

PUBLIC NOTICE

Red Dog Mine Applications and Draft State Decisions

On August 11, 2016, the State of Alaska is releasing the following application materials and draft state decisions relating to the Red Dog Mine for public review and comment. The project applicant, Teck Alaska Incorporated (TAK), requests state authorizations associated with ongoing operations.

- Alaska Department of Natural Resources, Division of Mining, Land and Water, has prepared draft Reclamation Plan Approval (F20169958).
- Alaska Department of Environmental Conservation has prepared draft Waste Management Permit No. 2016DB0002 for management of mine water, tailings and other solid wastes at the Red Dog Mine site.

The Red Dog Mine is an open pit zinc and lead mine, located in northwestern Alaska on private land owned by NANA Regional Corporation, with some support facilities located on State of Alaska lands. It currently consists of an open pit mine, a mill for processing ore, a tailings impoundment, waste rock storage areas, and support facilities. After processing, lead and zinc concentrates are transported from the mine facilities via a 52-mile road to a port facility located on the Chuckchi Sea.

Copies of the draft permit and approval, application materials, and support documents may be obtained online at:

www.dnr.alaska.gov/mlw/mining/largemine/reddog/

Hardcopies are also available for review at the following locations:

Alaska Department of Environmental Conservation / Fairbanks (610 University Avenue)

Alaska Department of Environmental Conservation / Anchorage (555 Cordova Street)

HOW TO COMMENT

The public comment period has been set at 33 days. A standard comment period lasts for 30 days. You can comment in writing.
