

## Alaska Department of Environmental Conservation Division of Water Wastewater Discharge Authorization Program Daily Inspection Log - Mechanical Placer Miners

Permittee Name: Receiving Water: Authorization Number: AKG370

8						
Date	Time	Inspector Name	Water Control Devices (dikes, diversions, ponds, etc) intact? (Y/N*)	Ponds Require Cleaning? (Y*/N)	Ponds short circuiting? (Y*/N)	Visual turbidity downstream greater than upstream? (Y*/N)
	1					

Comments/Corrective Actions:

\*Corrective actions are required if water control devices have failed, excessive sediment build up in ponds is apparent, if ponds are short circuiting, or if the downstream turbidity is greater than that upstream of the mine site. Permittees should review the entire permit for details. If corrective action is required, refer to Alaska DEC User's Handbook Best Management Practices for Placer Mining: Controlling Pollution to Protect Surface Water Quality.
