www.nortechengr.com

Thank you very much for participating in *NORTECH*'s well search and initial groundwater assessment. The laboratory results of your groundwater sample detected two regulated per- and poly-fluoroalkyl substances (PFAS) below the current lifetime health advisory (LHA) level for these compounds. There is no action you need to take at this time.

Enclosed is the laboratory report for your well. Please reference Section 4 - "Report of Analysis" found on Page 13 of this report for the results of your groundwater analysis. The sum concentration of regulated PFAS compounds Perfluorooctanesulfonic acid (PFOS) and Perfluorooctonoic Acid (PFOA) was 0.00916 micrograms per liter (μg/L). This combined result is below the current LHA.

The Environmental Protection Agency (EPA) and Alaska Department of Environmental Conservation (ADEC) have set an updated LHA level of 0.070 µg/L. The LHA of 0.070 µg/L is for the sum of PFAS compounds PFOS and PFOA in drinking water.

As required by ADEC, we will be notifying ADEC of your laboratory test results. If you have any additional questions regarding the results of this report, please feel free to contact me or Julie Keener, at the **NORTECH** office, 907-452-5688, Monday through Friday, 8 am to 5 pm.

Again, thank you for participating in this groundwater assessment and we hope that you have a good summer.

Sincerely, **NORTECH**

Scott Hummel Chemist

W. Hummel

Laboratory Report of Analysis

To: Nortech

> 2450 College Road Fairbanks, AK 99709 (907)452-5688

Report Number: 1199073

Client Project: PFC Well Search NAPA-Van Horn

Dear Scott Hummel,

Enclosed are the results of the analytical services performed under the referenced project for the received samples and associated QC as applicable. The samples are certified to meet the requirements of the National Environmental Laboratory Accreditation Conference Standards. Copies of this report and supporting data will be retained in our files for a period of ten years in the event they are required for future reference. All results are intended to be used in their entirety and SGS is not responsible for use of less than the complete report. Any samples submitted to our laboratory will be retained for a maximum of fourteen (14) days from the date of this report unless other archiving requirements were included in the quote.

If there are any questions about the report or services performed during this project, please call Jennifer at (907) 562-2343. We will be happy to answer any questions or concerns which you may have.

Thank you for using SGS North America Inc. for your analytical services. We look forward to working with you again on any additional analytical needs.

Sincerely, SGS North America Inc.

1199073001-B	No Preservative Required	OK			

Container Condition Glossary

Containers for bacteriological, low level mercury and VOA vials are not opened prior to analysis and will be assigned condition code OK unless evidence indicates than an inappropriate container was submitted.

- OK The container was received at an acceptable pH for the analysis requested.
- BU The container was received with headspace greater than 6mm.
- DM The container was received damaged.
- FR The container was received frozen and not usable for Bacteria or BOD analyses.
- IC The container provided for microbiology analysis was not a laboratory-supplied, pre-sterilized container and therefore was not suitable for analysis.
- PA The container was received outside of the acceptable pH for the analysis requested. Preservative was added upon receipt and the container is now at the correct pH. See the Sample Receipt Form for details on the amount and lot # of the preservative added.
- PH The container was received outside of the acceptable pH for the analysis requested. Preservative was added upon receipt, but was insufficient to bring the container to the correct pH for the analysis requested. See the Sample Receipt Form for details on the amount and lot # of the preservative added.

SAMPLE DELIVERY GROUP CASE NARRATIVE

Client: SGS North America, Inc Job No FA62039

Site: 1199073 Report Date 3/13/2019 11:38:37

1 Sample was collected on 02/25/2019 and received at SGS North America Inc - Orlando on 03/05/2019 properly preserved, at 3.6 Deg. C and intact. This sample received an SGS Orlando job number of FA62039. A listing of the Laboratory Sample ID, Client Sample ID and dates of collection are presented in the Results Summary Section. Except as noted below, all method specified calibrations and quality control performance criteria were met for this job. For more information, please refer to QC summary pages.

MS Semi-volatiles By Method EPA 537M BY ID

Matrix: AQ Batch ID: OP74054

All samples were extracted within the recommended method holding time.

All samples were analyzed within the recommended method holding time.

Sample(s) FA62023-2MS, FA62024-1DUP were used as the QC samples indicated.

All method blanks for this batch meet method specific criteria.

Matrix Spike Recovery(s) for Perfluorononanesulfonic acid are outside control limits. Probable cause is due to matrix interference.

RPD(s) for Duplicate for Perfluoropentanesulfonic acid are outside control limits for sample OP74054-DUP. Probable cause is due to sample non-homogeneity.

Matrix: AQ Batch ID: OP74068

All samples were extracted within the recommended method holding time,

All samples were analyzed within the recommended method holding time.

Sample(s) FA62099-2MS, FA62099-2MSD were used as the QC samples indicated.

All method blanks for this batch meet method specific criteria.

Sample(s) FA62039-1 have surrogates outside control limits.

FA62039-1 for 13C2-PFDoDA, 13C2-PFTeDA: Outside control limits.

SGS Orlando certifies that this report meets the project requirements for analytical data produced for the samples as received at SGS Orlando and as stated on the COC, SGS Orlando certifies that the data meets the Data Quality Objectives for precision, accuracy and completeness as specified in the SGS Orlando Quality Manual except as noted above. This report is to be used in its cativety. SGS Orlando is not responsible for any assumptions of data quality if partial data packages are used.

ate / Time Received: 3/5/2019 1:15:00 PM	Delivery Metho	d: UPS Airbill #'s: 1za	3619w01660920)34	
Therm ID: IR 1;	Therm CF: -0.2	; # of 0	Coolers: 1		
Cooler Temps (Raw Measured) °C: Cooler	1: (3.8);				
Cooler Temps (Corrected) °C: Cooler	1: (3.6);				
Cooler Information Y or N	-	Sample Information	<u>Y</u> 0	r_N_	_N/A_
1. Custody Seals Present		Sample labels present on bottles			
2. Custody Seals Intact		Samples preserved properly	₩.		
3. Temp criteria achieved		Sufficient volume/containers recvd for ana	lysis: 👿		
Cooler temp verification IR Gun		4. Condition of sample	Intact		
5. Cooler media <u>Ice (Bag)</u>		5. Sample recvd within HT	•		
		6. Dates/Times/IDs on COC match Sample L	abel		
rip Blank Information Y or N	N/A	7. VOCs have headspace			₩.
1. Trip Blank present / cooler		8. Bottles received for unspecified tests			-
2. Trip Blank listed on COC		Compositing instructions clear			
W or S	N/A_	10. Voa Soil Kits/Jars received past 48hrs?			
	- Ca-	11. % Solids Jar received?			•
3. Type Of TB Received		12. Residual Chlorine Present?			
Misc. Information					
Number of Encores: 25-Gram 5-	Gram N	lumber of 5035 Field Kits: Numb	er of Lab Filtered	Metals: _	
Test Strip Lot #s: pH 0-3	230315	pH 10-12219813A Other:	(Specify)
