

Alaska Department of Environmental Conservation
Ballast Water Discharge Form
[AS 46.03.750]

Port, City, Facility, or Dock Name: _____ Date: _____
(Where cargo is to be taken on)

Vessel: _____ Flag State: _____

Last Port Visited: _____ Date of Departure _____

Owner address: _____

Arrival date & time this port: _____ Voyage #: _____ Estimated time to load Cargo (hrs): _____

Planned departure date & time this port: _____

Nature of cargo to be loaded at this port (types and quantities) _____

Quantity of segregated (clean) ballast this trip (reported in barrels: _____

Location (point) of discharge(s): _____

Quantity of ballast in cargo tanks this trip: _____

Location port or treatment facility where discharged: _____

Tanks washed this trip: _____

Tank washing system: _____ Water wash: _____ Crude oil wash: _____

Time deballasting started (dirty ballast): _____ Stopped: _____

If the vessel has discharged ballast at sea or in the waters of the State since leaving the last port, briefly describe the method used to avoid exceeding the allowable concentration of oil residue in the discharged ballast (such as discharging from segregated or dedicated ballast tanks, use of an oil/water separator, load on top procedures etc.). Include the amount of ballast discharged and when.

I, _____ Master of the above vessel, hereby certify that all the information I have provided on this form is true and complete to the best of my knowledge. I understand that if I fail to provide information or provide false information it may be grounds for criminal prosecution under AS 46.03.790.

Signed: _____ at: _____ (port)

Date: _____

Please return this form via email to: decsparippballastwater@alaska.gov

Alaska Department of Environmental Conservation Ballast Water Discharge Form Instructions

Purpose of Form

Alaska Statute SEC. 46.03.750(a) states, “except as provided in (b) of this section, a person may not cause or permit the discharge of ballast water from a cargo tank of a tank vessel into the waters of the state. A tank vessel may not take on petroleum or a petroleum product or by-product as cargo unless it arrives in ports in the state without having discharged ballast from cargo tanks into the waters of the state and the master of the vessel certifies that fact on forms provided by the department.”

The information required to track compliance with state law is gathered by means of a Ballast Water Discharge form which is completed on board the vessel and signed by the vessel’s master. The information is entered into a database maintained by the Alaska Department of Environmental Conservation (department). In order to ensure uniform compliance with state law, form, the department has developed the Ballast Water Discharge form that accompanies these guidelines. When completing the form, please follow the steps outlined below:

1. Submit the completed form to department’s Valdez office within two weeks of the port call in which a petroleum cargo was loaded.
2. Record all liquid quantities in barrels (bbls)
3. The form can be sent electronically or by sending a hard copy.
 - a. To submit electronically email the form to decsparippballastwater@alaska.gov
 - b. A hard copy can be sent to:
