Alaska Clean Water Fund - State Fiscal Year 2020 (SFY20) Project Priority List - 4th Quarter

Note: Available funding for SFY20 projects is \$70,368,467.

- (1) Subsidy is subject to change depending on the readiness of projects to proceed. Subsidy listed in this table is shown based on the year when allocated: SFY19 or SFY20.
- (2) Loan terms will be finalized when a loan agreement is offered. The finance rate will be based on a calculation identified in Alaska Administrative Code (18 AAC 76).

| (3) Ind | ividual F | Pro Fi projects a | re reviewed | and assigned a w | reighted score based on the total project cost. The overall score for the Pro Fi questionnaire is the | he sum of weighed | scores for all of | the Pro Fi proje | cts. | | | | | |

| 1 | | AK0022551 | III-B | Anchorage AWWU | Pump Station 12 Force Main-Interceptor C Gravity Junction Rehabilitation - Loan Amendment to increase existing loan amount by \$2,584,456. Project scope: Assess and rehabilitate the 45-year-old pump station, force mains, gravity junction box and the receiving 48-inch gravity sewer to meet current standards, enhance operation efficiency and provide continued service. | \$2,584,456 | | | | 20 | | Fix It First | 12/3/2019 | SFY20-Q1 |
| 2 | | AK0021474 | III-B | Sitka | Channel, Lake, Monastery & Landfill Lift Station Upgrades - Loan amendment to revise the scope of an existing loan (783361). The change in scope will allow replacement of valves, inefficent pumps, motors and controllers at the Brady Lift Station. No increase in the loan amount is requested. The existing loan amount is \$2,154,170. | \$0 | | | | 20 | \$2,154,170 (Energy Efficiency) | Fix It First | 2/3/2020 | SFY20-Q2 |
| 3 | | NA | VII | Dillingham | Landfill Groundwater Monitoring Wells - Loan amendment to increase existing loan request by \$96,897. Project scope: Decommission five monitoring wells and install seven new monitoring wells. The existing wells were not properly installed and do not provide representative samples to monitor groundwater quality. | \$96,897 | | | x | 20 | | na | 9/1/2019 | SFY20-Q2 |
| 4 | | AK0021555 | I | Kodiak | WWTP Phase II - UV Effluent Disinfection Facility - Loan amendment to increase exsting loan amount by \$5,435,000 (Loan #503021). Project scope: Construct ultraviolet (UV) disinfection system to comply with wastewater discharger permit requirements. | \$5,435,000 | | | х | 20 | | Effective Utility Management | 1/1/2020 | SFY20-Q3 |
| 5 | | AK0021440 | III-B | Ketchikan | Schoenbar Road Utilities Replacement (Sewer) - Loan amendment to increase existing loan amount by \$2,125,057 (Loan #481151-5). Project scope: Replace approximately 2,200 feet of aging 8-inch to 12-inch sewer mains and 12 sewer manholes. Failing water mains in the same area will also be replaced under a separate Alaska Drinking Water Fund loan. | \$2,125,057 | | | х | 20 | | Fix It First | | SFY20-Q3 |
| 6 | | AKG572019 | III-B | Ketchikan Gateway Borough | South Tongass Wastewater Main Replacement - Shoup to Forest Park - Loan amendment to revise the scope of an existing loan (Loan #482021). The project scope will be revised to include the replacement of approximately 500 feet of sewer mains in Forest Park Drive. | \$0 | | | х | 20 | | Fix It First | | SFY20-Q4 |
| 7 | | AK0021458 | III-B | Petersburg | Scow Bay 1 Pump Station Upgrade - Loan amendment to increase existing loan amount by \$194,695. (Loan #685271) due to construction bids exceeding initial estimates. Project scope: Replace undersized pumps and increase inadequate wet well storage capacity with a prperly sized and rated submersible pump station that includes high efficiency pumps and controls. | \$194,695 | | | X | 20 | | Fix It First | | SFY20-Q4 |
| | | | | | LOAN AMENDMENT SUBTOTAL | \$10,436,105 | \$0 | \$0 | | | | | | |

(ALL CATEGORIES)

Alaska Clean Water Fund - State Fiscal Year 2020 (SFY20) Programmatic Financing (Pro Fi) Projects

