibration standards or within laboratory limits?		X	
NIS retention time within 0.40 minutes of retention time of applicable standard?	X		
Laboratory Control (LCS) and Low-Level Laboratory Control Sample (LLLCS) are prepared in every preparation batch of 20 environmental samples and recovery within control limits?	X		
Bile Salt Interference Check reported and PFOS and TDCA separated by at least 1 minute	X		
Qualitative Identification Standard containing a mix of branched and linear isomers analyzed once daily prior to sample analysis?	X		

Comments:

Several analytes were detected below the LOQ with ion ratios outside the 50-150% range. These results were not additionally qualified as they are already 'J' flagged due to being below the LOQ. NMeFOSAA in sample CACMW-008-110-103.25-081724-FM-R and PFPeA in sample CACMW-004-060-37.5-081624-FM-R were detected above the LOQ and had ion ratios outside 50-150% of the ion ratio of the midpoint calibration standard. Affected results are qualified 'J' as estimated.

NIS peak area for the dilution runs of samples CACMW-008-060-42.75-081724-FM-R, CACMW-008-060-53.25-081724-FM-R, FD-1-081624-FM-R, CACMW-005-110-87.5-081624-FM-R, CACMW-005-110-92.75-081624-FM-R, CACMW-001-160-148.5-081524-FM-R, CACMW-005-110-98-081624-FM-R, CACMW-006-060-48-081724-FM-R, CACMW-006-060-53.25-081724-FM-R, CACMW-007-060-48-081724-FM-R, CACMW-007-110-87.5-081724-FM-R were below 30% of the average area of the calibration standards. However, it was noted that NIS standards were not refortified in the dilution. Only PFOS and/or 8:2 FTS were reported from dilution runs and qualification is not required.

General			
Preparation and analysis run logs reported and complete?	X		
Bench logs and data sheets reported and complete? *(where relevant)*	X		

Comments:

	Yes	No	N/A
Tuning and Instrument Performance – 10% Selected Field Samples for Stage 4			
Mass Calibration and Mass Calibration Verification performed prior to initial calibration	X		
Verify the peak apex for each mass did not shift more than 0.2 Da (or amu) from the expected masses for each target analyte.	X		
Comments:			
Initial Calibration – 10% Selected Field Samples for Stage 4			
Initial calibration performed at the required frequency? *(generally prior to sample analysis or after ICV/CCV failure)*	X		
Does the calibration include the minimum number of levels? *(6 for Avg. RF or linear with 5 within quantification range and 1 additional if second order)*	X		
Does the calibration meet method criteria? *(RSD or RSE < 20%)*	X		
Comments:			
Initial (Secondary Source), Continuing Calibration Verification, and Instrument Sensitivity Check – 10% Selected Field Samples for Stage 4			
Initial calibration verification (ICV) performed after initial calibration with second source standard?	X		
ICV within method criteria? *(%D <30%)*		X	
Instrument Sensitivity Check (ISC) performed at least once daily prior to sample analysis?	X		
ISC within method criteria? *(%D <30%)*	X		
Continuing calibration verification (CCV) performed at the required frequency? *(bracketing all field samples and after every 10 field samples)*	X		
CCVs within method criteria? *(%D <30%)*		X	

Comments:

8:2 FTS in the ICV for calibration 092224C-1633+ICAL.b was recovered above laboratory limits. 8:2FTS results for the following samples are qualified 'J+' as estimated with high bias due to high ICV recovery. CACMW-004-160-137.5-081624-FM-R, CACMW-004-160-142.75-081624-FM-R, CACMW-004-160-148-081624-FM-R, CACMW-004-160-153.25-081624-FM-R, CACMW-004-160-158.5-081624-FM-R, CACMW-008-160-137.5-081724-FM-R, CACMW-008-160-142.75-081724-FM-R, CACMW-008-160-148-081724-FM-R, CACMW-008-160-153.25-081724-FM-R, FD-2-081724-FM-R

EIS D5-NEtFOSAA in CCV L5H_SCLV-4091 for calibration 092224C-1633+ICAL.b was recovered above laboratory limits. Associated target analytes were recovered within limits and data quality was not affected.

PFDoS, EIS 13C2-PFTeDA, and EIS D9-NEtFOSE in CCV L5D_SVLC-4091 for calibration 092324B-1633+ICAL.b were recovered above laboratory limits. PFDoS was not detected in any associated project samples, so data quality was not affected. Target analytes associated with failed EIS CCV recovery were recovered within limits in the CCV, so data quality was not affected by the EIS failures.

	Yes	No	N/A
EIS 13C8-PFOA in CCV L5F_SVLC-4091 for calibration 092324B-1633+ICAL.b was recovered above laboratory limits. Associated target analytes were recovered within limits and data quality was not affected.			
Instrument Blanks – 10% Selected Field Samples for Stage 4			
Instrument Blanks performed at the required frequency? (*immediately following the highest standard analyzed, daily prior to analyzing standards, after each CV, and immediately following samples with PFAS concentrations exceeding the quantification range*)	X		
IB target analyte concentrations below ½ LOQ?	X		
Comments:			
Other QC			
No other instrument-level QC failures or anomalies?		X	
Comments: The laboratory qualified PFOS result in sample CACMW-004-110-92.75-081624-FM-R as having exceeded the calibration range. Affected results are qualified 'J' as estimated for exceeding the calibration range.

2024

Passive Flux Meters (PFMs) were used to measure the ambient groundwater flux and PFAS mass flux at Eielson AFB DGI site in Alaska. For a description of PFM fundamentals see Hatfield et al., 2004 and for field implementation see Annable et al., 2005. Flux refers to the mass of water and contaminants flowing per unit area at a measured point in a well screened over a given period. Based upon this general definition, the units associated with mass flux are determined as:

$$flux = \frac{mass}{area \cdot time} = \left[\frac{M}{L^2 T}\right]$$

where the terms M, L, and T represent the base units of mass, length, and time respectively. For consistency with common practice, the ambient groundwater flux will be discussed in terms of the specific discharge or Darcy velocity, which is the volumetric water flux (or flowrate) through a specified cross-sectional area. The resulting units are L/T and for this report the Darcy velocity will be represented with the units of cm/day. For this report the PFAS flux will be discussed in terms of mass flux (M/L^2T)) and represented with the units of $ug/m^{2/}day$.

Based on previous site assessments, the expected contaminants at the site included Per- and Polyfluoroalkyl Substances (PFAS). These were evaluated in 24 wells: MW-001-60/110/160, MW-002-60/110/160, MW-003-60/110/160, MW-004-60/110/160, MW-005-60/110/160, MW-006-60/110/160, MW-007-60/110/160, and MW-008-60/110/160.

A total of 216 PFMs were constructed and shipped to the site for deployment across two rounds. In the first round, 120 PFMs were deployed, followed by 96 PFMs in the second round. Each PFM was constructed to a length of 5 feet and designed with alternating layers of activated carbon and resin to quantify both Darcy flux and PFAS fluxes during the same deployment. The PFMs featured four alternating layers, with each sampling interval being 15 inches thick.

In the first round, PFMs were deployed from 07/31/2024 to 08/02/2024 and retrieved between 08/14/2024 and 08/17/2024, resulting in deployment durations ranging from approximately 14 to 16 days. In the second round, PFMs were deployed from 08/21/2024 to 08/23/2024 and retrieved between 09/04/2024 and 09/06/2024, with deployment durations of approximately 14 days.

All wells have a 2-inch diameter. The results are presented in Figures 1 through 58 and Tables 1 through 5. Figures 1 through 8 illustrate flux profiles for both Darcy flux and PFAS flux, as directly measured by the PFMs. Detailed data are summarized in Table 1 (Appendix A), with well average values provided in Table 4 (Appendix A).

Figure 9 shows the average Darcy velocity for each well, while Figures 10 through 33 present the average mass fluxes for each well. The flux average concentrations can be indirectly calculated based on the measured PFAS and Darcy fluxes. The resulting data are presented in Table 2 (Appendix A), with the well average values summarized in Table 5 (Appendix A).

PFAS mass flux values, measured at the local scale (approximately 2.5-foot vertical intervals), were integrated over the vertical profile and represented as mass discharge per unit width of aquifer (µg/m/day) in Table 3 (Appendix A). Figures 34 through 58 (Appendix A) illustrate the flux of each PFAS constituent for each well.

Notes:

PFOS results are shown in $\mu g/m^3$ as used in the mass flux calculation, which is equivalent to nanograms per liter.

$\mu g/m^3$ = micrograms per meter cubed

$\mu g/m^2/day$ = micrograms per meter cubed per day

i = hydraulic gradient in the vicinity of Eielson TR02

ft bgs = feet below ground surface

K = hydraulic conductivity

m/day = meters per day

PFOS = Perfluorooctanesulfonic acid

RE: DEC review of the *Draft Final Data Gap Investigation Report for PFAS Treatment Pilot Study at FT009P, Eielson Air Force Base, Fairbanks North Star Borough, Alaska, March 2025*

Dear Ms. Smith:

The Alaska Department of Environmental Conservation (DEC) received the above document on June 20, 2025. The report summarizes the data gap investigation (DGI) and groundwater pilot study construction (PSC) in support of the groundwater response action for per- and polyfluoroalkyl substances (PFAS) treatment at site FT009P at Eielson Air Force Base (EAFB), Alaska. This report presents a brief project background, data quality objectives, field activities and methods, results, discussion of results, and summary and conclusions related to the DGI effort conducted during the 2024 field season. DEC has reviewed the above referenced document and all comments have been resolved (see enclosure). Please attach the final comment matrix and finalize the document and provide a copy for DEC records. Please contact me with any further comments or questions at sarah.bernhardt@alaska.gov or (907) 269-7527.

Sincerely,
Sarah P. Bernhardt

DEC Comments on Draft Data Gap Investigation Report for PFAS Treatment Pilot Study at FT009P, Eielson Air Force Base, March 2025, Alaska.
April 24, 2025
July 21, 2025 – DEC Backcheck

Reviewer: Alaska Department of Environmental Conservation (DEC)

Comment No.	Page	Section	Comment / Recommendation	Response
1.		General	DEC requests that a deviations section be included to capture all the changes that occurred from the approved work plan. Examples are listed below: "Section 2.2, pg. 12 - After installing several wells, "pre-development surging" was deemed unnecessary for settling the sand filter pack because the sonic vibration from the drill rig during casing removal appeared to accomplish this adequately." "Section 2.5, pg. 14 – The uppermost PFM was recovered within several hours, but the two lower PFMs remained stuck in the well until their retrieval times on 15 August 2024 (Appendix A7), this may have a modest impact on the results by exposing these PFMs to different, shallower intervals in the well, but only for approximately one day compared to their two-week deployment period."	Section 2.7 QAPP Deviations has been added to the report. DEC: Accept.
2.		General	**Concerns for the overall approach and likely smear zone downgradient**. A concern noted in previous phases of this overall project is the use of 50-foot screens for the injection of CAC. There have been discussions regarding the use of packers to isolate zones. It is outside the scope of this report, so it is unclear if the intention is to use packers for the	Yes, use of packers during injection at the injection wells with 50-ft screens is under consideration and will be addressed in a future CAC injection work plan. The specific target zones and number of injection intervals within each injection well will depend on the lithology present at the injection wells, which

Comment No.	Page	Section	Comment / Recommendation	Response
			injections. However, we note that the use of the packers for slug testing provided for this report observed biased results that underestimated the aquifer hydraulic gradient. The contractor noted this was due to the inability to isolate the sand pack that extends the full 50-foot section of the screen. The straddle packers were able to isolate 3 feet of the screened interval only. We have concerns there will be similar issues with parking the CAC at specified depths using the 50-foot screen injection wells. Parking the material will be extremely important for the depths where higher flux was observed.	will be better understood once the injection wells are installed later in the 2025 field season and/or in 2026. We recognize that packers may not provide a perfect seal or direct 100 percent of the injection fluid into the target zone as there may be some fluid that moves within the filter pack, however, using packers should help direct the majority of the injection fluid into the target zone. We also recognize that more CAC injection fluid will preferentially go into the high K zones over lower K zones, given the inherent heterogeneity of aquifer materials. This is true of any injection-based remedy. As higher K zones are where the higher mass flux occurs, this can be considered a benefit rather than a limitation,, as long as the CAC material can be "parked" in these zones. Depending on the vendor and CAC materials used, a strategy for parking the CAC will be developed during preparation of the CAC injection QAPP. During discussions with two vendors, neither of the vendors were concerned about being able to adequately park the CAC. The vendors apply the parking differently and this will be discussed during the planning for the injection phase and detailed in the CAC injection QAPP.

