

# ADEC UNDERGROUND STORAGE TANKS ADDENDUM

- Document any upgrade, retrofit, replacement, or repair to any component of an underground storage tank (UST) system.
- A UST system is defined to include the tank, piping, tank monitor, spill bucket, overflow prevention, leak detection devices, pumps and/or related equipment, the failure of any component of which could cause a release, or cause a release to go undetected or uncontained (*PEI RP100-Recommended Practices for Installation of Underground Liquid Storage Systems, 18 AAC 78.025(f)(1)(B)*).
- The Owner/Operator must retain this document for the life of the UST system (*18 AAC 78.100(f)(1)(B)*).
- Submit a copy to the ADEC UST office (*18 AAC 78.455(a)(9)*) by email to: [Cheryl.Paige@alaska.gov](mailto:Cheryl.Paige@alaska.gov), [Randy.Guintu@alaska.gov](mailto:Randy.Guintu@alaska.gov), or [DEC.SPAR.USTPN@alaska.gov](mailto:DEC.SPAR.USTPN@alaska.gov), or mail to ADEC SPAR UST Office, 555 Cordova St, Anchorage 99507-2617, or fax, 907-269-7687
- Questions? Contact Cheryl Paige at 907-269-7679, or Randy Guintu at 907-269-3052.
