

## **Alaska Department of Environmental Conservation State Revolving Fund Program**

### **ADEC awards \$5,435,000 low-interest loan to City of Kodiak for construction of disinfection system at wastewater treatment plant**

ANCHORAGE - The Alaska Department of Environmental Conservation (ADEC) announces the award of a \$5,435,000 low-interest loan to the City of Kodiak for construction of an ultraviolet (UV) disinfection system for effluent at the wastewater treatment plant.

The existing City of Kodiak Wastewater Treatment Plant does not currently provide effluent disinfection processes. The discharge permit requires the addition of effluent disinfection. This construction project is intended to allow the effluent from the wastewater treatment plant to comply with wastewater discharge permit requirements. The planning for this project was initiated under a separate project also funded through State Revolving Fund Program.

ADEC is authorized by state law to issue loans to borrowers for eligible wastewater system infrastructure projects, including planning and design projects. Administration of the loan is through the ADEC State Revolving Fund program under the authority of the Alaska Clean Water Fund.

The loan from the Alaska Clean Water Fund for this project carries a finance rate of 1.5% payable over 20 years. The Alaska Clean Water Fund is capitalized annually by a grant from the Environmental Protection Agency. The Clean Water State Revolving Fund programs operate around the country to provide states and communities the resources necessary to maintain and improve the infrastructure that protects our valuable water resources nationwide.