Applicant: Anchorage Water and Wastewater Utility

Loan Request: \$15,000,000 Loan Term: 20 years

The Pro Fi questionnaire includes the following improvements included in AWWU's capital improvement plans for the wastewater utility.

| Number | Project Name | Description | | | | | | | | |
|--------------------|--|--|--|--|--|--|--|--|--|--|
| | | Replace 1,100 feet of gravity sewer with larger-diameter pipe to accommodate pump station flow and future development upstream. The existing 8" ductile iron pipe was | | | | | | | | |
| C-20-01 | Farm Ave Sewer Rehab | installed in 1983. | | | | | | | | |
| C-20-02 | Pump Station 52 Improvements | Evaluate, provide recommendations, and prepare construction documents for constructing improvements to pump station. | | | | | | | | |
| C-20-03 | West 8th, N-P Sewer | Rehabilitate sewer main in downtown Anchorage. | | | | | | | | |
| C-20-04 | M Street Sewer | Rehabilitate sewer main in downtown Anchorage. | | | | | | | | |
| C-20-05 | West 2nd Ave Sewer | Rehabilitate sewer main in downtown Anchorage. | | | | | | | | |
| C-20-06 | D & E Street Sewer | Rehabilitate sewer main in downtown Anchorage. | | | | | | | | |
| C-20-07 | H & I Street Sewer | Rehabilitate sewer main in downtown Anchorage. | | | | | | | | |
| C-20-08 | C & D Street Sewer | Rehabilitate sewer main in downtown Anchorage. | | | | | | | | |
| C-20-09 | 5th-6th Ave Cordova-C Upgrade Sewer | Rehabilitate sewer main in downtown Anchorage. Rehabilitate sewer main in downtown Anchorage. | | | | | | | | |
| C-20-10 | Flower Park Glenn 4th Upgrade Sewer | Rehabilitate over 1,900 linear feet of 8-inch sewer pipe with multiple deficiencies including fractures, cracks, offsets, and joint separations. | | | | | | | | |
| | | Abandon in place approximately 1,100 feet of sewer main and add approximately 1,670 feet of new sewer main with a new alignment. In addition, provide access for | | | | | | | | |
| C-20-11 | D-2-4 Trunk Improvements | maintenance vehicles to manholes along Chester Creek. | | | | | | | | |
| | | Provide backup power to existing King Street OsM Main Building Headquarters and the existing King Street Warm Storage Building that houses all the critical equipment | | | | | | | | |
| C-20-12 | King Street Backup Power Upgrade | that the AWWU O&M Division utilizes to maintain and operate the water and sewer infrastructure during planned activities as well as emergency response activities. | | | | | | | | |
| | | Upgrade existing Septage Receiving Station with pretreatment equipment and increase user access. The pretreatment equipment will prevent sanitary sewer overflows in | | | | | | | | |
| C-20-13 | King Street Septage Receiving Station | the collection system. | | | | | | | | |
| | | Develop a new low cost stand alone building to house equipment, necessary to operate and maintain the AWWU water and sewer infrastructure. Operations include | | | | | | | | |
| C-20-14 | King Street Warm Vehicle Storage | planned maintenance as well as emergency maintenance in events such as sanitary sever overflows, water and sewer main breaks, etc. | | | | | | | | |
| | | promise maintenance as werras emergency maintenance in events such as samilarly sewer overnows, water and sewer main breaks, etc. | | | | | | | | |
| C-20-15 | King Street Main Building Upgrade | This project proposes various improvements to AWWU's King Street O&M Facility Administrative Building. Improvements include expanding and remodeling interior spaces | | | | | | | | |
| C-20-13 | King Street Main building Opgrade | and systems, and enclosing covered areas to increase the capacity, productivity, and efficiency of AWWU's support maintenance group. | | | | | | | | |
| C-20-16 | Asplund Wastewater Treatment Facility Storage | Construct additional warm storage for equipment, materials and sodium hypochlorite. This project is associated with the AWWTF disinfection process. | | | | | | | | |
| C-20-10 | Asplana Wastewater Treatment Facility Storage | construct adultional warm storage for equipment, materials and solution hypothiomee. This project is associated with the Awwy P distinction process. | | | | | | | | |
| C-20-17 | Asplund Wastewater Treatment Facility Scum Lines | Construct improvements to the scum handling system from the clarifiers to the incinerator including piping, pumps, heating, insulation, and controls. | | | | | | | | |
