6.1 Alaska Maritime NWR
(Map produced by Alaska U.S. Fish and Wildlife Service)

The Alaska Maritime Refuge stretches over several thousand miles of Alaska's coast. Because of the enormous geographic and ecological range, it's handy to view the Refuge in units. See http://alaska.fws.gov/nwr/akmar/units.htm for more information regarding the Alaska Maritime National Wildlife Refuge.
The Alaska Peninsula unit of the Alaska Maritime Refuge extends more than 400 miles along the south coast of the Alaska Peninsula from just west of Kodiak Island to the southern tip of the peninsula. The unit included hundreds of sea stacks and islands, many with steep or mountainous terrain often surrounded by reefs or rocky shores, including two previously established refuges in the Semidi and Shumagin island groups.

http://alaska.fws.gov/nwr/akmar/units/AKPeninsula.htm
The Aleutian Islands unit of the Alaska Maritime Refuge extends more than 1,100 miles in a chain of volcanic islands (some still growing) from Unimak Island at the tip of the Alaska Peninsula westward to Attu Island, nearer to Asia than to mainland North America. More than half of the land area in the Aleutians is part of the National Wilderness Preservation System. [http://alaska.fws.gov/nwr/akmar/units/Aleutianmain.htm](http://alaska.fws.gov/nwr/akmar/units/Aleutianmain.htm)
The Bering Sea unit of the Alaska Maritime Refuge extends more than 600 miles from islands and lands on Norton Sound along the Seward Peninsula to islands far into the Bering Sea, the wilderness island of St. Matthew and the Pribilof Islands. Islands established as the Bering Sea Refuge (1909) prior to incorporation into Alaska Maritime Refuge are part of the National Wilderness Preservation System. They include St. Matthew, Hall, and Pinnacle islands. [http://alaska.fws.gov/nwr/akmar/units/BeringMAIN.htm](http://alaska.fws.gov/nwr/akmar/units/BeringMAIN.htm)
Lying mostly above the Arctic Circle, the Chukchi Sea unit of the Alaska Maritime Refuge contains scattered islands, spits, and mainland areas. Extending along 500 miles of coast from southwest of Barrow on the Arctic Ocean, including the mountainous mainland area and sea cliffs of Cape Lisburne and Cape Thompson at the western end of the Brooks Range, to the low, sandy barrier islands and beaches used by migrating shorebirds and waterfowl out to the tip of the Seward Peninsula at the Bering Strait.

http://alaska.fws.gov/nwr/akmar/units/ChukchiMAIN.htm
The Gulf of Alaska unit of the Alaska Maritime Refuge contains scattered small islands extending along 800 miles of coast from Southeast Alaska’s rainforests including St. Lazaria Island near Sitka, across the arc of Prince William Sound and the fjord-edged Kenai Peninsula where the Chiswell Islands are the most-visited in all the refuge, to the Barren Islands and waters and islets off Kodiak. http://alaska.fws.gov/nwr/akmar/units/gulf.htm.
