

NOASH Rationale Affidavit

An owner or operator of a solid fuel-fired heating device may continue to use their device during a curtailment only if a written temporary waiver is received. In order to receive a temporary No Other Adequate Source (NOASH) waiver, one of the following must apply and be demonstrated:

Eligibility

- 1) The subject structure must be heated and the structure has no adequate heating source without using a SFBA;
- 2) Economic hardship requires use of the SFBA;
- 3) Complying with the restriction would result in damage to property including damage to the appliance itself and its heating components;
- 4) No documented curtailment violations

(Initial all that apply)

- ☐ The building relies on a solid fuel-fired heating device as its sole source of heat.
- ☐ The building has no adequate heating source without using a solid fuel-fired heating device.
- ☐ Complying with an alert restriction would result in damage to property including damage to the appliance itself and its heating system components.
- ☐ An economic hardship requires that the building uses a solid fuel (**documentation required**).
- ✓ Attach documentation showing receipt of assistance. (e.g. Unemployment, Denali Kid Care, WIC, Social Security/Disability)

The specific details of why I need a NOASH waiver are as follows:

If a waiver is granted, any violation of opacity or other solid fuel burning requirements in the future will result in the wavier being revoked, and future waiver applications will be denied.

I certify that the statements and information in and attached to this document, are true, accurate, and complete.
