ALASKA CLEAN WATER FUND
State Wastewater Loan Program

Intended Use Plan (IUP) -Amended

FINAL – January 2015

AMENDED ACTION
The 2015 Alaska Clean Water Fund (ACWF) Intended Use Plan (IUP) was amended upon request by system borrowers to include new projects that are in need of immediate funding to meet project scheduling. Four new projects were added with one listed on the Point Source Project Priority List and the other three on the Point Source Project Priority Planning List. Communities submitting new projects were Nome, Kodiak and Haines, and the total dollar amount of these projects is $7,055,000. Other amended actions include updated financials to provide current total available loan funds.

PROGRAM OVERVIEW
The purpose of the Alaska Clean Water Fund (ACWF) is to make low interest loans available to Alaskan municipalities and other qualified entities for financing wastewater and water quality related projects.

Loans can finance up to 100 percent of a project’s eligible costs for planning, design and construction of publicly owned facilities. In addition, loans can serve as local match for the Alaska Department of Environmental Conservation (ADEC) Municipal Water, Sewer and Solid Waste Matching Grants Program or most other federal or state funding sources.

A range of projects and associated costs are eligible for funding under the ADEC loan programs, as described in Title 18, Chapter 76 of the Alaska Administrative Code.

Examples of Improvements Fundable Under ACWF

- Wastewater Treatment Facilities
- Sewer Interceptor and Collection Systems
- Storm Water Collection and Treatment
- Nonpoint Source Prevention and Restoration Projects
- Enhancement Projects

The ADEC Municipal Grants and Loans Section (MG&L), in the Division of Water, is responsible for administering this loan program. The loan program is regulated by the code mentioned above and is audited under the State of Alaska’s Single Audit Act. An independent audit of the program is also conducted each year.

The purpose of this IUP is to describe how ADEC plans to spend the monies of the ACWF and how the expenditures meet the goals of the overall program.

PROGRAM UPDATES
As initiated last year, ADEC continues to put forth an effort to increase the programs pace which includes executing loans sooner, having project funds disbursed earlier, and having projects go into repayment sooner after close out. New for this year’s IUP is the inclusion of American Iron & Steel (AIS) requirements, which ADEC has made every effort to ensure borrowers are made aware of this newly enacted requirement under
the Clean Water State Revolving Fund (CWSRF) program. Additionally, commitment of additional funds is being made available to borrowers based on estimated repayment schedules of future years. This calculation is based on the demand for loan disbursement of funds that has historically been spread over at least four years after loan execution. Additionally, the inclusion of two and a half years’ loan repayments better matches the supply of funds to the demand for funds. Failure to provide loans at a level that can be supported by the program means fewer projects completed and higher balances of CWSRF cash remaining unused. Future calculations of funds available may be adjusted up or down as conditions warrant. Starting in State Fiscal Year (SFY) 15 ADEC will supplement the 4 percent administrative set aside currently used to pay for administrative expenses for program operations with the annual loan fee account. ADEC charges an annual loan fee in the amount of 0.5 percent of the unpaid loan balance. ADEC anticipates running the program completely with the loan fee account in future years and will bank the 4 percent allowed under the capitalization grant for administrative use.

PROGRAM GOALS
The ADEC administers the Alaska Clean Water Fund, guided by the following long and short term goals:

Long Term
1. Protect public health and the waters of the State by offering financial assistance for the planning, design and construction of eligible projects.
2. Assist local communities as they strive to achieve and maintain statewide compliance with federal and state water quality standards.
3. Facilitate the construction of projects by providing a long term source of financing to assist communities in attaining and maintaining compliance with the Clean Water Act as amended by the Water Quality Act Amendments of 1987, PL 100-4.
4. Promote coordinated efforts by the State and eligible entities to expedite funding of eligible projects.
5. Increase the pace at which available funds are loaned by marketing to existing and potential new eligible entities by expanding the overall funds usage. Continue to improve program guidelines and policies to encourage funding on those projects which offer earlier construction starts, earlier loan disbursements, and earlier project close outs and start of repayment.
6. Potential new entities may include lending to non-profit organizations for water quality type of projects, and to homeowners through a link-deposit program for on-site septic system improvements.
7. With implementation of new loan program management software, ADEC will continue to use a more aggressive lending policy based on the needs of the communities. Key factors include but are not limited to implementation of a required quarterly financial reporting system starting in SFY 2015, and offering “ready to proceed projects” incentives which should result in a faster turnaround time in the disbursements and repayment process. These changes are anticipated to result in better cash flow management of the program.
8. New for this year is the commitment of additional funds made available to borrowers. Commitment of additional funds is being made available to borrowers based on estimated repayment schedules of future years. This calculation is based on the demand for loan disbursement of funds that has historically been spread over at least four years after loan execution. Additionally, the inclusion of two and a half years’ loan repayments better matches the supply of funds to the demand for funds. Failure to provide loans at a level that can be supported by the program means fewer projects completed and higher balances of CWSRF cash remaining unused. Future calculations of funds available may be adjusted up or down as conditions warrant
Starting in SFY 15 ADEC will supplement the 4 percent administrative set aside currently used to pay for administrative expenses for program operations with the annual loan fee account. ADEC charges an annual loan fee in the amount of 0.5 percent of the unpaid loan balance. ADEC anticipates running the program completely with the loan fee account in future years and will bank the 4 percent allowed under the capitalization grant for administrative use.

**Short Term**

1. Under this IUP, provide low interest loans of $42.3 million dollars to communities for eligible wastewater treatment or nonpoint source pollution projects.
2. Provide not less than 10% of the anticipated capitalization grant amount awarded to the State and to the extent there are sufficient eligible project applications, funds for projects to be used for green infrastructure, water or energy efficiency improvements, and environmental innovative activities.
3. Provide at least 20% ($455,802) and no more than 30% (683,703) of the applicable portion of the anticipated capitalization grant amount as a form of funding subsidy.*
4. Complete the anticipated capitalization grant Agreement with the U.S. Environmental Protection Agency (EPA) for Alaska’s FFY14 Title VI allocation.
5. When interim requests are received from communities to add new projects to the IUP, ADEC will as needed, amend the IUP to accommodate communities’ needs.
6. To show commitment in promoting sustainability of wastewater facilities, ADEC in direction provided under EPA’s Sustainability Policy has added sustainable criteria to project scoring and ranking.
7. For SFY 2015, ADEC plans to initiate a new on-line disbursement request/financial reporting system for loan recipients, which minimally must be submitted by recipients every quarter. The on-line financial report will also be included as part of the current on-line quarterly project status reporting system which was initiated in SFY13. On-line payment reporting is expected to begin at the beginning of the first quarter of SFY 2015 (July 1 – September 30, 2014). Note, this was anticipated to be done in the previous fiscal but due to needed software upgrades a one year delay was necessary.
8. ADEC will continue to develop and implement a web based access system for incorporating a new financial and project management software package system for better program administration and forecasting. The primary objective for SFY 2015 will be to complete data flow between on-line reports Online Application System (OASys) and the financial management software Loan Grant Tracking System (LGTS).

* The amount of subsidization available only applies to the State’s capitalization grant portion of the total available federal CWSRF FFY13 allotment amount that is greater than $1 Billion.

**LOAN FUND PROCESS**

Annually, ADEC identifies funding sources, selects projects and distributes the funds to projects according to approved criteria and federal and state regulations.

**Funding Sources (as of November 15, 2014)**

ADEC has several sources of funds available to support the proposed project financing and program administrative costs for this IUP. The following table summarizes the monies contributed and the commitments and expenditures made since the inception of the program. The difference between the funds available and program commitments is the amount of funds available to use during this funding cycle. The following describes more fully each item in the table:

- The total amount of federal monies granted to the program including this application cycle is $232,399,135.
The federal grant request to EPA this year will be for $8,376,000 matched by state funds of $1,675,200.

State appropriations of $19,807,300 and bond receipts of $20,414,285 were secured earlier.

Other significant funding sources include investment interest earnings of $45,261,511, principal repayments on loans of $156,113,985 and interest repayments of $28,601,532.

Investment earnings and principal and interest payments of $6,626,878 are expected to be paid into the ACWF thru the end of SFY14.

Projected repayments of principal and interest for SFY15 and SFY16 is expected to total $19,188,060.

Fee account usage to supplement the 4 percent administrative set aside will be $448,000.

The total amount of loan commitments made to date is $417,509,726. This amount accounts for both increases and deobligated funds from projects that have completed construction.

The total amount of loan commitments pending to be executed in the SFY14 third quarter amounts to $18,177,696.

The $29,000,000 transfer from the Clean Water Fund to the Drinking Water Fund was completed August, 2007.

The program has set aside a total of $9,295,965 to pay for the costs of administering the program.

The program will use an additional $448,000 from the fee account to supplement the administrative set aside.

Previous bonding and transactions costs totaling $20,480,563 include administrative, bond sale and interest costs resulting from the sale of bonds that were incurred in previous years.

Bonding and transaction costs to be paid are $1,680,200.

A total of $42.3 million dollars will be available upon issuance of this amended IUP. The $42.3 million will be used to fund projects listed on the ACWF Funding Priority List for Point Source projects (Appendix Ia) and NonPoint Source projects (Appendix Ib).

ADEC draws administrative and subsidy (as principle forgiveness) funding at 100% federal. Draws for loan funding are split between state match and federal funding at a ratio that ensures the full state match requirement is met for the overall award, despite the 100% federal treatment of administrative funds. As of October 31, 2014, all ADEC draws are split between state match and federal funding at a ratio that ensures the full state match requirement is met for the overall award. This loan funding ratio is currently 16.6667% state match, 83.3333% federal.
As of November 15, 2014

**Funding Sources:**

- Federal Grants: $232,399,135
- FFY 14 Federal Allocation Capitalization Grant Request: $8,376,000
- FFY 14 State Match Appropriation: $1,675,200

**Bond Proceeds**

- State Match, prior years
  - State Match - General Funds: $19,807,300
  - State Match - Bond Proceeds: $20,414,285
- Total State Match: $40,221,585
- Investment Interest: $45,261,511

**Repayment**

- Loan Principal: $156,113,985
- Loan Interest (net of fees): $28,601,532
- Total Repayments: $184,715,518
- Projected 2014 Repayments and Investment Earnings: $6,626,878
- Projected 2015 Repayments: $9,758,908
- Projected 2016 Repayments: $9,429,160
- Transfer from Fee Account: $448,000

**Funds Available**

$538,911,894

**Program Commitments:**

- Loan Commitments: $417,509,726
- Applications Received:
  - ACWF#131411 Anchorage Girdwood WWTF, Ph. II: $5,000,000
  - ACWF#283091 Dillingham Municipal Landfill: $243,000
  - ACWF#481161 Ketchikan Schoenbar: $2,468,868
  - ACWF#503211 KIB Landfill: $3,000,000
  - ACWF#685281 Petersburg Pumpstation 1 Force Main: $2,093,315
  - ACWF#685271 Petersburg Scow Bay 1 Pump Station: $400,000
  - ACWF#561121 Mat-Su Central Landfill Cell 2A: $3,060,343
  - ACWF#783361 Sitka Channel, Lake & Monastery: $1,379,170
  - ACWF#783321 Sitka Monastery & Baranof: $533,000
- Total Loan Commitments Pending: $18,177,696
- Total Loan Commitments: $435,687,422
- Transfer from ACWF to ADWF: $29,000,000
- Administrative Set-Aside: $9,295,965
- Transfer from Fee Account: $448,000
- Previous Bonding and Transaction Costs: $20,480,563
- Bonding and Transaction Costs to Be Paid: $1,680,200

**Total Program Commitments**

$496,592,150

**Net Amount Available for Loans**

$42,319,745
SELECTION OF PROJECTS

1. Identification of Priority Projects
An electronic mailing was done on December 30, 2013 informing all interested recipients that the questionnaire was available on-line for the IUP. Eligible recipients were invited to complete and submit their questionnaires electronically. Information and details on Green Project Reserve and funding subsidies under the program were included in this initial notification.

An electronic mailing was done on November 3, 2014 informing eligible recipients that the ACWF questionnaire was available on the program’s web site for completing and submitting questionnaires for ready to go projects under the amended SFY15 ACWF IUP.

