

Alaska Department of Environmental Conservation
Village Safe Water Program
Multi-Year Priority List

Ongoing Planning Projects:		
<i>Abbreviations: Preliminary Engineering Report (PER); Environmental Report (ER)</i>		
COMMUNITY	SCOPE OF WORK	Type
Aleknagik	PER and ER to evaluate alternatives to address the deficiencies within the existing wastewater collection system.	Upgrade
Angoon	PER and ER to evaluate alternatives to rehabilitate or improve the existing water source and identify new water sources.	Upgrade
Brevig Mission	PER and ER to evaluate alternatives to replace the drain field.	Upgrade
Deering	PER and ER to evaluate alternatives for a marine discharge outfall.	Upgrade
Eek	PER and ER to evaluate alternatives to repair or replace the water treatment plant foundation.	First Service
Igiugig	PER and ER to evaluate alternatives to extend the water main.	Upgrade
Kivalina	PER and ER to evaluate alternatives for solid waste improvements.	First Service
Klukwan	PER and ER to evaluate alternatives for upgrades to the sewer lagoon, including a geotechnical study.	Upgrade
Kobuk	PER and ER to evaluate alternatives to replace the drain field.	Upgrade
Kokhanok	PER and ER to evaluate alternatives to repair or replace the community wide wastewater collection system.	Upgrade
Newhalen	PER and ER to evaluate alternatives to improve or replace the water treatment plant.	Upgrade
Noatak	PER and ER to evaluate alternatives to replace or repair the West water loop main.	Upgrade
Nondalton	PER and ER to evaluate alternatives to repair or replace the wastewater collection system and lift station.	Upgrade
Nunam Iqua	PER and ER to evaluate alternative water sources and water storage for the community, including a geotechnical survey.	Upgrade
Nunapitchuk	PER and ER to evaluate options to design and build a permitted landfill and close the two existing sites.	Upgrade
Seldovia	PER and ER to evaluate alternatives to bring the wastewater system into compliance with secondary wastewater treatment standards.	Upgrade
Shaktolik	PER and ER to evaluate alternatives for a new water source.	Upgrade
St. Michael	PER and ER to evaluate alternatives to repair or replace the water storage tank.	Upgrade
Stebbins	PER and ER to evaluate alternatives to either improve the existing honey bucket lagoon or construct a new lagoon.	First Service
Teller	PER and ER to evaluate alternatives to assess the economic viability of piped water and sewer services.	First Service
Tuluksak	PER and ER to evaluate alternatives for piped water and sewer services.	First Service
Tununak	PER and ER to evaluate alternatives for piped water and sewer services.	First Service
Twin Hills	PER and ER to evaluate alternatives to replace the distribution system, improvements to the water treatment plant, and conduct a geotechnical study for new water storage tank area.	Upgrade

Note: New applications for funding will be accepted in Spring/Summer of 2020. High scoring planning projects will be added to this list at completion of the application and scoring process.

Alaska Department of Environmental Conservation
Village Safe Water Program
Multi-Year Priority List

