

Alaska Department of Environmental Conservation State Revolving Fund Program

ADEC awards \$1,920,000 low-interest loan to Anchorage Water and Wastewater Utility for Pump Station 30/31 force main and facility upgrades

ANCHORAGE - The Alaska Department of Environmental Conservation (ADEC) announces the award of a \$1,920,000 low-interest loan to the Anchorage Water and Wastewater Utility for continuing work to upgrade two force mains, replace pumps at Pump Station 31, and eliminate pumps at Pump Station 30 that are no longer needed.

This project will continue rehabilitation work at the facility intended to achieve several benefits, including the following:

- Reduce the potential for freeze ups;
- Reduce the potential for main failures; and
- Improve pumping efficiency.

ADEC is authorized by state law to issue loans to borrowers for eligible wastewater system infrastructure projects, including planning and design projects. Administration of the loan is through the ADEC State Revolving Fund program under the authority of the Alaska Clean Water Fund.

The loan from the Alaska Clean Water Fund for this project carries a finance rate of 1.5% payable over 20 years. The Alaska Clean Water Fund is capitalized annually by a grant from the Environmental Protection Agency. The Clean Water State Revolving Fund programs operate around the country to provide states and communities the resources necessary to maintain and improve the infrastructure that protects our valuable water resources nationwide.