Using information from the questionnaires, several groups within ADEC worked together to evaluate the projects. Appendix IIa and IIb document the criteria used to assess the projects. Those criteria addressed these topics:

- Public Health
- Water Quality
- Receiving Water Usage
- Project Continuity
- Readiness to Proceed
- Ability to Repay
- Sustainability
- Prevention
- Restoration
- Stewardship
- Project Continuity
- Funding Coordination
- Point Source Priority Criteria Summary
- NonPoint Source Priority Criteria Summary

These assessments integrate the various water quality demands and needs of the State, assigning the highest priority to those projects that addressed the greatest public health and/or water quality threats.

After all projects were evaluated, they were ranked according to their scores. Using the project scores from the list, priority lists were prepared which included those projects with the highest rank, limited by the amount of funding expected to be available. With this year’s funding, a funding subsidy as principle forgiveness will be offered to eligible projects. Further information on qualifying for a subsidy can be referenced under the section titled “Additional Subsidization – Disadvantage Community Assistance”, page 10.

Under this amended IUP, approximately $8,463,949 is earmarked for projects that address nonpoint source water pollution. During this year’s solicitation, two proposals were received for nonpoint source projects totaling $2,730,000 and since the total project amount is less than funds available, any excess available funds will be made available to any underfunded point source Priority listed project. Subtracting the amount needed to fund nonpoint source projects from the total available amount of $42,319,745 leaves $39,589,745 to fund point source projects. Funding down the Point Source priority list to the Anchorage - Girdwood Wastewater Treatment Facility – Ph. II project will require $41,402,053 which exceeds the available amount by $1,812,308. We will fund this project to the level that there are funds available.

2. Project Incentives
New for this year is the addition of extra incentives to encourage projects to be under construction shortly after finalizing the IUP. The following incentives include but are not limited to the following actions.
• If a project questionnaire shows that construction will begin by no later than September 15, 2014, an extra 50 points will be added to the project’s overall questionnaire score. However, if during the application process construction start does not begin by this time or can at least be substantiated by a bid award or notice to proceed documentation; the application processing may be suspended to let other “ready to go” projects proceed with funding.

• Any project on the project priority planning list which can demonstrate having either a bid award made or have a signed construction contract in place at the time of issuance of the final IUP, and notice to proceed issued for construction by September 15, 2014, will be allowed to submit a loan application at any time after issuance of the final IUP.

3. **Public Review and Comments**
The IUP, including the ranked priority lists, will be made available to all eligible recipients and other interested parties. The IUP will be placed on the State of Alaska, Division of Water website. A thirty day public comment period will be followed with a notice published in a newspaper of statewide circulation. The notice will announce the availability of the ACWF priority list, criteria system and priority list funding procedures. Comments will be solicited during this public notice period. Appendix III is reserved for those comments and responses.

A ten day public notice was issued upon amending the IUP for including new ready to go projects. The public notice period ran from December 4, 2014 through December 13, 2014.

A second ten day public notice was issued due to late submitted projects from the community of Haines in need of immediate funding. The public notice period ran from December 24, 2014 through January 2, 2015.

**DISTRIBUTION OF FUNDING**

1. **Projects to be Funded**
When all public comments are received, ADEC will then evaluate project ranking and prepare a list of projects. The funding portion of the list (Appendix Ia and Ib) represents those projects, ranked by score, for which funding is expected to be available. The planning portion of the list (Appendix Ib) represents those projects whose rank falls below the funding portion of the list, and for which funding is not expected to be available.

When found necessary, ADEC will contact communities if project loan requests are determined to be excessive and could limit other project funding. Through negotiations, a revised lower amount through either project phasing or the community seeking other funding sources will be sought.

If a project is listed on a Project Funding Priority List with a subsidy or has demonstrated to be “ready to go” and received an additional 50 ranking points (as described under “Project Incentives” section on page 6 and 7), a project application may be submitted at completion of the IUP public notice period. The application does not need to be complete, but sufficient information should be provided to help initiate a community financial assessment for incurring the debt, and begin the environmental review process.

2. **Project Information**
Appendices Ia and Ib contain estimated dates for binding loan commitments and construction start, loan terms, disadvantage assistance, Green Project Reserve, subsidies, sustainability type, and project descriptions.
3. Disbursements
The estimated disbursement schedule for Point Source loan projects is presented in Appendix IVa. The estimated disbursement schedule for NonPoint Source loan projects is presented in Appendix IVb. These schedules are based upon target dates contained in Appendices Ia and Ib.

4. Federal Payments
Alaska’s proposed payment schedule for the FFY14 grant allotment is shown below. This schedule was developed based on projected needs for project construction and execution of loan agreements.

<table>
<thead>
<tr>
<th></th>
<th>FFY15 1st Quarter</th>
<th>FFY15 2nd Quarter</th>
<th>FFY15 3rd Quarter</th>
<th>FFY15 4th Quarter</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>$3,350,400</td>
<td>$2,512,800</td>
<td>$1,256,400</td>
<td>$1,256,400</td>
</tr>
</tbody>
</table>

NOTE: The federal payment schedule above was determined as follows:

The binding commitment schedule was reviewed. Estimated binding commitment amounts and estimated state administrative payment requests were added together for each federal fiscal year quarter in which they are scheduled to be paid, resulting in a total quarterly cash requirement.

5. Bypass of Projects
If a project on the fundable portion of the list has not turned in a completed loan application package or has not completed the state environmental review process in a timely manner (as described in the following paragraphs), it may be bypassed for another project on the priority list that is ready to proceed down to and including planning list projects and this includes projects with listed subsidized amounts. Specific rules on project by-passing are as follows:

a. If a loan application is not submitted for a project on the fundable portion of the list within two (2) months after first being placed on the priority list, the project will without justification be automatically by-passed by a lower scoring project ready to proceed. This action includes any project ready to proceed regardless if it is on either the Point Source or NonPoint Source funding list, as long as funding is available.

b. In this year’s federal funding of the ACWF is the requirement to meet minimal funding needs for offering loans with subsidies, soliciting projects with Green eligible components, and identify projects that meet equivalency. To meet these mandated minimal funding needs, ADEC will if necessary bypass a priority listed project with the next highest scored eligible project off the planning list which meets these requirements. This bypassing will be done until funding requirements are minimally met.

c. If any projects are equal in scoring, the following sequence will be used to differentiate between them:

1. If a project is already under construction or is out to bid, the environmental review has been completed, and the application has been completed, that project will be moved ahead.
2. If a project requires an earlier construction date, as a result of a compliance agreement or other legal order from EPA or ADEC, that project will be placed ahead of the others.
3. The project has been identified as having Green project components, or identified to meet equivalency.

4. A project with an earlier anticipated date for submitting a completed application will be moved forward.

5. If the projects are from the same community, the community may request that one be placed ahead of the other.

6. The individual scores from each criteria category will be compared until a difference is found. The project with the highest score in the individual category will be placed first.

6. Fund Transfer

Federal regulations allow a transfer of up to an amount equal to 33% of the Drinking Water Capitalization Grants. ADEC reserves the authority to transfer additional funds as appropriate at some time in the future, between the ACWF and Alaska Drinking Water Fund programs.

ADDITIONAL LOAN FUND POLICIES - ASSURANCES

1. Binding Commitments

ADEC will enter into loan agreements for 120 percent of the federal anticipated capitalization grant within one year of receipt of each payment from the federal government, as required by federal law.

2. Expeditious and Timely Expenditure

All funds will be expended or obligated in a timely and expeditious manner. First priority for all loans will be to assure compliance with the Clean Water Act as amended by the Water Quality Act of 1987. EPA’s Memorandum #SRF 99-05 requires the CWSRF program to execute binding commitments at least equal to the amount of funds available in the program, within one year of that fund availability. This schedule calculates the amount of funds available as of June 9, 2014, and compares that amount to the binding commitments executed as of June 9, 2014.

Funds Available as of June, 2014

</tr>
</tbody>
</table>

Total binding commitments as of November 15, 2014: 435,687,422

Binding commitments as a percentage of funds available: 98.17%

Additionally, to assure expeditious and timely expenditure of funds, a requirement that the first disbursement for a loan be made within two years after signing of the loan agreement has been implemented. If no disbursement is made within the two year period, the ADEC may take action to recall the loan; however, an extension may be granted upon a community’s request, if there is reasonable justification.

3. First Use Requirement

Alaska communities do not appear on the National Municipality Policy Non-Compliance List. Therefore, the “first-use” requirement of 40 CFR 35.3135(e) has been satisfied.

4. Title II Equivalency Compliance

The Clean Water Act and subsequent EPA regulations instituted the Clean Water State Revolving Fund loan program with numerous federal laws and authorities (Appendix V). ADEC requires compliance with these federal laws and authorities on selected ACWF loan projects. Projects that are chosen to be an equivalent project are noted only on the Point Source Priority and Planning Lists.
The selection process of an equivalent project will be based on the following criteria:

- Any project receiving a subsidy.
- Any project that comes from a non-disadvantage community and is over 10,000 in population.

The number of equivalent projects selected will be based on the cumulative funding amount of these projects and be shown that the amount equals or exceeds the annual federal anticipated capitalization grant amount.

5. Environmental Review
All projects receiving ACWF financial assistance will be subject to the EPA approved Environmental Review Procedures of the ACWF.

6. Reporting
   a) Federal Funding Accountability Transparency Act (FFATA)
      ADEC is committed to transparency and accountability under FFATA (reporting requirements may be obtained at their website https://fsrs.gov/). Program information, Intended Use Plans, Annual Reports, and other program materials are either posted on the ADEC/MGL website: http://www.dec.state.ak.us/water/MuniGrantsLoans/index.htm, or may obtain through the program office in Juneau at 410 Willoughby Street, Juneau, AK 999801. ADEC has chosen to use the equivalency method to meet FFATA reporting requirement. The project below was selected:

      Unalaska Landfill Phase II Expansion – Project number 879081

   b) Clean Water Benefits Reporting (CBR)
      Project milestones and information are reported through EPA’s Clean Water Benefits Reporting database. ADEC commits to entering benefits information on all projects into CBR by the end of the quarter in which the assistance agreement is signed.

   c) Quarterly Project Status Reporting
      Quarterly project status reports for all borrowers are required to be filed with ADEC once a funding agreement is in place. After an agreement is fully signed, a report must be submitted at the end of every State fiscal quarter thereafter and continue until final disbursement is made. ADEC will provide necessary forms for this reporting and the report will be used to provide a project status update and current financial utilization information on the loan.

   d) Quarterly Financial Reporting
      Anticipated for this year’s quarterly status reporting is the inclusion of a quarterly financial report, which is anticipated to be implemented on the quarter ending September 30, 2014 (financial reporting was delayed one year due to software update needs). The financial report is essentially a disbursement request for the loan which will report quarterly financial information on the project. If the financial report documents expenditures, sufficient supporting documentation will be required so that a disbursement review can be made on determining and making payment on eligible expenses. A borrower may choose to make more frequent reimbursement requests (once a month maximum), but at a minimum they will be required to make minimal quarterly requests to meet this new reporting requirement. If no costs are incurred for the reporting quarter, acknowledgement of a simple statement of this fact within the online report will be all that is needed.
e) **Miscellaneous Reporting**

Additionally, ADEC will provide information to EPA as needed for national reports, public inquiries, or Congressional inquiries. ADEC will continue to meet the federal Environmental Results Initiative reporting requirements by inputting environmental summaries, referred to as “one-pagers” on ACWF projects, on an on-going basis and not less than quarterly. A summary will be presented in the ACWF annual report.

7. **Additional Subsidization – Disadvantage Community Assistance**

Under the FFY14 anticipated federal capitalization grant, at least 20% and no more than 30% of the applicable portion (approximately $455,802 and $683,703, respectively) of the grant must be offered in the form of additional subsidies. ADEC has chosen to offer a total approximate amount of $455,802 as additional subsidization, with $364,642 (80%) for Point Source and $91,160 (20%) for Non-Point Source as principal forgiveness.

For disadvantage communities, an amount of 10% or up to a maximum amount of $250,000 (cumulative per community) will be made with funds available if a project meets the follow criteria.

