Baby Move™ Prune Concentrate Recalled for Possible Salmonella Contamination

(JUNEAU, AK) – Wellements LLC has issued a recall for Baby Move™ Prune Concentrate liquid dietary supplement because a supplier of one of the ingredients used in the product has indicated that the ingredient has the potential to be contaminated with *Salmonella*.

Salmonella is an organism that can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy persons infected with *Salmonella* often experience fever, diarrhea (which may be bloody), nausea, vomiting and abdominal pain beginning 12-72 hours after infection. The illness usually lasts 4-7 days. In rare circumstances, infection with *Salmonella* can result in the organism getting into the bloodstream and producing more severe illnesses such as arterial infections (i.e., infected aneurysms), endocarditis, and arthritis. People exhibiting any of these symptoms should contact their healthcare providers.

The product being recalled is Wellements Baby Move™ Prune Concentrate 4oz UPC code of 729609019878, sold in a glass bottle and packaged in an individual product carton. At this time, all product lots up to and including lot number 12179 are subject to the voluntary recall.

Alaska's DEC has confirmed these products have been distributed in Alaska. To date, no lots of Wellements Baby Move™ have tested positive for *Salmonella* contamination and there have been no reports of illness.

Consumers with questions may contact the company between 8am – 5pm PST at 800-255-2690 ext. 210. For more recall details, please visit:
<http://www.fda.gov/Safety/Recalls/ucm312991.htm?source=govdelivery>

For more information on recalls affecting Alaskans, visit DEC's website:
