

Monitoring Summary for ALASKA GENERAL SEAFOODS NAKNEK - CANNERY

Public water system ID#AK2261240

Population: 600

April 24, 2023

Non community water system, Ground water

Requirement	Sample Point ID	Required Sampling Frequency	Last Sample	Next Sample
Sanitary Survey		Every 5 years	05/23/2019	2024
DISTRIBUTION SYSTEM (Facility ID:DS001)				
COLIFORM (TCR)		1 sample(s) monthly	06/21/2022	Monthly, according to Sample Siting Plan
TP FOR ALASKA GENERAL SEAFOODS (Facility ID:TP001)				
NITRATE	SPTP001	1 sample(s) annually	06/17/2021	2023

Compliance Schedules

Schedule/Action	Due	Comments
Sanitary Survey Corrective Actions		
CORRECTIVE ACTIONS	04/30/2023	<p>In 2019, the system modified its distribution piping without prior engineering plan approval as required by 18 AAC 80.200. -kcs</p> <p>12/10/21 - Extended corrective action due date due to operating period. -kcs</p> <p>3/3/2022 - Extending corrective action due date as PWS advised that their engineer will be onsite to document modifications w/out approval in early May 2022. - DZ</p> <p>5/16/2022 - Due to scheduling conflict, engineer needs to reschedule site visit for early June 2022, so due date extended to 6/30/22. - DZ</p> <p>7/20/22: Checked in with QC Manager Liz Best, who is unsure as to whether AGS' engineer made it onsite to document modifications made without approval. Extended the deadline one week (7/27/22) to allow her time to determine where the engineer is in the approval process. -kcs</p> <p>11/17/22: Resolved pending engineering submittal approval. Extending the deadline to April 30, 2023. -kcs</p> <p>11/18/22: Resolved pending engineering approval. AGS' Cameron Currie reported, by way of Kim Johnson at Pannone, that the engineering evaluation was submitted Monday (11/14/22). Reached out to Chris Pletnikoff to confirm submittal and ask to be kept in the loop moving forward. -kcs</p>

Seasonal Start Up

RTCR-SEASONAL START-UP PROCEDURES	05/01/2023	Complete start up procedures BEFORE serving water to the public
RTCR-SUBMIT SEASONAL START-UP CERT FORM	05/11/2023	Submit Seasonal Start-up Certification form to DEC within 10 days of serving water to public. Electronic form is located on DEC website: http://dec.alaska.gov/eh/dw/rtrcr/

**NSF = No sample found

- 1) Periods are three years in length. The current period is 1/1/2023 - 12/31/2025 and the next period will be 1/1/2026 - 12/31/2028. Cycles are nine years in length. The current cycle is from 1/1/2020 - 12/31/2028 and the next cycle is 1/1/2029 - 12/31/2037.
- 2) Periods for radionuclides (gross alpha, radium 226/228, and uranium) are three or six years in length. The current 6 year period is 01/01/2020 - 12/31/2025, the next 6 year period will be 01/01/2026 - 12/31/2031. Cycles for radionuclides are nine years in length. The current cycle is from 01/01/2017 - 12/31/2025 and the next cycle is 01/01/2026 - 12/31/2034.
- 3) WL (well) or TP (treatment plant) is the entry point to the distribution system, except for raw water samples and WL (well) is the raw water tap. DS (distribution system) is the home and buildings that receive water from a piped water system.
- 4) Water quality parameters are tested in order to conduct a corrosion control study. Please contact your engineer, health corporation, or certified laboratories for assistance.
- 5) Lead/Copper samples on an annual or 3 year schedule should be collected in month of warmest water temperature.
- 6) Water systems with multiple water sources that do not combine before entering the distribution must take one sample from each entry point to the distribution and may do a composite sample according to 18AAC80.325(17), 18AAC80.315(4).
- 7) SOC waiver renewal forms are due every three year period. SOC waiver, new and renewal, forms can be found at <http://dec.alaska.gov/eh/dw/soc/>.
- 8) Each public water system is required to have a water operator (or operators) certified at or above the drinking water treatment and drinking water distribution level assigned to the system. To check on current level of certification for your water operator please see the Alaska Certified Water/Wastewater Operator Database maintained by the Division of Water: <https://dec.alaska.gov/Applications/Water/OpCert/Home.aspx?p=OperatorSearch>. If you have questions regarding the water system level or the operator certification level please contact Operator Certification at 907-465-1139 or at dec.water.fco.opcert@alaska.gov.

Monitoring Summaries reflect sample results the Drinking Water Program has record of at the time the summary is drafted (see date at top of summary). If information appears incorrect or is inconsistent with previous monitoring summaries please contact DW staff. Monitoring summaries are part of the DW Program's compliance assistance efforts to summarize requirements to help water systems stay in compliance. However, they do not cover all items that may be required of a Public Water System (PWS), nor does it supersede the regulation requirement as outlined in the Code of Federal Regulations or the Alaska Administrative Code. The PWS owner/operator is required to understand or seek assistance in understanding what regulations apply to their PWS.

Monitoring summary completed by John Davis, Environmental Program Specialist/ADEC. If you have any questions please contact ADEC at 907-262-8201 or Email: john.davis@alaska.gov Fax: 907-262-2294.

Sincerely,

John Davis
Environmental Program Specialist