Ongoing Construction Projects:		
COMMUNITY	SCOPE OF WORK	Type
Aleknagik	Piped water system to serve the North Shore West area, including a new community well, pump house, deep bury main, service connections, and modifications of in-house plumbing.	First Service
Chefornak	Completion of new sewage lagoon, lift station and force main, honey bucket dump site, water storage tank, watering points/pump stations, and washeteria.	First Service
Diomedea	New water storage tank.	First Service
Emmonak	New raw water source consisting of directionally drilled intake and well screen, new pump house and control; new water treatment plant including package filtration process; water and sewer main extension and 5 service lines .	Upgrade/ First Service
False Pass	Onsite wastewater systems for 8 homes.	Upgrade
Hughes	Install gravity sewer collection, new packaged lift station, and force main; decommission E-one residential pumps, reconstruct service connections to 12 homes, and construct 2 residential septic systems.	Upgrade
Huslia	Individual wells, septic systems, and house plumbing for 10 unserved homes.	First Service
Hydaburg	Upgrades to South Main Street settling tanks and new sewage effluent station.	Upgrade
Kachemak Selo	Ground water study, exploratory well drilling, production well, new water storage tank that will be connected to the community distribution system. The existing spring water sources and water treatment plant will be decommissioned.	Upgrade
Kaltag	Replace water main, water service lines and connections, upgrade circulating pumps, relocate well #1 power drop, and install new sewer line and replacement of manholes.	Upgrade
Kasaan	New sewage ocean outfall.	Upgrade
Kivalina	New modular washeteria and water treatment plant.	First Service
Kokhanok	New water treatment plant.	Upgrade
Kotzebue	New water treatment plant.	Upgrade
Nunam Iqua	Combined utility building improvements	Upgrade
Port Graham	Replace existing sewage ocean outfall with a single new outfall and associated lift station, force main, and gravity sewer collection facilities.	Upgrade
Teller	New water treatment plant and washeteria including a water storage tank, wastewater treatment system, and a PER/ER.	First Service
Twin Hills	Replace the existing water system by installing new distribution system.	Upgrade
Venetie	New water treatment plant and washeteria.	First Service
Voznesenka	Piped water service to homes in the Falls Creek area including individual septic systems and house plumbing.	First Service
Wales	New water treatment plant and washeteria.	First Service
Yakutat	Design and construct 3 new lift stations (Old Village, Jension, "schools") and design and rehabilitate 2 lift stations (Cannery and Sunrise)	Upgrade

Note: New applications for funding will be accepted in Spring/Summer of 2020. High scoring construction projects will be added to this list at completion of the application and scoring process.

Alaska Department of Environmental Conservation
Village Safe Water Program
Multi-Year Priority List

The following projects are substantially complete and are in the close-out phases of construction. Minimal funding, if any, will be required in order to complete these projects.

COMMUNITY	SCOPE OF WORK	Type
Akiachak	Completion of community piped water and sewer system, including service lines and plumbing for West Section and water and sewer mains, service lines, and house plumbing for East Section.	First Service
Bethel	Improvements to sewer lift station and wastewater lagoon.	Upgrade
Coffman Cove	Upgrades to the water treatment plant to replace obsolete equipment.	Upgrade
Eek	Community piped water and sewer system.	First Service
Hoonah	Improvements to bring the wastewater treatment plant into regulatory compliance, including a sequencing batch reactor with multiple reactors.	Upgrade
Hooper Bay	Community piped water and sewer system, including water treatment plant, sewage lagoon, vacuum sewer pump station, water and sewer mains and services, and house plumbing.	First Service
Kiana	Water and sewer mains and service connections to existing homes in Valley View Subdivision, including new sewage lift station.	First Service
Kobuk	Upgrades to water and sewer service lines and arctic boxes.	Upgrade
Lower Kalskag	Community piped water and sewer system.	First Service
McGrath	Water treatment plant renovations. Replace STEP septic tanks and lagoon aeration system. Improvements to the piped water distribution.	Upgrade
Mountain Village	New water storage tank and related infrastructure improvements to address long-term water shortage conditions in the village.	Upgrade
Nenana	Water treatment plant improvements including a new well and associated piping connections.	Upgrade
New Stuyahok	New modular water treatment plant.	Upgrade
Nikolaevsk	Water treatment plant improvements and mixer for water storage tank.	Upgrade
Ninilchik	Community watering point, piped water, and individual septic systems for Old Village town site.	First Service
Nunapitchuk	Water treatment plant, water storage tank, and washeteria and sewer lagoon improvements including the completion of a PER and ER. Development of new water well.	Upgrade
Saxman	Sewage lift stations and force main to allow connection to Mountain Point sewer system and eliminate ocean outfalls.	Upgrade
Shageluk	Gravity sewer system, water services, and house plumbing.	First Service
Thorne Bay	Improvements necessary to bring both the water and wastewater treatment plants into full regulatory compliance.	Upgrade
Trapper Creek	Community well and watering point.	First Service
Tuluksak	Design and construction of a new sewer force main, lagoon, and water service and sewer service to core facilities.	First Service
Unalakleet	Facility improvements necessary to address failing raw water transmission line, including the drilling of test wells.	Upgrade

Note: Upon construction completion and a determination that no additional funding is needed, projects will be removed from this list.
