Reportable Diseases for Animals and Animal Products to the State Veterinarian:

Certain disease conditions pose or may pose significant threats to animal health, public health, the environment, or the food supply. Any licensed veterinarian, any person operating a diagnostic laboratory, or any person who has been informed, recognizes or should recognize, by virtue of education, experience, or occupation, that any animal or animal product is, or may be affected by, has been exposed to, or may be transmitting or carrying any of the following diseases must report that information to the State Veterinarian by telephone or facsimile.

Any animal disease not known to exist in the United States, any disease for which a control program already exists, or any unexplained increase in the morbidity or mortality of any animal population must be reported. Any conditions caused by exposure to toxic substances that have or may have the potential to be an animal health, public health, or food safety threat must be reported immediately.

Immediate Reporting the discovery of, the existence of, or the suspected existence of the following foreign or eradicated diseases:

1. African Horse Sickness;
2. African Swine Fever;
3. Bovine Spongiform Encephalopathy (BSE);
4. Caprine and Ovine Brucellosis (excluding *B. ovis*);
5. Classical Swine Fever (Hog Cholera);
6. Contagious Bovine Pleuropneumonia;
7. Contagious Equine Metritis;
8. Contagious Agalactia;
9. Contagious Caprine Pleuropneumonia;
10. Dourine;
11. Enterovirus Encephalomyelitis (exotic strains);
12. Epizootic Lymphangitis;
13. Equine Piroplasmosis;
14. Exotic Newcastle Disease;
15. Foot and Mouth Disease (all types);
16. Glanders;
17. Heartwater;
18. Horse Pox;
19. Japanese Encephalitis;
20. Lumpy Skin Disease;
21. Malignant Catarrhal Fever (Wildebeest or foreign strain);
22. Nairobi Sheep Disease;
23. Ovine Pulmonary Adenomatosis;
24. Peste des Petits Ruminants;
25. Rabies;
26. Rift Valley Fever;
27. Rinderpest;
28. Salmonellosis (S. abortus ovis);
29. Screwworm;
30. Pox in sheep or goats;
31. Surra (*Trypanosoma evansi*);
32. Theileriasis;
33. Trypanosomiasis;
34. Venezuelan Equine Encephalomyelitis.
**Report by the End of the Day** the discovery of, the existence of, or the suspected existence of the following domestic animal diseases:

1. Anthrax;
2. Avian influenza (High or Low Pathogen);
3. Swine Vesicular disease;
4. Sylvatic Plague;
5. Vesicular Stomatitis;
6. West Nile virus.

The following **Foreign Fish Diseases** are included in this category:

1. Epizootic Hematopoietic Necrosis;
2. Herpesvirosis of Salmonids (Onchorynchus Masou Virus Disease);
3. Spring Viremia of Carp
4. Viral Hemorrhagic Septicemia (European Strain).

**Report by the Next Working Day** after discovery of, the existence of, or the suspected existence of the following animal diseases (presence of clinical signs or positive diagnostic tests):

1. Brucellosis;
2. Contagious Ecthyma;
3. Chronic Wasting Disease (CWD);
4. Eastern or Western Equine Encephalitis;
5. Equine Infectious Anemia
6. Fowl Typhoid (Salmonella gallinarum);
7. Infectious Coryza;
8. Infectious Bronchitis (Avian)
9. Laryngotracheitis (Avian Infectious);
10. Lyme disease;
11. Ornithosis or Psittacosis in birds;
12. Pullorum Disease;
13. Potomac Horse Fever;
14. Pseudorabies;
15. Scrapie;
16. Tuberculosis (*M. tuberculosis, M. bovis* or *M. avium*);
17. Tularemia

**Report by the Fifth Working Day of Each Month** the first case of the following animal diseases as diagnosed by laboratory procedures on any animal during the previous month:

1. Anaplasmosis;
19. Fowl Cholera (*Pasteurella multocida*)
(2) Atrophic rhinitis;   (20) Fowl Pox;
(3) Babesiosis;   (21) Hemorrhagic Septicemia
(4) Bovine Genital Campylobacteriosis;   (Pasteurella multocida);
(5) Avian Infectious Bronchitis;   (22) Horse Mange;
(6) Avian Tuberculosis;   (23) Infectious Bursal Disease ;
(7) Caprine Arthritis/Encephalitis;   (24) Infectious Bovine Rhinotracheitis
(8) Cysticercosis;   (25) Infectious Hematopoietic Necrosis
(9) Dermatophilosis (Dermatophilus congolensis);   (26) Leptospirosis;
(10) Duck Viral Enteritis;   (27) Ovine Progressive Pneumonia;
(11) Duck Viral Hepatitis;   (28) Marek’s Disease
(12) Blue Tongue;   (29) Mycoplasma gallisepticum;
(13) Echinococcosis/Hydatidosis;   (30) Ovine Epididymitis (B. ovis);
(14) Enzootic Abortion of Ewes (Chlamydia psittaci);   (31) Paratuberculosis (John’s Disease);
(15) Enzootic Bovine Leukosis;   (32) Porcine Reproductive / Respiratory
(16) Equine Influenza (Virus type A);   Syndrome;
(17) Equine Rhinopneumonitis (1 and 4);   (33) Q Fever (Coxiella burnetii);
(18) Equine Viral Arteritis;   (34) Transmissible Gastroenteritis;
(19) Trichomoniasis.

Report by the Tenth Working Day of Each Month the first case of the following animal
diseases where there are clinical signs or as diagnosed by a laboratory performing testing or
diagnostic procedures on any animal during the previous month:

(1) Aleutian Disease in mink   (21) Listeriosis;
(2) Avian Chlamydiosis;   (22) Malignant Edema in equine or cattle;
(3) Blackleg (Clostridium chauvoei);   (23) Malignant Catarrhal Fever (Sheep
associated strain);
(4) Bovine Viral Diarrhea   (24) Mycotic Stomatitis;
(5) Botulism;   (26) Newcastle Disease (lentogenic or
low pathogenic strain);
(6) Campylobacteriosis;   (28) Salmonellosis
(7) Cryptosporidiosis (clinical cases only);   (29) Scabies in swine or other small
animals (Psoroptic mange);
(8) Distemper in dogs or mink;   (30) Strangles (S. equi);
(9) Edema Disease;
(10) Equine Protozoal Myeloencephalitis;
(11) Erysipelas;
(12) Feline Panleukopenia;
(15) Heartworm;
(16) Histoplasmosis;
(17) Influenza in swine or equine;
(19) Bovine Leukosis;
(31) Tetanus (C. tetani);
(32) Transmissible Encephalopathy in mink
(33) Toxoplasmosis
(34) Trichomoniasis.
