PFOA & PFOS Investigation

Date of Collection: June 27, 2018 Sampling Location: Gustavus, AK

Summary

Two samples from the Gustavus Water Plant and the Alaska Airlines Well were received at Admiralty Environmental, Juneau, AK on June 27, 2018.

Samples were forwarded to TestAmerica, Sacramento for the analysis of PFOA and PFOS. All laboratory acceptance criteria were met for all samples.

A complete report of the final lab results is enclosed. The official laboratory report follows this letter, and includes the analytical results, case narrative and chain of custody forms.

Kind Regards,

David Wetzel

Qualifier	Qualifier Description
Н	Sample was prepped or analyzed beyond the specified holding time
В	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Narrative

Receipt

The samples were received on 7/3/2018 at 9:30 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 5.8° C.

Method 537 (modified)

The method blank contained Perfluorooctanoic acid (PFOA) greater than one-half the Reporting Limit and Perfluorooctane Sulfonic Acid (PFOS) greater than the RL, preparation batch 320-233425 and analytical batch 320-236310. Samples Gustavus Water Plant AE20398 (320-40832-1) and Alaska Airlines Well AE20399 (320-40832-2) were re-extracted outside of hold time. Both sets of data are reported.

Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.
