I have lived in Fairbanks for 44 years. I have seen serious ice fog and pollution from truckers who insisted on keeping their engines running all night at minus 40. I have experienced winter pollution but never at the levels of the past few years especially with hydronic heaters. Those monsters would be eliminated. I fully support all the components of the SIP. This issue has been in the talking stage far too long. Let's get this done for all our sakes.