- The project must be listed on the project priority list and highest ranked projects will be considered first.
- The project must be ready to start construction no later than one year after issuance of the final IUP.
- The community must submit a loan application within two months upon issuance of the final IUP.
- The community must agree to within one year of the date of the signed loan agreement to submit total payment request at least equal to 25% of the total loan amount.

Disadvantaged communities are provided a subsidy as part of their project assistance to help alleviate economic hardships for constructing a capital project. A community is considered disadvantaged if its:

- Median Household Income (MHI) is less than the state average MHI that is currently published by the Alaska Department of Commerce, Community and Economic Development or by the U.S Census Bureau, whichever is greater

OR,

- Rate of unemployment is above the state average unemployment rate that is currently published by the Alaska Department of Commerce, Community and Economic Development or by the U.S Census Bureau, whichever is greater.

For a community to qualify for disadvantaged assistance, they need to meet either one of the above criteria. For Boroughs of the State, the above criteria can be used for a specific community within the Borough if the project is solely benefitting just that community.

If after one year of IUP publication any uncommitted subsidies exist, these funds will be distributed into projects with existing subsidies, or to those projects which are the furthest along in completion of construction. Additionally, the priority lists on Appendix Ia and Ib demonstrates that at least 20% of the anticipated capitalization grant amount will be provided via principal forgiveness. Any subsequent revision to this Fundable Project Priority list will likewise demonstrate that at least 20% of the grant will be provided via principal forgiveness.
Update of SFY 2011 Additional Subsidization Criteria – Disadvantage Community Assistance

In the SFY 2011 IUP, subsidy was offered to disadvantaged communities under the following guidelines:

Under the FFY10 federal capitalization grant, at least 30% of the applicable portion of the grant must be offered in the form of additional subsidies. The Department has chosen to offer a total amount of $1,826,274 as principal forgiveness in an amount up to 15% of the value of a loan made by the State’s CWSRF Program. However, only a $1.0 million cumulative maximum subsidy amount per community is allowed for all projects in receipt of funding to the community.

Currently, due to situations such as projects being completed under budget, not going forward, or possibly losing eligibility or equivalency on having federal funds drawn on payments to the community, ADEC has subsidy funds that need reobligating to other eligible projects. To ensure that principal forgiveness may be provided to meet the minimum additional subsidization requirement of the FFY 10 federal capitalization grant, the follow criteria will be used.

Prior to the expiration of FFY10 federal capitalization grant, the Department reserves the right to make any necessary changes to this method of subsidy allocation and the subsidy offered to projects listed in the Priority Project Lists of this IUP to ensure all subsidized funds are fully committed to projects moving forward.

Update of SFY 2012 Additional Subsidization Criteria – Disadvantage Community Assistance

In the SFY 2012 IUP, subsidy was offered to disadvantaged communities under the following guidelines:

Under the FFY11 federal capitalization grant, at least 30% of the applicable portion ($2,726,540) of the grant must be offered in the form of additional subsidies. The Department has chosen to offer a total amount of $817,962 as additional subsidization, $654,370 (80%) for Point Source and $163,592 (20%) for Non-Point Source as principal forgiveness in an amount up to 10% of the value of a loan made by the State’s CWSRF Program. However, only a $150,000 cumulative maximum subsidy amount per community is allowed for all projects in receipt of funding to the community. Additionally, for projects with qualifying Green Project Reserve components, a 12% subsidy or an $180,000 cumulative maximum subsidy amount per community will be made available.

Currently, due to situations such as projects being completed under budget, not going forward, or possibly losing eligibility or equivalency on having federal funds drawn on payments to the community, ADEC has subsidy funds that need reobligating to other eligible projects. To ensure that principal forgiveness may be provided to meet the minimum additional subsidization requirement of the FFY 11 federal capitalization grant, the follow criteria will be used.

Prior to the expiration of FFY11 federal capitalization grant, the Department reserves the right to make any necessary changes to this method of subsidy allocation and the subsidy offered to projects listed in the Priority Project Lists of this IUP to ensure all subsidized funds are fully committed to projects moving forward.

8. Green Project Reserve (GPR)
Under the total FFY 14, the anticipated capitalization grant amount awarded to the State, and to the extent there are sufficient eligible project applications, not less than 10% ($837,600) of funding provided for projects must be used for following category types: green infrastructure, water or energy efficiency improvements, and environmental innovative activities. GPR projects are listed under Appendix 1a and 1b by indication of green project category type and whether project justification is either categorical, or requires a business case demonstration.
Under this IUP, six projects listed on the Project Priority lists have been identified as being a GPR project based on EPA current guidance. The cumulative amount of these projects is $2,685,600, which exceeds the 10% minimal required amount by $1,848,000. ADEC will make its best effort to assure adequate participation is made for meeting the minimal reserve amount of $837,600.

Upon issuance of a loan commitment and to meet federal rules for providing an initial “business case” intent for adequately demonstrating GPR requirements, all eligible GPR projects are required to have their Department provided Green Project Assessment form with applicable backup documentation posted on the program’s web site by no later than the next reporting quarter; the web address is as follows:

http://www.dec.state.ak.us/water/MuniGrantsLoans/greenproj.htm

When a project is designed/bid ready, a complete Business Case will be required and posted on the basis that all equipment/material, performance specifications, and associated costs will be available. Additionally, once a project is complete and prior to completion of the project performance period, the borrower will be required to submit a follow up report demonstrating the effectiveness of the GPR project. This report will also be put on the program’s GPR posting web site.

9. Sustainability Policy
ADEC is committed to promoting sustainable design and management of wastewater utilities, and clean water resources. Projects that meet ADEC's sustainability criteria are eligible for up to 50 bonus points in the priority ranking system. Further details on sustainability criteria may be referenced under Appendix III.

10. Davis-Bacon
EPA’s FFY2012 appropriations bill permanently required the application of Davis-Bacon prevailing wage rates to all treatment works projects funded in whole or in part by the CWSRF. Davis-Bacon applies to construction contracts over $2,000 and their subcontractors (regardless of the subcontract amount).

To ensure compliance with these requirements, ADEC will confirm that the correct wage determinations are being included in the bid specifications and/or construction contracts. ADEC will also provide assistance recipients with the specific EPA Davis-Bacon contract language that is to be included in bid specifications and/or contracts. In addition, ADEC will collect Certifications of Davis-Bacon compliance from online project quarterly report statements.

11. American Iron and Steel
None of the funds made available to the borrower shall be used for a project for the construction, alteration, maintenance, or repair of a public water system unless all of the iron and steel products used in the project are produced in the United States. This requirement applies to the entire project receiving a loan agreement that is fully signed on and thereafter the effective date of January 17, 2014 through October 1, 2015.

If approved engineering plans and specifications by a State agency are completed prior to the enactment date, this requirement will not apply. Consideration for exclusions to this requirement are as follows: being inconsistent with the public interest; iron and steel products that are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality; or inclusion of iron and steel products produced in the United States that will increase the cost of the overall project by more than 25 percent.

For these exclusions to apply, a request for a waiver must be submitted to the Environmental Protection Agency (EPA) for consideration of approval. Borrowers have the option of sending a waiver request directly to EPA with a copy to ADEC, or they can submit the waiver to ADEC who will then forward it on
to the EPA. EPA will then make available to the public on an informal basis (EPA’s public internet web site) a copy of the request and information available to the Administrator concerning the request, and shall allow for informal public input on the request for at least 15 days prior to making a finding based on the request.

**ADMINISTRATIVE USES**

ADEC is allowed to use up to four percent of the federal grant amount for administrative purposes (40 CFR 35.3120(g)). In SFY 15, ADEC is requesting $335,040 to be used in administering the program. This request combined with administrative funds used totals $8,044,318. As the table below shows, ADEC has not yet requested the allowable amount of $9,317,558 for administering the program. A total of $938,200 is being reserved for future administrative costs.

### Calculation of Administrative Reserves

</tbody>
</table>

CWSRF regulations were amended to initiate a fee structure that will eventually supplant the use of the 4 percent administrative set-aside. Under EPA guidance, the fee we collect can only be used for administrative purposes to help manage the program. Effective December 29, 2000, the program has been collecting loan administration fees equal to one-half percent (0.5%) of the principal loan balance on scheduled repayments. As of November 15, 2014, the program has collected $6,453,503*. For SFY15, the program anticipates collecting $526,624 in program fees.

**LOAN TERMS**

Effective April 28, 2005, loans with a contract term of five to 20 years can be assessed an effective finance charge rate of one and one-half (1.5%) percent or 18.75 percent of the current bond rate as defined by the Municipal Bond Index. Loans with a contract term of one to five years can be assessed an effective interest rate of one (1) percent or 12 ½ percent of the current bond rate as defined by the Municipal Bond Index. Any loan term less than one year is assessed a one-half (0.5) percent finance charge. In addition, with the exception of loans that are paid off in less than one year, all other loan terms include a one-half (0.5) percent administrative fee as part of the overall finance charge.
Capitalization Requirements
In accordance with Title VI, Section 602(b) of the Clean Water Act as amended by the Water Quality Act of 1987, PL 100-4, Alaska will accept capitalization grants in accordance with a schedule jointly agreed upon by ADEC and EPA.

*subject to reconciliation
A required state match equaling 20 percent of the federal anticipated capitalization grant $1,675,200 will be deposited into the fund. Each loan payment made from the fund will follow the EPA rules of proportionality.

ADEC will provide the required state match from short term bonding this year. By using a short term bonding technique, ADEC uses, as collateral, the interest income of the Fund to acquire bond receipts and avoids use of any general funds from the State budget. This process effectively substitutes bond receipts for interest income. ADEC is required to document that sufficient interest income exists in an amount equal to or greater than the proposed bonding amount and that this process will still allow the Fund to grow in perpetuity. ADEC’s program audits have documented the availability of the required amount of interest.

<sup>1</sup> Subsidy funding for the Ketchikan Gateway Borough - S. Tongass Wastewater Main - Shoup to Forest Park project is limited to available subsidy funds.

<sup>2</sup> Full funding of the Anchorage - Girdwood Wastewater Treatment Facility - Ph II project for $24,000,000 will be dependent upon remaining available loan funds. The Department will negotiate with Anchorage to provide additional funds as they become available later in the year. Additionally, the project was by-passed to the priority list to meet minimal equivalency requirements.

<sup>3</sup> Total available loan and subsidy funding amounts under this amended IUP are $34,319,745 and $455,802, respectively and are split on a ratio of 80/20 between Point Source Priority List ($33,855,796 & $364,642 of subsidy) and Non-Point Source Priority List ($8,463,949 & $91,160 of subsidy) projects. Note, any additional subsidy that is not awarded to Non-Point Source projects will be awarded to Point Source projects or vice-versa if necessary.

<sup>4</sup> Criteria for being eligible for a loan subsidy may be referenced on page 10 under the narrative section of the IUP.

<sup>5</sup> Green Project Reserve Category Type: GIF - Green Infrastructure, WTR - Water Efficiency, ENG - Energy Efficiency & EIN - Environmentally Innovative. Green Project Justification Type: BC - Business Case / CAT - Categorical. Funding for Green projects is based on meeting a minimal required amount of $837,600 under the State's capitalization grant for the program. Note, an extra 25 scoring points are awarded to Green projects.

<sup>6</sup> Sustainability Policy - *"Fix it First"* - fix existing critical infrastructure; *"Improve TFM"* - improve technical, financial and managerial capacity of the system; and, *"Planning"* - planning and development of alternative projects that reflect the full life cycle cost of infrastructure.

---

1. Criteria for being eligible for a loan subsidy may be referenced on page 9 under the narrative section of the IUP.
2. Green Project Reserve Category Type: GIF - Green Infrastructure, WTR - Water Efficiency, ENG - Energy Efficiency & EIN - Environmentally Innovative. Green Project Justification Type: BC - Business Case / CAT - Categorical. Funding for Green projects is based on meeting a minimal required amount of $837,600 under the State’s capitalization grant for the program. Note, an extra 25 scoring points are awarded to Green projects.
3. Sustainability Policy - “Fix it First” - fix existing critical infrastructure; “Improve TFM” - improve technical, financial and managerial capacity of the system; and, “Planning” - planning and development of alternative projects that reflect the full life cycle cost of infrastructure.