Comment No.	Page	Section	Comment / Recommendation	Response
				Injection wells need to be screened starting at approximately 10 feet bgs, to ensure there is an adequate well seal during well construction, to limit surfacing during injection. Screening higher would reduce the amount of well seal and may be problematic during injection. However, it is also expected that some mounding will occur during injection, dispersing CAC in the saturated zone above the well screen and treating the "smear zone". DEC: Noted.
3.	**General (Installation wells, monitoring well geometry)**		Absence of monitoring wells along the perimeter of the injection transect limits the ability to accurately determine the treatment's radius of influence. There is a lack of monitoring wells on the edges of the transect to identify the radius of influence for the treatment. We understand that this is a pilot study, so that may not be as big of a factor, but we believe it would provide useful information long term. Since it is a pilot study, we want to collect sufficient data to assess whether it is effective. Data collection should be the primary objective.	Monitoring well installation along the perimeter of the injection transect limits, immediately east and west of the easternmost/westernmost injection well clusters, was discussed at length internally and with stakeholders during the DGI planning process. The consensus was that the upgradient wells could effectively provide baseline or influent concentration data and that perimeter wells would be redundant for this purpose given the understanding of PFAS concentrations collected upgradient at Transect 02 during the Phase I RI. It was decided that available funding could be better utilized to supplement the downgradient performance monitoring well network and in-barrier monitoring wells would be installed to assess ROI and carbon distribution. In addition, post-injection soil borings will be

Comment No.	Page	Section	Comment / Recommendation	Response
				advanced to aid in ROI assessment and CAC distribution. Note in DEC's "Review of Response to Comments for the Draft-Final Data Gap Investigation & Groundwater Pilot Study Construction in Support of the Groundwater Response Action for PFAS Treatment at Site FT009P, Eielson Air Force Base, Alaska, January 2024", DEC accepted the response to comment #18 "with note: At the 5/1/2024 RPM meeting DEC discussed the potential limitations on information gathered at the vertical and lateral edges of the CAC curtain but agreed that the proposed well placement is likely best suited to the desired data collection. Consideration for an in CAC plume monitoring well was also discussed and should be brought forward in the addendum or future contracts." DEC: Noted.
4.	General		Will zones of greater flux be loaded more with CAC, such as CACMW-001 between 130 and 155 feet bgs? Given this depth is generally low concentration for the other wells. Or will averages be used as presented in Exhibit 9? This question is specifically asked given the conclusion provided in the report that groundwater velocity is the driving force of PFAS flux through the transect. How are you anticipating handling these sub-zones of flux that you see? Are you treating the different zones with	Varied CAC dosing will be considered along the transect and/or within different intervals based on the distribution of measured mass flux. However, varied CAC loading will need to be balanced with field implementation needs. CAC loading design will likely be based on maximum flux observed but will be specified in the QAPP for the CAC injection phase.

Comment No.	Page	Section	Comment / Recommendation	Response
			different concentrations of CAC or will you be giving an overall uniform amount and focusing on loading the zones with higher PFAS flux?	DEC: Noted.
5.	General – Passive Flux Meter (PFMs)		Suggestion - use the PFM Darcy velocity provided for each zone when designing the CAC and not the average which may not take into account the faster aquifer recorded for the intermediate and deeper zones. Based on DEC contractor experience with CAC injection in the FNSB, aquifer speed is likely to be a major factor in effectively parking the CAC in the desired zones. PFMs are a widely accepted tool for the assessment of contaminant flux and Darcy velocity information. They are cost-effective and relatively green technology compared to other options. The contractor in this report has provided sufficient information and backup for their reason for selecting to use PFM data for both contaminant flux monitoring and groundwater gradient calculations. We agree with the overall findings of using the PFM information for CAC design.	Agreed, Darcy velocity will be a major factor in CAC loading and the ability to effectively park the CAC in the desired zones. Design specifications for parking of CAC will be included in the QAPP for the injection phase. DEC: Noted.
6.	7	1: Introduction	"PFAS could have a potential impact on human health and the environment." Although research is still ongoing, research suggests that exposure to certain PFAS may lead to adverse health outcomes. DEC requests that the language in this sentence be adjusted to better represent the impact of PFAS on human health and the environment.	The sentence has been revised to state: "Because of their persistence, bioaccumulation potential, mobility, and toxicity, PFAS can negatively impact human health and the environment." DEC: Accept
7.	15	2.6: Investigative-	For the Liquid IDW, it is stated in the approved UFP-QAPP that wastewater characterization will be conducted.	To clarify, the approved UFP-QAPP does not state that wastewater characterization will be

