

Monitoring Summary for THE VALLATA

Public water system ID#AK2310324

Population: 63

March 3, 2021

Non community water system, Ground water

Requirement	Sample Point ID	Required Sampling Frequency	Last Sample	Next Sample
Sanitary Survey		Every 5 years	08/19/2015	Overdue Survey; Schedule ASAP
DS THE VALLATA (Facility ID:DS001)				
COLIFORM (TCR)	SPDS001TCR	1 sample(s) monthly	01/06/2021	Monthly, according to Sample Siting Plan
TP FOR THE VALLATA (Facility ID:TP001)				
NITRATE	SPTP001	1 sample(s) annually	09/30/2020	2021 sample must arrive to lab on ice

Compliance Schedules		
	Due	Comments
Sanitary Survey Corrective Actions		
CORRECTIVE ACTIONS	02/05/2016	Residence attached to system uses glycol in boiler system. Verification needs to be submitted that the make-up water line has appropriate back flow prevention installed and that it is installed in accordance with the plumbing code. This will be checked during 2021 sanitary survey inspection.

**NSF = No sample found

- Periods are three years in length. The current period is 1/1/2020 - 12/31/2022 and the next period will be 1/1/2023 - 12/31/2025. Cycles are nine years in length. The current cycle is from 1/1/2020 - 12/31/2028 and the next cycle is 1/1/2029 - 12/31/2037.
- Periods for radionuclides (gross alpha, radium 226/228, and uranium) are three or six years in length. The current 6 year period is 01/01/2020 - 12/31/2025, the next 6 year period will be 01/01/2026 - 12/31/2031. Cycles for radionuclides are nine years in length. The current cycle is from 01/01/2017 - 12/31/2025 and the next cycle is 01/01/2026 - 12/31/2034.
- WL (well) or TP (treatment plant) is the entry point to the distribution system, except for raw water samples and WL (well) is the raw water tap. DS (distribution system) is the home and buildings that receive water from a piped water system.
- Water quality parameters are tested in order to conduct a corrosion control study. Please contact your engineer, health corporation, or certified laboratories for assistance.
- Lead/Copper samples on an annual or 3 year schedule should be collected in month of warmest water temperature.
- Water systems with multiple water sources that do not combine before entering the distribution must take one sample from each entry point to the distribution and may do a composite sample according to 18AAC80.325(17), 18AAC80.315(4).
- SOC waiver renewal forms are due every three year period. SOC waiver, new and renewal, forms can be found at <http://www.dec.alaska.gov/eh/dw/publications/forms.html>.
- Each public water system is required to have a water operator (or operators) certified at or above the drinking water treatment and drinking water distribution level assigned to the system. To check on current level of certification for your water operator please see the Alaska Certified Water/Wastewater Operator Database maintained by the Division of Water: <https://dec.alaska.gov/Applications/Water/OpCert/Home.aspx?p=OperatorSearch>. If you have questions regarding the water system level or the operator certification level please contact Operator Certification at 907-465-1139 or at dec.water.fco.opcert@alaska.gov.

Monitoring summaries reflect sampling information the Drinking Water Program receives from certified laboratories and public water systems. If you notice any errors in this data, please contact your local ADEC Drinking Water Program office. Public water systems are responsible for compliance with monitoring requirements.

Monitoring summary completed by Teslyn Visscher, Environmental Program Specialist/ADEC. If you have any questions please contact ADEC at (907) 451-3038 or 1-800-770-2137 Email: teslyn.visscher@alaska.gov Fax: (907) 451-2188.

Sincerely,

Teslyn Visscher