### Notes

1. Full funding of the Dillingham - Landfill Waste Processing System project for $2,000,000 will be dependent upon remaining available loan funds. The Department will negotiate with the Dillingham to provide additional funds as they become available later in the year.

2. Total available loan and subsidy funding amounts under this amended IUP are $42,319,745 and $455,802, respectively and are split on a ratio of 80:20 between Point Source Priority List ($33,855,796 & $364,642 of subsidy) and Non-Point Source Priority List ($8,463,949 & $91,160 of subsidy) projects. Note, any additional subsidy that is not awarded to Non-Point Source projects will be awarded to Point Source projects or vice-versa if necessary.

3. Criteria for being eligible for a loan subsidy may be referenced on page 10 under the narrative section of the IUP.

4. Green Project Reserve Category Type: GIF - Green Infrastructure, WTR - Water Efficiency, ENG - Energy Efficiency & EIN - Environmentally Innovative. Green Project Justification Type: BC - Business Case / CAT - Categorical. Funding for Green projects is based on meeting a minimal required amount of $797,100 under the State's capitalization grant for the program. Note, an extra 25 scoring points are awarded to Green projects.

5. The Cordova "Solid Water Reduction & Water Quality Protection project was originally listed under the SFY 2013 IUP. Recently, due to scope of work changes the project is being relisted with a revised project description to include additional work items (underlined above). A loan offer was issued on October 10, 2013 and all other conditions in the agreement remain unchanged; however, the Green Project Amount was removed due to lack of substantiating eligible green project components.
APPENDIX IIa

ALASKA CLEAN WATER FUND

Point Source Priority Criteria
ALASKA CLEAN WATER FUND
STATE REVOLVING FUND (SRF)
PRIORITY CRITERIA FOR SFY15
POINT SOURCE PROJECTS

Alaska has established the following criteria to prioritize point source wastewater projects seeking funding from the Alaska Clean Water Fund, the Clean Water Act State Revolving Loan Fund. These criteria rank point source projects (CWA Sec.212) by their relative threats to public health and the environment. The results of the most recent 303(d) list priorities will be utilized for identifying important water quality issues.

PUBLIC HEALTH CONSIDERATIONS (only one)

1. A human disease event exists, documented by a recognized public health authority. Construction of this project will correct the problem.
   Examples include providing public health alerts/notice(s) documentation from a recognized public health authority. Also, documentation that either requires construction of the project through a regulatory compliance order or by action from the community issuing an ordinance/resolution for proceeding with the project.
   Assigned Points: 350

2. Current conditions are severe enough that a disease event can occur, but has not been reported. This project will resolve the problem.
   Examples include providing documentation such as multiple maintenance crew reports or study(s) that demonstrate current conditions are severe enough that a disease event can occur.
   Assigned Points: 300

3. Conditions indicate that there is a high potential that a disease event could occur. This project will minimize potential future public health problems.
   Examples include providing documentation such as a maintenance crew report(s), study(s), or documented photographs that can demonstrate a need that current conditions indicate that there is a high potential that a disease event could occur.
   Assigned Points: 200

4. Conditions are not probable that a disease event will occur. This project will minimize potential future public health problems.
   Assigned Points: 100

5. This project has no significant health related issues
   Assigned Points: 0

WATER QUALITY CONSIDERATIONS (only one)

1. This project will correct a documented pollution event in a:
   - 303(d) Category 5 Listed Water Body: 250
   - 303(d) Category 4b Listed Water Body: 240
   - 303(d) Category 4a Listed Water Body: 230
   - Non-303 d listed Water: 220
2. Current conditions are severe enough that a pollution event can occur, but has not been reported yet. This project will correct the problem in a:

<table>
<thead>
<tr>
<th>Description</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>303(d) Category 5 Listed Water Body</td>
<td>230</td>
</tr>
<tr>
<td>303(d) Category 4b Listed Water Body</td>
<td>220</td>
</tr>
<tr>
<td>303(d) Category 4a Listed Water Body</td>
<td>210</td>
</tr>
<tr>
<td>Non-303 d listed Water</td>
<td>200</td>
</tr>
</tbody>
</table>

3. This project will minimize the potential for future pollution events | 100 |

4. This project has minimal impact on future pollution events   | 0 |

**RECEIVING WATER USE (only one)**

This project addresses adverse impacts to:

1. Freshwater/groundwater
   - drinking or food processing | 10 |
   - propagation of fish, shellfish, etc., as a food source | 5 |
   - water contract recreation | 2 |

2. Marine waters/estuaries
   - propagation of fish, shellfish, etc., as a food source | 5 |
   - water contract recreation | 2 |

3. This project will not significantly address any adverse water quality impact | 0 |

**LOCAL INITIATIVE (only one)**

1. This project will complete a project that has already begun construction and has completed an environmental review. | 50 |

2. This project has DEC approved engineered plans and has a prepared or completed environmental review. | 40 |

3. At least 65% engineered plans have been prepared. | 30 |

4. A feasibility study for this project has been prepared. | 20 |

5. No planning or study document has been completed. | 0 |

**FUNDING COORDINATION (only one)**

1. This project will use other state, federal or local funds. | 15 |

2. Not yet determined. | 0 |
**ABILITY TO REPAY (only one)**

1. A viable repayment source has been identified.  
   - Assigned Points: 10
2. Not yet determined.  
   - Assigned Points: 0

**SUSTAINABILITY PROJECTS (only one)**

1. Fix It First Projects  
   - Assigned Points: 50
2. Effective Utility Management  
   - Assigned Points: 25
3. Planning  
   - Assigned Points: 25
4. Not Applicable  
   - Assigned Points: 0

**AFFORDABILITY CRITERIA (only one)**

1. Loan cost to population benefiting ratio
   - Cost/population ratio $0 - 400/person  
     - Assigned Points: 15
   - Cost/population ratio $401 - 4,000/person  
     - Assigned Points: 10
   - Cost/population ratio > $4,000/person  
     - Assigned Points: 5

**GREEN PROJECT (determined by ADEC)**

- The applicant has sufficiently demonstrated Green eligible components under the project.  
  - Assigned Points: 25
APPENDIX IIb

ALASKA CLEAN WATER FUND

Non-Point Source Priority Criteria
ALASKA CLEAN WATER FUND
STATE REVOLVING FUND (SRF)
PRIORITY CRITERIA FOR SFY15
NON-POINT SOURCE PROJECTS

Alaska has established the following criteria to prioritize non-point source projects seeking funding from the Alaska Clean Water Fund, the Clean Water Act State Revolving Loan Fund. These criteria allow traditional and nontraditional non-point water quality projects (CWA Sec. 319) to be considered for funding. These criteria address and rank projects by their relative threats to water quality and local initiative. The results of the most recent 303(d) list priorities will be utilized for identifying water quality issues considered for the non-point source SRF ranking process.

**WATER QUALITY CONSIDERATIONS (only one)**

1) **PREVENTION**
   
   This project's main emphasis is prevention of non-point source pollution in a:

<table>
<thead>
<tr>
<th>Category</th>
<th>Assigned Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>303(d) Category 5 Listed Water Body</td>
<td>100</td>
</tr>
<tr>
<td>303(d) Category 4b Listed Water Body</td>
<td>90</td>
</tr>
<tr>
<td>303(d) Category 4a Listed Water Body</td>
<td>80</td>
</tr>
<tr>
<td>Non-303 d listed Water</td>
<td>60</td>
</tr>
</tbody>
</table>

2) **RESTORATION**

   The proposed project's goal is to restore water quality in a water body identified as impaired or polluted in the most recent 303d list. This project implements a TMDL or load allocation or otherwise addresses a water quality problem that has resulted in a water body designed as impaired in a:

<table>
<thead>
<tr>
<th>Category</th>
<th>Assigned Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>303(d) Category 5 Listed Water Body</td>
<td>70</td>
</tr>
<tr>
<td>303(d) Category 4b Listed Water Body</td>
<td>60</td>
</tr>
<tr>
<td>303(d) Category 4a Listed Water Body</td>
<td>50</td>
</tr>
</tbody>
</table>

3) **STEWARDSHIP**

   The proposed project will improve or maintain water quality in a:

<table>
<thead>
<tr>
<th>Category</th>
<th>Assigned Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>303(d) Category 5 Listed Water Body</td>
<td>50</td>
</tr>
<tr>
<td>303(d) Category 4b Listed Water Body</td>
<td>40</td>
</tr>
<tr>
<td>303(d) Category 4a Listed Water Body</td>
<td>30</td>
</tr>
<tr>
<td>Non-303 d listed Water</td>
<td>20</td>
</tr>
</tbody>
</table>

* **PREVENTION** - This project's main emphasis is prevention of non-point source pollution.
* **RESTORATION** - The proposed project's goal is to restore water quality in a water body identified as impaired or polluted in the most recent 303(d) list. This project implements a TMDL or load allocation or otherwise addresses a water quality problem that has resulted in a water body designated as impaired.
* **STEWARDSHIP** - The proposed project will improve or maintain water quality.
**LOCAL INITIATIVE CONSIDERATIONS (only one)**

1) A TMDL, a corrective plan, or a 319 grant application has been approved. **25**
2) A draft TMDL or corrective action plan has been developed, or a draft 319 grant application has been prepared. **20**
3) An environmental review has been performed for the proposed project. **15**
4) A feasibility study that demonstrates the need and costs for the project has been completed. **10**
5) A draft feasibility study has been completed or monitoring for the project has begun **5**
6) A feasibility study is proposed, or no action has been taken **0**

**FUNDING COORDINATION (one only)**

1) This project will utilize other federal or state funds. **10**
2) Not yet determined **0**

**ABILITY TO REPAY (one only)**

1) A viable repayment source has been identified. **10**
2) Not yet determined **0**

**NPS STRATEGY IDENTIFIED PRIORITIES (determined by ADEC)**

1) Any storm water project. **40**
2) Any petroleum contamination/restoration **30**
3) Any community landfills **20**
4) All other identified in NPSS **10**

**GREEN PROJECT (determined by ADEC)**

The applicant has sufficiently demonstrated Green eligible components under the project. **25**
APPENDIX III

ALASKA CLEAN WATER FUND

Public Comments
During the final public comment period of the draft SFY15 ACWF IUP from June 10 – June 19, 2014, EPA provided the only comments on the draft IUP. EPA’s questions and follow up by the ADEC are as follows:

**Page 7 – Identification of Priority Projects, last paragraph in section**

EPA - NPS Amount should be $5,114,915 since amount available for funding was updated.

ADEC – Concur, the number has been updated.

**Page 10 – Expeditious and Timely Expenditures, table changes**

EPA - The binding commitment as a percentage is listed incorrectly as the ratio number (1.00%) and instead should 100% (ratio is 1.004).

ADEC - Concur, the percentage has been updated.

**Page 15 – Administrative Uses, first paragraph**

EPA - The first paragraph under Administrative Uses should be updated to reflect the revised amounts in the Calculations section. Also, in the Calculations section, the Admin funds requested prior to, and admin amount requested were changed from FY 14 to SFY 14, and it seems like that actually should be FFY 14 or SFY 15. In any regards, this section needs to be reconciled so the narrative text and calculations section match and are accurate.

ADEC - Concur, the text numbers have been updated to match calculation numbers.

During the public comment period of the draft SFY15 Amended ACWF IUP from December 4 – 13, 2014, and second notice from December 24 – January 2, 2015 EPA provided the only comments on the draft IUP of concern. Their questions and follow up by ADEC are as follows:

EPA - There is a change in the cumulative Federal grants prior to FFY 14 from $224,562,962 to $209,483,962, both on Page 6 and in the Funds Available calculation on Page 10. Could you explain why that cumulative amount changed? The 2014 NIMS data still shows the $224 million figure, but not sure if that is something DEC revised in working with EPA that didn’t get incorporated into NIMS in time.

ADEC – In review, ADEC noted an error made in the calculation of the cumulative Federal grants number and has revised it accordingly.

EPA – On the Planning List, the new project Kodiak Compost Facility – per our recent discussion, the project description should have a linkage to WQ benefits. Suggest adding that this project/amount is only for composting biosolids from a wastewater treatment facility.

ADEC – Concur, the project description has been updated accordingly.