Comment No.	Page	Section	Comment / Recommendation	Response
		Derived Waste (IDW) Management and Sampling	In the report it is not mentioned that the Liquid IDW was analyzed for contaminants. The text states, "The liquid was treated in accordance with the 2024 Operation and Maintenance Work Plan, Eielson Air Force Base, Alaska (AFCEC, 2024b) and discharged in accordance with DEC Division of Water Authorization Number AKG003059 under the AKG0030000 Hydrostatic and Aquifer Pump Testing General Permit." DEC requests more information be provided in the report to detail what occurred with the liquid IDW prior to being discharged. Also, DEC requests that the referenced permits be included in report, possibly in Appendix C: IDW Documentation.	conducted for liquid IDW, as the intent was to process liquid IDW at the EAFB IDW treatment plant. The QAPP states that the (primary) plan is to utilize the EAFB IDW treatment plant for T&D of liquid IDW. It included a contingency, if the IDW treatment plant became unavailable, then characterization samples would have been collected for transport, treatment, and disposal off of EAFB. During field work the IDW treatment plant was available to receive liquid IDW, analysis of liquid IDW for offsite disposal was not required. Generator knowledge was used for the waste profiling required for treatment at the IDW plant. Added detail: The EAFB Wastewater Treatment System consists of three 10,000-gallon uninsulated influent holding tanks, a pretreatment system, a treatment system, and a 14,000-gallon uninsulated effluent holding tank. The pretreatment system consists of an oil/water separator, an ozone generator and injector to disinfect and precipitate dissolved metals, a 3-cubic foot vessel containing adsorbent cellulose, a 3-cubic foot vessel containing filter sand, a 3-cubic ft vessel containing organoclay, and a 3-cubic foot vessel containing GAC. The treatment system contains a bag filter, two 4.5-cubic foot vessels containing GAC, two 5-cubic foot vessels containing PT1 ion exchange resin

Comment No.	Page	Section	Comment / Recommendation	Response
				primarily for metals removal, four cartridge filters, two 3-cubic foot vessels containing A3F ion exchange resin, and two 3- cubic foot vessels containing LC1 ion exchange polishing resin. Flow diagrams of the pretreatment and treatment modules are attached to authorization AKG003059. Prior to treatment and discharge, an Eielson AFB Wastewater Profile was developed for the liquid IDW using generator knowledge. The highest PFAS concentrations observed during the Eielson PFAS Remedial Investigation at Transect 02, approximately 600 feet upgradient of the DGI project location, were used as a conservative proxy for treatment and disposal. The wastewater profiling documents are included in the Permit Authorization AKG003059 - 2024 Annual Discharge Report (AFCEC, 2025). Referenced permit (AKG003059) was added to App C: IDW Documentation DEC: Accept.
8.	22 and 23	4.2.3.1: Geochemical Results	- Arsenic (total): 2.45 to 69.8 µg/L - Lead (total): all results ND except for CACMW-001-060 and CACMW-007-110 (532 and 515 µg/L respectively). Both the Arsenic and Lead levels in the groundwater greatly exceed the 18 AAC 75 Table C Groundwater Human Health Cleanup Levels. DEC understands that the	For this investigation, the groundwater analytical data were collected to provide baseline groundwater geochemistry and will inform the future CAC injection design for the purpose of mitigating potential interferences of non-PFAS analytes with PFAS CAC adsorption.

Comment No.	Page	Section	Comment / Recommendation	Response
			purpose of this report is for a PFAS Treatment Pilot Study at FT009P. There are also high levels of dissolved Iron and Manganese, both are indicators oxidation of POL by microorganisms. Are there plans to investigate this area for potential contamination in a future effort?	Naturally occurring metal concentrations frequently exceed the DEC cleanup levels in groundwater of the Tanana Valley. Metals results in groundwater can be compared to background threshold values (BTVs) presented in the *Development of Background Threshold Values for Metals in Soil and Groundwater at Eielson Air Force Base, Alaska*, prepared for the Air Force in March, 2023. In consideration of this study: The BTV for arsenic is 43 µg/L. At the DGI project location the BTV was exceeded in shallow wells only (screened 10 to 60 ft bgs) with an average concentration of 58.5 µg/L. Naturally occurring arsenic concentrations can vary widely in groundwater in the Tanana valley and because concentrations observed at the project location marginally exceed the BTV, it is unlikely that the concentrations represent an anthropogenic source. The lead range reported in the text was in error with omitted decimals – it has been revised to "...except for CACMW-001-060 and CACMW-007-110 (0.532 and 0.515 µg/L respectively). These values are below the DEC cleanup level. DEC: Thank you for this correction. Accept.

				Dissolved Iron and Manganese concentrations at the project location, in all cases, are below BTV's of 34,100 µg/L and 4,520 µg/L for Fe and Mn, respectively. At this time, the AF does not plan to investigate the DGI project location for potential contamination based on metals concentrations presented in the DGI report. DEC: Noted.
9.	30	4.2.4	**Section 4.2.4** outlines two methods used to calculate mass flux, which were then compared to the PFM (Passive Flux Meter) data provided by EnviroFlux: **Method 1:** Mass flux was calculated using low-flow analytical results combined with the PFM-derived Darcy velocity for the specific depth interval. This method was preferred due to its consistency with previous site studies. However, it appears that a uniform Darcy velocity of **0.00084 ft/ft** was applied across all depths rather than using depth-specific values of 0.00043 ft/ft for the shallow zone, 0.0011 ft/ft for the intermediate zone and 0.0010 ft/ft for the deep zone. Is this a deviation from the work plan? If so, please add to a deviations section. Will you be using an average velocity for design or specific velocity for each zone?	For the calculation of mass flux using low-flow data, the Darcy velocity from the PFM at the corresponding low-flow sample interval was used. Although the text stated that a uniform hydraulic gradient of 0.00084 ft/ft, rather than depth specific hydraulic gradient, was applied in the calculation of mass flux, this statement was revised in the report text as the Darcy velocity term already includes the gradient and is not needed in the calculation. $$Darcy\ Velocity\ (V) = Ki$$ Where: K = hydraulic conductivity and i = hydraulic gradient The calculation of mass flux using low-flow data was calculated as

Comment No.	Page	Section	Comment / Recommendation	Response
				$$Mass\ Flux\ (J) = V\ C$$ Where: V = PFM Darcy velocity and C = low-flow sample concentration Low-flow mass flux values have been corrected in Exhibit 6. The interpretation of the results did not change because of this correction and this calculation approach is not a deviation from the work plan. DEC: Accept. Regarding design, varied CAC loading will be considered along the transect and/or within different intervals based on the distribution of measured mass flux. However, varied CAC loading will need to be balanced with field implementation needs and CAC dosing design will likely be based on maximum flux observed. Design details will be specified in a future QAPP for the injection phase. DEC: Noted.
10.	29	4.2.4	Please follow the requirements for data reporting in the DEC Technical Memo "Guidelines for Data Reporting". DEC would prefer the more conservative LOD.	In accordance with the DEC Technical Memo "Guidelines for Data Reporting" several components of the report have been updated as follows: • **Tables 4, 10, and 11** – these tables previously showed non-detects as less than the LOQ. In the revised tables,

Comment No.	Page	Section	Comment / Recommendation	Response
				non-detects are reported as less than the LOD. • **Table 12** – this table previously showed PFM mass flux where mass flux for non-detects was represented as zero. In the revised table, mass flux for non-detects was calculated using the LOD. The calculated mass flux values for PFAS constituents with non-detect results are shown with a less than ("<") symbol. • **Figures 4, 5, and 6** – Data boxes on these figures showed the result for total PFAS. The calculation of total PFAS previously included non-detects at the LOQ. In the revised figures, total PFAS values were calculated using LODs to represent non-detects. • **Figures 9 and 10** – The second charts on each of these figures previously used total PFAS calculated with non-detects as the LOQ for low-flow results and as zero for PFM results. Total PFAS mass flux estimates using the LOD to represent for non-detects incorporates a significant calculated contribution (20 to 44%) from PFAS constituents that have been rarely detected (or not at all) in the DGI dataset (Exhibit 7). As

Comment No.	Page	Section	Comment / Recommendation	Response
				we don't believe this to be representative data for comparison to the low-flow results, the chart for total PFAS has been replaced with charts for PFHxS, which was detected in all PFM samples and represents the second-most prevalent PFAS constituent in the DGI dataset and is a better dataset for a direct comparison to low-flow data. • **Exhibits 3, 4, and 5 -** These exhibits previously used LOQs to represent non-detects in their calculations. They have been updated to use LODs to represent non-detect values. • **Exhibit 7** – This exhibit previously showed the percentage of total PFAS mass flux by analyte where total PFAS was calculated with non-detects as zero. The revised exhibit shows the percentage of total PFAS for each analyte with total PFAS calculated with non-detects at the LOD. • **Previous Exhibit 8** - This exhibit previously showed the average total mass flux by depth zone when flux was calculated with non-detects equal to zero and at the LOQ. Since a revision to the PFM results has been made to equate non-detects to the

Comment No.	Page	Section	Comment / Recommendation	Response
				LOD for the calculation of mass flux, this exhibit and the associated text are no longer applicable and have been removed from the text. • **Exhibit 8 (formerly Exhibit 9)** – This exhibit previously showed the average mass flux for the top five PFAS at the site by depth interval where mass flux for non-detects was calculated using zero. The revised exhibit now shows the average mass flux where mass flux for non-detects is calculated using the LOD. • **Exhibit 9 (formerly Exhibit 10)** - This exhibit previously showed the total PFAS mass discharge where mass flux was calculated with non-detects as zero values. The revised exhibit shows total PFAS mass discharge where flux is calculated with non-detects at the LOD. DEC: Accept.
11.	Figures and Tables		In the Figures section of the report, the y-axis for Figure 8, 11, and 12 is designated as Elevation (feet above mean sea level). In the Tables section the main value that is reported in a similar was is Feet Below Ground Surface (bgs). DEC would recommend utilizing the same measurement for each, and would prefer Feet BGS.	A secondary axis for approximate feet below ground surface has been added to Figures 8, 11, and 12. It should be noted that while the ground surface across the site varies little in elevation, the axis is approximate as the feet below ground surface at a given depth is slightly different between monitoring wells based on the actual elevation of the surface at each monitoring well. DEC: Accept.

12.	25	Exhibit 4	Exhibit 4 lists PFHxS as a long-chain PFAS; however, it is typically referred to as a short-chain compound. Will the formulation of the CAC account for the lower affinity to CAC given the short-chain status?	PFHxS is classified as a long-chain PFAS by the USEPA, but is commonly referred to as a short-chain PFAS based on its behavior, particularly in terms of solubility, mobility, and dispersion. PFHxS and other short-chain PFAS will be considered in the CAC loading and will be specified in a future QAPP for the injection phase. DEC: Noted.

Subject:	[Non-DoD Source] Eielson CAC PRB Data Gap Report-EPA Comments Resolved
Date:	Monday, August 18, 2025 1:22:52 PM
Attachments:	2025.8.18 CAC Report_EPA Comments_RTC.docx

Hello Mike,

EPA has reviewed the USAF response to EPA comments on the Eielson CAC PRB data gap report and all EPA comments have been resolved. Pending any concerns from ADEC, EPA concurs with this report being finalized. Please see attached comment table for details.

Thank you,

Erin Gleason

1	19	4.1.1	In the last paragraph on page 19, the statement that "..soil does not appear to be an ongoing source of PFAS or to be storing significant PFAS mass given the limited detection of PFAS in soil during this investigation and limited distributions of finer, higher organic content soils where the highest soil detections were encountered" needs to be backed up by data to show the amount of PFAS sorbed onto soil and the amount of PFAS in the groundwater and their relative contribution towards the total PFAS mass in the aquifer system.	The text in Section 4.1.1 has been revised to add an evaluation of soil and groundwater PFAS concentrations to determine if they are in equilibrium. Observed PFOS soil concentrations are significantly less than the predicted equilibrium concentrations based on groundwater data, suggesting that soil concentrations have not yet equilibrated with groundwater and that soil is not an ongoing source of PFAS in the DGI study area. The text has also been updated to specify that: "PFAS concentrations in soil and the potential for PFAS to desorb from soil and partition back into the dissolved phase will be accounted for during injection design." **EPA Response (August 18, 2025): Accept**
2	76	Table 10	Total and dissolved metals of sodium and	Total and dissolved sodium and potassium were not included in the analyte list for groundwater samples in the Final QAPP. As such, analysis of these

Comment #	Page	Section	EPA Comment (April 11th, 2025)	USAF Response (June 20, 2025)
			potassium should be included in the analyte list, and dissolved bicarbonate concentrations should be calculated using measured values of groundwater pH and alkalinity, and charge balance of cations and anions in groundwater samples should be evaluated.	metals was not requested for the samples collected during the implementation of the DGI. In the absence of analytical results for dissolved sodium and potassium, the charge balance of cations and anions will not be evaluated. The alkalinity results presented in Table 10 are reported on a mass per volume basis (µg/L), which includes the mass of all carbonate species in the sample. Carbonate speciation by pH at the circumneutral pH of the groundwater at the site (7.24 to 8.44, Appendix A5) suggest that the dominant species within the sample is generally greater than 90% bicarbonate, based on the below diagram (Brezonik & Arnold 2022).  Figure 8.4 pC-pH diagram for the carbonate system at $C_T = 1 \times 10^{-3}$ M. Bicarbonate concentrations were not added to Table 10, as they are very similar to total alkalinity concentrations and don't provide significant

				additional information. This keeps Table 10 consistent in presenting laboratory-provided analytical data. **EPA Response (August 18, 2025): Accept**
3	9	Section 1	"PFAS could have a potential impact on human health and the environment"- PFAS has known human health and environmental impacts. Please revise sentence to clarify the intent here.	The sentence has been revised to state: "Because of their persistence, bioaccumulation potential, mobility, and toxicity, PFAS can negatively impact human health and the environment." **EPA Response (August 18, 2025): Accept**
4	11	Section 1.3	What are the OSD risk screening levels? Are those the same as EPA RSLs?	The Department of Defense (Office of the Undersecretary of Defense, OUSD) has reviewed EPA's RSLs and MCLs and has identified the screening levels to be used in DoD cleanup projects over several iterations, with the version cited in the Draft document dating to 2024. There is now a more recent OUSD PFAS screening level memo dating from January 2025, so Section 1.3 of the text has been revised to reflect this update. This has added a screening level for perfluorodecanoic acid (PFDA), so that has been added to Exhibit 1 and the Table 11 PFAS results have been re-screened against the new screening level for PFDA. The 2025 update also included screening levels for TFSI and PFPrA, but these compounds were not included in the Draft Method 1633 analysis used for the Data Gap Investigation and so they have been added to Exhibit 1 for reference but are not otherwise discussed in this report. The project analytical laboratory is now running final Method 1633 and reporting these two additional compounds as of 2025. **EPA Response (August 18, 2025): Thank you for the explanation. Accept**

5	16	Section 2.5	Why did the PFMs get stuck? Do you have any suggestions on how to prevent this from happening in the future?	It is not entirely evident how the third PFM in a string of five PFMs became stuck in CACMW-001-060 upon retrieval. Presumably the wire rope/ferrule connection between the second and third PFMs in the string caught on an imperfection in the wire-wrapped stainless-steel well screen where it joined the PVC riser. This occurred with the first string of PFMs retrieved, in the first well of the PFM deployment/retrieval task. This was the only PFM to become stuck out of 216 (1/216 = 0.46%) PFMs retrieved during this task. Since 215 out of 216 PFMs were retrieved seamlessly, we consider the single stuck PFM an anomaly and attribute it to bad luck. The field team followed the manufacturers' recommendation and SOP for installing and retrieving PFMs, which was generally quite successful, and had no suggestions on how to improve the procedure. **EPA Response (August 18, 2025): Thanks for sharing some more details about the stuck PFM. Glad that it was only 1/216! Comment resolved.**
6	16	Section 2.5	Why Kevlar rope?	Kevlar rope was used upon recommendation from the manufacturer, EnviroFlux. It is favorable for this application because it is lightweight, flexible, strong, sinks in water, and has very low stretch. **EPA Response (August 18, 2025): Interesting. Thanks for sharing. Comment resolved.**
