

Monitoring Summary for ALASKA BRANDS WTS

Public water system ID#AK2218566

Population: 500

February 4, 2014

Non-transient non-community, Surface water purchased

| Requirement | Required Sampling Frequency | Last Sample | Next Sample |
|-----------------------------------|-----------------------------|-------------|-----------------------|
| COLIFORM (TCR) | 1 sample(s) monthly | 03/08/2013 | Overdue; Collect ASAP |
| Sanitary Survey | Every 5 years | 12/14/2010 | 2015 |
| TP001 TP ALASKA BRANDS WTS | | | |
| BROMATE - SINGLE | 1 sample(s) monthly | 01/05/2012 | Overdue; Collect ASAP |

Operator Report

| Requirement | Location | Sampling Frequency | Last Report |
|----------------|----------|-----------------------------|--|
| OZONE RESIDUAL | OTHR | 1 samples 31 days per month | Test and record daily. Send reports to ADEC on the last day of the month (before the 10th day of the following month). |

Compliance Schedules

| | Due | Effective |
|-------------------|------------|------------|
| EPR | | 08/20/2012 |
| PMP CERTIFICATION | 08/20/2013 | |

**NSF = No sample found

- Periods are three years in length. The current period is 1/1/2014 - 12/31/2016 and the next period will be 1/1/2017 - 12/31/2019. Cycles are nine years in length. The current cycle is from 1/1/2008 - 12/31/2016 and the next cycle is 1/1/2017 - 12/31/2025.
- Periods for radionuclides (gross alpha, radium 226/228, and uranium) are three or six years in length. The current 6 year period is 01/01/2014 - 12/31/2019, the next 6 year period will be 01/01/2020 - 12/31/2025. Cycles for radionuclides are nine years in length.
- WL (well) or TP (treatment plant) is the entry point to the distribution system, except for raw water samples and WL (well) is the raw water tap. DS (distribution system) is the home and buildings that receive water from a piped water system.
- Water quality parameters are tested in order to conduct a corrosion control study. Please contact your engineer, health corporation, or certified laboratories for assistance.
- Water systems with multiple water sources that do not combine before entering the distribution must take one sample from each entry point to the distribution and may do a composite sample according to 18AAC80.325(17), 18AAC80.315(4).
- SOC waiver renewal forms are due every three year period. SOC waiver, new and renewal, forms can be found at <http://www.dec.alaska.gov/eh/dw/publications/forms.html>.
- Each public water system is required to have a water operator (or operators) certified at or above the drinking water treatment and drinking water distribution level assigned to the system. To check on current level of certification for your water operator please see the Alaska Certified Water/Wastewater Operator Database maintained by the Division of Water: <https://myalaska.state.ak.us/dec/water/opcert/Home.aspx?p=OperatorSearch>. If you have questions regarding the water system level or the operator certification level please contact Operator Certification at 907-465-1139 or at dec.water.fco.opcert@alaska.gov.

Monitoring summaries reflect sampling information the Drinking Water Program receives from certified laboratories and public water systems. If you notice any errors in this data, please contact your local ADEC Drinking Water Program office. Public water systems are responsible for compliance with monitoring requirements.

Monitoring summary completed by Leticia Tadina, Environmental Program Specialist/ADEC. If you have any questions please contact ADEC at (907) 269-7517 or 1-866-956-7656 Email: leticia.tadina@alaska.gov Fax: (907) 269-7650.

Sincerely,

Leticia Tadina