| C-20-18 | W 72nd Ave Trunk Rehab | Either line with cured-in-place pipe or directly replace a 15-inch corrugated metal pipe sewer trunk that has failed as a result of corrosion. | | | | | | | | |
| | | Replace/rehabilitate AC sewer main and rehabilitate and realign at least one manhole in a state of failure to reduce sanitary sewer overflows and groundwater infiltration | | | | | | | | |
| C-20-19 | Mills Drive Sewer Rehab | and inflow. | | | | | | | | |
| | | The Girdwood I & I project is an ongoing program to reduce groundwater infiltration by replacing leaking sewer services and lining existing sewer lines with a cured in place | | | | | | | | |
| C-20-21 | Girdwood Infiltration and Inflow (I&I) MH Ph IX | pipe (CIPP) identified through closed circuit television (CCTV) inspection and other means. | | | | | | | | |
| | Asplund Wastewater Treatment Facility Combined Heat and Power | | | | | | | | | |
| C-20-22 | Conversion | Investigate, design and construction of a combined heat and power system at the Asplund Wastewater Treatment Facility. | | | | | | | | |
| | | | | | | | | | | |
| C-20-23 | Asplund Wastewater Treatment Facility Disinfection Safety Improvements | Upgrade or rehabilitate process equipment associated with Asplund Wastewater Treatment Facility disinfection system for safety or functionality. | | | | | | | | |
| | | | | | | | | | | |
| C-20-24 | Asplund Wastewater Treatment Facility Raw Sludge Pumps Replacement | Replace the existing raw sludge pumps at Asplund Wastewater Treatment Facility that are at the end of their useful life and experience frequent maintenance issues. | | | | | | | | |
| | | | | | | | | | | |
| C-20-25 | Pump Station 2 Rehabilitation | Replace high voltage electrical system, aging and corroding piping, valves, control systems, and various site improvements within Pump Station 2. These improvements will | | | | | | | | |
| | | help increase safety, reduce the risk of sanitary sewer overflows, emergency repairs, service interruptions and operation and maintenance costs. | | | | | | | | |
| | | | | | | | | | | |
| | | The expansion project will involve acquisition of approximately 6.86 acres of land adjacent to the existing King Street facility, the headquarters for AWWU's operations and | | | | | | | | |
| | | maintenance activities. In addition to land acquisition, site improvements will include clearing, grading, backfilling, and fencing the property. In addition to the site | | | | | | | | |
| C-20-26 | King Street Campus Expansion | improvement work, the Municipality of Anchorage requires AWWU to complete paved roadway improvements and water main extension within 94th Avenue from Gambell | | | | | | | | |
| | | Street to the proposed land acquisition. Completion of this land purchase will allow the space required for needed expansion of operations including the construction of the | | | | | | | | |
| | | warm storage facility and other needed improvements identified in the King Street Facility Plan. | | | | | | | | |
| | | The existing fuel storage and dispensing system will be relocated to make room for other site improvements at the King Street facility, AWWU's headquarters for operations | | | | | | | | |
| C-20-27 | King Street Fuel Storage Improvements | and maintenance activities. This project will also streamline the traffic pattern within the King Street facility. | | | | | | | | |
| C-20-28 | Pump Station 58 Improvements | The purpose of this project is to upgrade Pump Station 58 to need current and future demands as well as address maintenance issues. | | | | | | | | |
| C-20-28 C-20-29 | Wastewater Master Plan | Integraphics or initial project is to upgrade Funity Station 36 to meet current and uturine demands as wen as address maintenance issues. Update the Wastewater Master Plan used to guide system upgrades and expansions. | | | | | | | | |
| C 20-23 | Asplund Wastewater Treatment Compressed Process Air System | Design and install a new compressed process air system to replace components that are beyond their useful life, significantly decrease or eliminate repairs, and increase the | | | | | | | | |
| C-20-30 | Rehabilitation | Design and instant a new compressed prices an system to replace components that are beyond their discrimine, significantly decrease of eliminate repairs, and increase the capacity to provide adequate compressed air to the process equipment. | | | | | | | | |
| | nenabilitation | capacity to provide adequate compressed all to the process equipment. | | | | | | | | |
